In *Who Is the Dreamer Who Dreams the Dream? A Study of Psychic Presences*, James Grotstein integrates some of his most important work of recent years in addressing fundamental questions of human psychology and spirituality. He explores two quintessential and interrelated psychoanalytic problems: the nature of the unconscious mind and the meaning and inner structure of human subjectivity. To this end, he teases apart the complex, tangled threads that constitute self-experience, delineating psychic presences and mystifying dualities, subjects with varying perspectives and

functions, and objects with different, often phantasmagoric properties. Whether he is expounding on the Unconscious as a range of dimensions understandable in terms of nonlinear concepts of chaos, complexity, and emergence theory; modifying the psychoanalytic concept of psychic determinism by joining it to the concept of autochthony; comparing Melanie Klein's notion of the archaic Oedipus complex with the ancient Greek myth of the labyrinth and the Minotaur; or examining the relationship between the stories of Oedipus and Christ, Grotstein emerges as an analyst whose clinical sensibility has been profoundly

deepened by his scholarly use of mythology, classical thought, and contemporary philosophy. The result is both an important synthesis of major currents of contemporary psychoanalytic thought and a moving exploration of the nature of human suffering and spirituality.

Dream Tending Harper Collins

Theo and her young, irresponsible mother seem trapped in their miserable, poverty-stricken life. Theo dreams of belonging to a "real" family, and her dream seems to come true when she is mysteriously adopted by the large, warm Kaldor family. But as time passes, the magic of Theo's new life

begins to fade, and soon she finds herself back with her mother. Were the Kaldors real or just a dream? And who is the shadowy figure who haunts Theo's thoughts? *Dream of Me* Penguin My Education is William S. Burroughs's final collection, first published two years before his death in 1997. It is a book of dreams, written over several decades and as personal and close to a memoir as we will see. The dreams cover themes from the mundane and ordinary -- conversations with his friends Allen Ginsberg or Ian Sommerville, feeding his cats, procuring drugs or sex -- to the erotic, bizarre, and visionary. Always a rich source of imagery in Burroughs's own

fiction, in this book, dreams become a direct and powerful force in themselves. "Mr. Burroughs has lost none of his irreverence or wit, but in recent years he has acquired an elegant, elegiac tone." - The New York Times

In this extraordinary book, shamanic dream teacher Robert Moss shows us how to become shamans of our own souls and healers of our own lives. The greatest contribution of the ancient shamans to modern healing is the understanding that in the course of any life we are liable to suffer soul loss — the loss of parts of our vital energy and identity — and that in order to be whole and well, we must find the means of soul recovery. Moss teaches us that our dreams give us maps we can use to travel to the places where we

can find and bring home our lost or stolen soul parts. He shows us how to recover our animal spirits and ride the windhorse of spirit to places of healing and adventure in the larger reality. We discover how we can heal ancestral wounds and open the way for cultural soul recovery. You'll learn how to enter past lives, future lives, and the life experiences of parallel selves and how to bring back lessons and gifts. "It's not just about keeping soul in the body," Moss writes. "It's about growing soul, becoming more than we ever were before, embodying more of the Greater Self." With fierce joy, he incites us to take the creator's leap and bring something new into our world.

Domhoff's neurocognitive model helps explain the neural and cognitive bases for dreaming. He discusses how dreams express conceptions

and concerns, and how they are consistent over years and decades. He also shows that there may be limits to understanding the meaning of dreams as there are many aspects of dream content that cannot be related to waking cognition or personal concerns. In addition, the book includes a detailed explanation of the methods needed to test the new model as well as a case study of a comprehensive dream journal. Particularly valuable is a discussion of a new system of content analysis that can be used for highly sophisticated studies of dream content. In this provocative book, Domhoff sets forth a convincing argument that will encourage a

resurgence in dream research among both new and established cognitive psychologists and neuropsychologists.

"This fascinating little volume explores the stuff that dreams are made of and the role the pandemic is playing in them. The dreams from Barrett's survey are riveting vignettes--from terrifying to touching to hilarious. Her decades of scientific research and clinical practice inform incisive commentary on what these dreams reveal about society's response. She offers simple exercises for managing anxieties over COVID-19 and for inspiring adaption in this unique period of history. A great read!" - Amy Tan, author of *The Joy Luck Club* DREAM: I looked down at my

stomach and saw dark blue stripes. I "remembered" these were the first sign of being infected with COVID-19. DREAM: My home was a Covid-19 test center. People weren't wearing masks. I'm taken aback because I wasn't asked to be a test site. I'm worried that my husband and son (who actually lives out of state) will catch it because of my job as a healthcare worker. DREAM: I was a giant antibody. I was so angry about COVID-19 that it gave me superpowers, and I rampaged around attacking all the virus I could find. I woke so energized! Since the COVID-19 pandemic swept around the world, people have reported unusually a vivid and bizarre

dream lives. The virus itself is the star of many--literally or in one of its metaphoric guises. As a dream researcher at Harvard Medical School, Deirdre Barrett was immediately curious to see what our dream lives would tell us about our deepest reactions to this unprecedented disaster. Pandemic Dreams draws on her survey of over 9,000 dreams about the COVID-19 crisis. It describes how dreaming has reflected each aspect of the pandemic: fear of catching the virus, reactions to sheltering at home, work changes, homeschooling, and an individual's increased isolation or crowding. Some patterns are quite similar to other

crises Dr. Barrett has studied such as 9/11, Kuwaitis during the Iraqi Occupation, POWs in WWII Nazi prison camps, and Middle Easterners during the Arab Spring. There are some very distinctive metaphors for COVID-19, however: bug-attack dreams and ones of invisible monsters. These reflect that this crisis is less visible or concrete than others we have faced. Over the past three months, dreams have progressed from fearful depictions of the mysterious new threat . . . to impatience with restrictions . . . to more fear again as the world begins to reopen. And dreams have just begun to consider the big picture: how society may change. The book offers guidance on how we

can best utilize our newly supercharged dream lives to aid us through the crisis and beyond. It explains practical exercises for dream interpretation, reduction of nightmares, and incubation of helpful, problem-solving dreams. It also examines the larger arena of what these collective dreams tell us about our instinctive, unconscious responses to the threat and how we might integrate them for more livable policies through these times. Deirdre Barrett, PhD is a dream researcher at Harvard Medical School. She has written five books including *Pandemic Dreams* and *The Committee of Sleep*, and edited four including *Trauma* and

Dreams. She is Past President of The International Association for the Study of Dreams and editor of its journal, DREAMING.
