The work considers the international and European obligations of the UK in the realm of challenging the far-right and assesses the extent to which it adheres to them. It looks at the role of criminal law in tackling hate speech and hate crime and assesses how English law deals with political parties which may deviate from agreed norms and principles such as non-discrimination. The legal analysis is placed within a contextual framework of far-right parties in the United Kingdom and also incorporates a definitional framework in terms of how the law defines themes relevant to challenging the far-right, such as racial discrimination, terrorism and extremism. The book presents a valuable guide for students, academics and policy-makers in the areas of International Human Rights Law, Criminal Law, Comparative Constitutional Law, National Security Law, Comparative Politics and Terrorism Studies.

Legal Challenges to the Far-Right Oxford University Press

Understanding the politics of security in city-regions is increasingly important for the study of contemporary policing. This book argues that national and international governing arrangements are being outflanked by various transnational threats, including the cross-border terrorism of the attacks on Paris in 2015 and Brussels in 2016; trafficking in people, narcotics and armaments; cybercrime; the deregulation of global financial services; and environmental crime. Metropolises are the focal points of the transnational networks through which policing problems are exported and imported across national borders, as they provide much of the demand for illicit markets and are the principal engines generating other policing challenges including political protest and civil unrest. This edited collection examines whether and how governing arrangements rooted in older systems of national sovereignty are adapting to these transnational challenges, and considers problems of and for policing in city-regions in the European Union and its single market. Bringing together experts from across the continent, Policing European Metropolises develops a sociology of urban policing in Europe and a unique methodology for comparing the experiences of different metropolises in the same country. This book will be of value to police researchers in Europe and abroad, as well as postgraduate students with an interest in policing and urban policy.

Leading the Police BRILL

In 2015 the College of Policing published its Leadership Review with specific reference to the type of leadership required to ensure that the next generation of Chief Constables and their management approach will be fit for purpose. Three key issues were highlighted as underpinning the effective leadership and management of contemporary policing: hierarchy, culture and consistency. Yet these are not just relevant to modern policing, having appeared as constant features, implicitly and explicitly, since the creation of the first provincial constabularies in 1835. This collection reviews the history of the UK Chief Constable, reflecting on the shifts and continuities in police leadership style, practice and performance over the past 180 years, critiquing the factors affecting their operational management and how these impacted upon the organization and service delivery of their forces. The individuality of Chief Constables significantly impacts on how national and local strategies are implemented, shaping relationships with their respective communities and local authorities. Importantly, the book addresses not just the English experience but considers the role of Chief Constables in the whole of the United Kingdom, highlighting the extent to which they could exercise autonomous authority over their force and populace. The historical perspective adopted contextualises existing considerations of leadership in modern policing, and the extensive timeframe and geographical reach beyond the experience of the Metropolitan force enables a direct engagement with contemporary debates. It also offers a valuable addition to the existing literature contributing to the institutional memory of UK policing. The contributors represent a range of disciplines including history, law, criminology and leadership studies, and some also have practical policing experience.

The Battle for British Islam Routledge

This book delivers insights into how social science and technology might aid new advancements in managing the complexity inherent within national and international security landscape. The digital policing landscape is dynamic and intricate, emanating from crimes that are both persistent and transnational. Globalization, human and drug trafficking, cybercrime, terrorism, and other forms of transnational crime can have a significant impact on societies around the world. This necessitates a reassessment of what crime, national security, and policing mean. Recent global events such as human and drug trafficking, the COVID-19 pandemic, violent protests, cyber threats, and terrorist activities underline vulnerabilities residing in our current security and digital policing posture. As an interdisciplinary collection of studies, this book encapsulates concepts, theories, and technology applications, offering a comprehensive analysis of current and emerging trends and threats within the context of national and international security. Undertaking an evidence-based approach, this book offers an extraordinarily perceptive and detailed account of issues and solutions related to the complex national and international security landscape. To this end, the book: presents insights into emerging and potential technological and methodological solutions as well as advancements in relation to integrated computational and analytical solutions that could be deployed for the purposes of national and international security; provides a comprehensive analysis of technical, ethical, legal, privacy, and civil liberty challenges stemming from the aforementioned advancements; and, accordingly, offers detailed recommendations supporting the design and implementation of best practices including technical, ethical, and legal approaches for national and international security uses. The research contained in the book fits well into the larger body of work on various aspects of AI, cybersecurity, national security, digital forensics, cyberterrorism, ethics, human rights, cybercrime, and law. It provides a valuable reference for LEAs and security organizations, policymakers, cybersecurity experts, digital forensic practitioners, researchers, academicians, graduates and advanced undergraduates, and other stakeholders with an interest in national and global security.

