Cambridge National Level 1/2 Award/Certificate in Engineering Design Kogan Page Publishers Did he ever play Hamlet? Has she worked in television? What was the title of his first novel? Under whom did she study? How many children has he? Answers to such questions about contemporary Canadian artists have often been difficult, even impossible, to find. This

series has been created to provide the answers; it covers creative and performing artists who have contributed as individuals to the culture of Canada in the twentieth century. Each volume in the series presents a cross-section of many different kinds of artists: authors of imaginative works, artists and sculptors, musicians (performers, composers, conductors, and directors), and

performing artists in ballet, modern dance, radio, theatre, television, and motion pictures; directors, designers, and producers in theatre, cinema, radio, television, and the dance; choreographers and, for cinema, cartoonists and animators. Within each category of art is included a selection of those who have achieved national and international recognition; those who have been

recognized locally, and some, now deceased, who markedly influenced their contemporaries locally, nationally, or internationally. This is not a critical compilation; rather it is an objective and factual reference work for those interested in contemporary Canadian culture. Information was collected by painstaking research in a wide variety of sources, and wherever possible it has been verified

by the artist to make each entry as accurate and comprehensive as possible. Dental Images Instructional Fair Help your learners develop their knowledge and prepare for assessment with this brand-new classroom resource - the only textbook tailored to the Cambridge National Level 1/2 Award and Certificate in Engineering Design. A large body of research in disciplines from sociology and policy studies to neuroscience and educational psychology has confirmed that socioeconomic status remains the most powerful influence on children's educational

outcomes. Socially disadvantaged children around the world disproportionately suffer from lower levels of educational achievement, which in turn leads to unfavourable long-term outcomes in employment and health. Education in the Best Interests of the Child addresses this persistent problem, which violates not only the principle of equal educational opportunity,

but also the broader principle of the best interests of the child as called for in the UN Convention on the Rights of the Child. Building on the children's rights work accomplished in their previous book, *Empowering Children*, Brian Howe and Katherine Covell identify three types of reform that can significantly close the educational achievement gap. Their findings make an important

argument for stronger and more comprehensive action to equalize educational opportunities for disadvantaged children.
