Clayoquot Mass Trials is about defending the rainforest - one of the last temperate rainforests remaining in the world, located at the westernmost extreme of Canada.

It's about the summer of 1993 when an overwhelming number of people from all walks of life, and from all parts of the world, joined together in the biggest nonviolent protest in Canada's history. The mass arrests of these people were headline news and, some months later, the biggest mass trial in Canadian history was embroiled in confusion and controversy as arrestees received stiff fines and jail sentences. Clayoquot Mass Trials tells the story of Clayoquot Sound, the protests over many years, and the personal and political reasons why so many people risked their liberty by putting themselves on the line in front of the logging trucks. And it tells this story through the eloquence of the protesters themselves as they spoke before the court, and through the almost-daily commentaries found in the news media. California. Court of Appeal (1st Appellate District). Records and Briefs Penguin Group Australia

Cases argued and determined in the Supreme Court of North Carolina.

"The arrest of Mohammad Salameh, an illegal Palestinian immigrant, and three other Arab men in connection with the 1993 World Trade Center bombing set off the first major Muslim scare in New York City history. It was in this atmosphere that the four defendants were indicted and stood trial for the terrorist act. I was a public defender with New York's Legal Aid Society at the time and by chance was assigned to represent the lead suspect, Salameh. The high-profile case snapped

me out of my midcareer doldrums.

Salameh was the ultimate underdog, and I was determined to ensure that he received a fair trial before an impartial jury. Unfortunately, the key court actors judge, prosecutors, and defense lawyers failed to meet this challenge. Terrorism defendants are not predestined to receive unfair trials. If we are alert to the stress factors that can undermine impartiality, we can take measures to avoid transforming the potential for injustice into the actuality of an unfair proceeding." from the Preface This is the inside story of an epic courtroom showdown between terrorism and the American legal system. On a snowy day in February 1993, a massive car bomb nearly toppled the World Trade Center. Four Middle Eastern men were quickly arrested and charged with the crime. At the time, Robert E. Precht was a staff attorney for the Legal Aid Society Federal Defender Division in Manhattan, handling routine cases as a public defender. He was surprised to be appointed defense attorney to the chief suspect, Mohammad Salameh, and challenged as never before by the media circus that this major terrorism trial would prove to be. The events and personalities of the trial make for gripping reading, but equally compelling are Precht's observations on the forces arrayed against fair trials for accused terrorists."

The exponential growth of clinical psychology since the late 1960s can be measured in part by the extensive literature on the subject. The field has come to be defined as much by its many

topics as its many voices. The Oxford Handbook of Clinical Psychology synthesizes these decades of literature in one volume. In addition to core sections on topics such as training, assessment, diagnosis, and intervention, the handbook includes chapters devoted to emerging issues in the clinical field, including health care reforms, cultural factors, and technological innovations and challenges. Each chapter offers a review of the most pertinent literature, outlining issues and identifying possibilities for future research. The Terrorist Trial of the 1993 Bombing of the World Trade Center

Before the World Trade Center's Twin Towers fell on September 11, 2001, they were the target of an earlier terrorist plot. In 1993, terrorists drove a van filled with explosives into the Trade Center's underground parking garage. In the blast that followed, six people were killed and many more were injured. In The Terrorist Trial of the 1993 Bombing of the World Trade Center: A Headline Court Case, author Michael J. Pellowski describes this horrific event, the worldwide manhunt for the killers, and the controversial trial of the terrorists, including mastermind Ramzi Yousef. He explains the complicated legal, historical, and political issues involved in these events, and he sheds light on the even more destructive events to come. Book jacket.

State of Illinois V. Munson

"On July 26, 1993, a trial conducted by Wayne Perryman was held ... the results of this trial would determine whether or not Ham, the father of the Black race, as well as his Black descendants, were forever cursed"--P. [4] of cover.

United States of America V. Groth Blueback is an achingly beautiful story about family, belonging, and living a life in tune with the environment, from Tim Winton, one of Australia's best-loved authors. Abel Jackson's boyhood belongs to a vanishing world. On an idyllic stretch of coast whose waters teem with fish, he lives a simple, tough existence. It's just

him and his mother in the house at Longboat Bay, but Abel has friends in the sea, particularly the magnificent old groper he meets when diving. As the years pass, things change, but one thing seems to remain constant: the greed of humans. When the modern world comes to his patch of sea, Abel wonders what can stand in its way. Blueback is a deceptively simple allegory about a boy who matures

through fortitude and who finds wisdom through living in harmony with all forms of life. 'In true fable style, this is a simple story, but one so beautiful, poignant and moving it is impossible to ignore.' Daily Telegraph 'Winton . . . convince[s] us of the preciousness of our oceans not through lectures but through his characters' steady wonder.' New York Times