How can you avoid the common pitfalls when navigating the complexities of personal injury limitation periods? This is a guide to the law of limitation periods in personal injury actions. Pitfalls and problems are highlighted and the limitation periods and service rules are clearly explained, ensuring that you never issue or serve proceedings outside the legal time limits. Each chapter is supplemented by summaries of the key cases for that topic and Part 2 contains all the relevant legislation. New coverage includes landmark cases, explaining and analysing their impact on practice: - Collins v Secretary of State for Business, Innovation and Skills (Court of Appeal, 2014) - an asbestos-related lung cancer case of 'seminal importance in relation to long tail industrial disease claims' - Platt v BRB (Residualary) Ltd (Court of Appeal, 2014) - examination of constructive knowledge in the context of limitation in disease cases - RE v GE (2015) - consideration of the court's discretion, conferred by section 33 of the Limitation Act 1980 in the context of a sexual abuse case - Abela v Baadarani (Supreme Court, 2013) - highlights an important shift of emphasis away from the traditional approach to service out of the jurisdiction and considerations of national sovereignty, and towards a more practical and pragmatic approach - Barton v Wright Hassall (Supreme Court, 2018) - a crucial judgment regarding whether litigants in person should be granted a special status in civil litigation

This book analyses and bridges the gap between critical social research on race and politics by reviewing the academic field of race theorising and scholarship, covering changes in race and racism debates in recent decades, and assessing the extent, scope, and limits of academic engagements with, and impact on, policy and politics.

Report of the Major & Superintendent of the Metropolitan Police, District of Columbia Penguin

This book provides an ethnography of street-level policing in the United States and offers an analysis with valuable lessons for today's law enforcement officers. Author George C. Klein, sociologist and former police officer, explores the characteristics of policing in a suburb outside of large Midwestern city in the United States. As a participant-observation fieldworker, he functioned as an ethnographic researcher, recording with a sociological eye the "real world" tasks of policing, including the ordinary as well as the more remarkable aspects of day-to-day law enforcement. He approaches the data with three levels of analysis, looking at embedded issues in policing, such as discretion, danger, corruption, cynicism, race, and class; a mid-range analysis that examines police work as an example of street-level bureaucracy; and a global analysis assessing the entrenched roles of race, class, and demography in police work, as well as, society, in the U.S. This book focuses on the need for police officers to solve social problems that other institutions in society are unwilling, or unable, to solve. It examines a myriad of issues, such as police socialization, the use of force by police officers, stress levels and suicide risk factors, disparate styles of policing, police militarization, de-escalation, and more. With compelling detail, the author helps the reader understand the turmoil regarding policing in the United States today. It is ideal for police professionals as well as students and scholars of criminal justice, criminology, sociology, psychology, history, political science and journalism.

Critical Perspectives on the Management and Organization of Emergency Services makes an important contribution to the subject of emergency services management and to public administration and organization studies more generally. It critically assesses developments in emergency services management by examining the multi-dimensional nature of the provision of emergency services and their connectedness in advanced western democracies. The effective management of emergency services has never been more important than in today's high-pressured and cost-conscious public sector. The authors of this volume forensically analyse the challenges of delivering emergency services within this context. This book provides an in-depth, scholarly and comprehensive analysis of the changing landscape of emergency service provision and clearly addresses a gap in the market for a critical volume on the emergency services. For anyone seeking to understand why and how the management of emergency services matters, this collection is essential reading.

Criminal Records, Privacy and the Criminal Justice System: A Practical Handbook Routledge

In the 2015 UK General Election, one of the major pledges of the Conservative party was the repeal of the Human Rights Act 1998, to be replaced with a UK Bill of Rights. In this book, Professor Conor Gearty puts forth his case for keeping the Human Rights Act by dissecting the so called 'fantasies' that are driving the case for repeal. Analysing the debate through the perspective of British law, history, politics, and culture, he examines what arguments are in place for the repeal of the Act and how these can be dismissed as no more than 'English exceptionalism'. Structured in three parts, the book first exposes the myths that drive the anti-Human Rights Act argument. Second, in a counter-balance to these arguments, Gearty outlines how the Act operates in practice and what its impact really is 'on the ground'. Third, he looks to the future and the kind of Britain we want to live in, and how, for all its modesty, the survival or otherwise of the Human Rights Act will play a pivotal part in that future.

