Praise for *How I Became a Quant* "Led by two top-notch quants, Richard R. Lindsey and Barry Schachter, *How I Became a Quant* details the quirky world of quantitative analysis through stories told by some of today's most successful quants. This book tells the story of how academics, physicists, mathematicians, and other scientists became professional investors managing billions." --David A. Krell, President and CEO, International Securities Exchange "How I Became a Quant should be must reading for all students with a quantitative aptitude. It provides fascinating examples of the dynamic career opportunities potentially open to anyone with the skills and passion for quantitative analysis." --Roy D. Henriksson, Chief Investment Officer, Advanced Portfolio Management "Quants"--those who design and implement mathematical models for the pricing of derivatives, assessment of risk, or prediction of market movements--are the backbone of today's investment industry. As the greater volatility of current financial markets has driven investors to seek shelter from increasing uncertainty, the quant revolution has given people the opportunity to avoid unwanted financial risk by literally trading it away, or more specifically, paying someone else to take on the unwanted risk. *How I Became a Quant* reveals the faces behind the quant revolution, offering you the chance to learn firsthand what it's like to be a quant today. In this fascinating collection of Wall Street war stories, more than two dozen quants detail their roots, roles, and contributions, explaining what they do and how they do it, as well as outlining the sometimes unexpected paths they have followed from the halls of academia to the front lines of an investment revolution.

A notable contribution to our understanding of ourselves. This book explores the realm of human behavior in social situations and the way that we appear to others. Dr. Goffman uses the metaphor of theatrical performance as a framework. Each person in everyday social intercourse presents himself and his activity to others, attempts to guide and control the impressions they form of him, and employs certain techniques in order to sustain his performance, just as an actor presents a character to an audience. The discussions of these social techniques offered here are based upon detailed research and observation of social customs in many regions.

The Academy Delcourt

A Tale of Two Arthurs is an impressionistic chronicle of two very different men: Jack Arthur Johnson, the black American boxer, and Arthur Cravan, the white French poet and provocateur. These two men fought an improbable boxing match in Barcelona in 1916 which acts as the pivot point of this double-portrait which is also a kind of mirror: for despite their differences they were both fiercely independent individuals who in their own ways defied the mores of their time with a mixture of bravado, intelligence, and brute strength. Accompanying both men on their journeys is a celebrity chimpanzee named Consul who serves as the uniting thread — as well as the unlikely narrator — of this adventurous and ambitious comic.

Any resemblance to persons living or dead or actual events would be strangely coincidental... In a town in the east of France, Sylvestre Ruppert-Levansky, a president of the circuit court, begins his last trial, in the same place his career began.

He is considered tolerant and fair. But then a police officer from his past asks to see him. Perhaps the legend of Sylvestre, the eminent judge, isn't so cut and dry... In a gripping tale full of surprises, Denis Robert and Franck Biancarelli reinvent the thriller.