Sexual offending has become a mainstay item of reporting in our daily newspapers, and television news bulletins. This book offers an account of the policing of sexual offences and the difficulties that confront the police in the investigation of these intrusive crimes. It surveys the breath of sexual offences and examines the reporting of sexual crime and the attrition level that follows. It proceeds by critically assessing the efforts the police are making to overcome these difficulties and the degree to which they are making progress. The book outlines the relatively new police role of policing the convicted sex offenders themselves, who are living in the community and are subject to risk 'management' by the police and the requirements of the sex offender register held by the police. Written by a leading expert, this timely book will be of great interest to scholars of sexual offending and criminal justice.

Racism, Policy and Politics Springer Nature

This book examines how face recognition technology is affecting privacy and confidentiality in an era of enhanced surveillance. Further, it offers a new approach to the complex issues of privacy and confidentiality, by drawing on Joseph K in Kafka's disturbing novel *The Trial*, and on Isaiah Berlin's notion of liberty and freedom. Taking into consideration rights and wrongs, protection from harm associated with compulsory visibility, and the need for effective data protection law, the author promotes ethical practices by reinterpreting privacy as a property right. To protect this right, the author advocates the licensing of personal identifiable images where appropriate. The book reviews American, UK and European case law concerning privacy and confidentiality, the effect each case has had on the developing jurisprudence, and the ethical issues involved. As such, it offers a valuable resource for students of ethico-legal fields, professionals specialising in image rights law, policy-makers, and liberty advocates and activists.

Report of the Major & Superintendent of the Metropolitan Police, District of Columbia Biteback Publishing

Named one of the best nonfiction books of the year by *The Washington Post* "Tangled Up in Blue is a wonderfully insightful book that provides a lens to critically analyze urban policing and a road map for how our most dispossessed citizens may better relate to those sworn to protect and serve."

—*The Washington Post* "Remarkable . . . Brooks has produced an engaging page-turner that also outlines many broadly applicable lessons and sensible policy reforms." —*Foreign Affairs Journalist* and law professor Rosa Brooks goes beyond the "blue wall of silence" in this radical inside examination of American policing. In her forties, with two children, a spouse, a dog, a mortgage, and a full-time job as a tenured law professor at Georgetown University, Rosa Brooks decided to become a cop. A liberal academic and journalist with an enduring interest in law's troubled relationship with violence, Brooks wanted the kind of insider experience that would help her understand how police officers make sense of their world—and whether that world can be changed. In 2015, against the advice of everyone she knew, she applied to become a sworn, armed reserve police officer with the Washington, DC, Metropolitan Police Department. Then as now, police violence was constantly in the news. The Black Lives Matter movement was gaining momentum, protests wracked America's cities, and each day brought more stories of cruel, corrupt cops, police violence, and the racial disparities that mar our criminal justice system. Lines were being drawn, and people were taking sides. But as Brooks made her way through the police academy and began work as a patrol officer in the poorest, most crime-ridden neighborhoods of the nation's capital, she found a reality far more complex than the headlines suggested. In *Tangled Up in Blue*, Brooks recounts her experiences inside the usually closed world of policing. From street shootings and domestic violence calls to the behind-the-scenes police work during Donald Trump's 2016 presidential inauguration, Brooks presents a revelatory account of what it's like inside the "blue wall of silence." She issues an urgent call for new laws and institutions, and argues that in a nation increasingly divided by race, class, ethnicity, geography, and ideology, a truly transformative approach to policing requires us to move beyond sound bites, slogans, and stereotypes. An explosive and groundbreaking investigation, *Tangled Up in Blue* complicates matters rather than simplifies them, and gives pause both to those who think police can do no wrong—and those who think they can do no right.

A History of the Dublin Metropolitan Police and its Colonial Legacy John Wiley & Sons

The second edition was to be written in order to keep both reader and student current in incident management. This was grounded in the fact that incident management systems are continually developing. These updates are needed to ensure the most recent and relevant information is provided to the reader. While the overall theme of the book will remain the same of the first edition, research and research-based case studies will be used to support the need for utilizing emergency incident management systems. Contemporary research in the use (and non-use) of an incident management system provides clear and convincing evidence of successes and failures in managing emergencies. This research provides areas where first responders have misunderstood the scope and use of an emergency incident management system and what the outcomes were. Contemporary and historical (research-based) case studies in the United States and around the globe have shown the consequences of not using emergency incident management systems, including some that led to increased suffering and death rates. Research-based case studies from major incidents will be used to show the detrimental effects of not using or misunderstanding these principles. One of the more interesting chapters in the new edition is what incident management is used around the world.

As such, it is an essential guide for criminal and public law solicitors and barristers, law centres, CABs and PR firms.

Critical Perspectives on the Management and Organization of Emergency Services UNESCO Publishing

This Study, which covers 121 UNESCO Member States, represents a global benchmarking of journalistic source protection in the Digital Age. It focuses on developments during the period 2007-2015. The legal frameworks that support protection of journalistic sources, at international, regional and country levels, are under significant strain in 2015. They are increasingly at risk of erosion, restriction and compromise - a development that is seen to represent a direct challenge to the established universal human rights of freedom of expression and privacy, and one that especially may constitute a threat to the sustainability of investigative journalism. --Page 7.

"An essential addition to the bookshelf of any practitioner who has to consider information rights, however often. The book is the best kind of practitioner text: practical and clear, but also scholarly, thoughtful and analytical." (Sarah Hannett KC, *Judicial Review*) Retaining the position it has held since first publication, this is the 6th edition of the leading practitioner text on all aspects of information law. The latest edition includes a substantially enlarged set of chapters on appeals, enforcement, and remedies, as well as covering over 250 new judgments and decisions published since the last edition. Information Rights has been cited by the Supreme Court, Court of Appeal and the Tribunals, and is used by practitioners, judges and all those who practise in the field, including journalists. The new edition maintains its style of succinct statements of principle, supported by case law, legislative provisions, and statutory guidance. The work is divided into 2 volumes. Volume 1 is a 1,500-page commentary, with a comprehensive coverage of the data protection regime, freedom of information and environmental information law, as well as other rights of access to official information such as local government legislation and the Public Records Act. There is detailed coverage of appeal and regulatory procedures. Volume 2 comprises extensive annotated statutory material, including the DPA 2018, the UK GDPR, FOIA, Tribunal rules and statutory guidance. Contributors: James Findlay KC, Olivia Davies, John Fitzsimons, Richard Hanstock and Dr Christina Lienen (all of Cornerstone Barristers); Antony White KC, Sarah Hannett KC, Sara Mansoori KC and Aidan Wills (all of Matrix Chambers); Aidan Eardley KC and Clara Hamer (both of 5RB); Rupert Bowers KC and Martin Westgate KC (both of Doughty Street Chambers); Henry King KC and Bankim Thanki KC (both of Fountain Court Chambers); James Maurici KC and Jacqueline Lean (both of Landmark Chambers); Gemma White KC (Blackstone Chambers); Oliver Sanders KC (1 Crown Office Row); Saima Hanif KC (3VB); Jennifer Thelen (39 Essex Chambers); and Simon McKay (McKay Law).

Policing European Metropolises Oxford University Press

An important book from a tireless campaigner' Mishal Husain 'Sara Khan is a fearless and principled voice in the struggle for the soul of Islam. Everyone who cares about combatting prejudice should read her, befriend her and fight alongside her.' Nick Cohen Across Britain, Muslims are caught up in a battle over the very nature of their faith. And extremists appear to be gaining the upper hand. Sara Khan has spent the past decade campaigning for tolerance and equal rights within Muslim communities, and is now engaged in a new struggle for justice and understanding - the urgent need to counter Islamist-inspired extremism. In this timely and courageous book, Khan shows how previously antagonistic groups of fundamentalist Muslims have joined forces, creating pressures that British society has never before encountered. What is more, identity politics and the attitudes of both the far Right and ultra-Left have combined to give the Islamists ever-increasing power to spread their message. Unafraid to tackle some of the pressing issues of our time, Sara Khan addresses the question of how to break the cycle of extremism without alienating British Muslims. She calls for all Britons to reject divisive ideologies and introduces us to those individuals who are striving to build a safer future.
