Handbook of East Asian New Religious Movements BRILL

The Routledge Handbook of Arctic Security offers a comprehensive examination of security in the region, encompassing both state-based and militarized notions of security, as well as broader security perspectives reflecting debates about changes in climate, environment, economies, and societies. Since the turn of the century, the Arctic has increasingly been in the global spotlight, resulting in the often invoked idea of "Arctic exceptionalism" being questioned. At the same time, the unconventional political power which the Arctic's Indigenous peoples hold calls into question conventional ideas about geopolitics and security. This handbook examines security in this region, revealing contestations and complementarities between narrower, state-based and/or militarized notions of security and broader security perspectives reflecting concerns and debates about changes in climate, environment, economies, and societies. The volume is split into five thematic parts: • Theorizing Arctic Security • The Arctic Powers • Security in the Arctic through Governance • Non-Arctic States, Regional and International Organizations • People, States, and Security. This book will be of great interest to students of Arctic politics, global governance, geography, security studies, and International Relations.

Governing Complexity in the Arctic Region USPTO

This book presents the first in-depth analysis of the export of the EU electricity acquis, through the imposition of an EU-type regional electricity market (REM) in SEE within the enlargement process. Among other germane issues, the author discusses the following: the suitability of the European model of electricity markets' liberalization for economies in transition; the use of the Public Services Obligations (PSO) to address the impact of electricity markets liberalization; the use of regulated prices and measures for granting priority rights for cross-border capacity allocation as PSOs; the Court of Justice judgement in

Federutility on the sustainability of states' protection of their different types of customers, including the large businesses; the Energy Community as a step towards a Pan-European Energy Community; the effect of simultaneous national electricity markets liberalization and cross-border regional integration of national electricity markets; and, the interplay between liberalization policy and reforms and the regulatory tools available to address their impact on provision of public services. The author's proposed rethinking of the public services obligation offers new views on using this tool more effectively and proposes possibilities for its practical implementation through measures such as energy efficiency, allocation of interconnectors' capacity, transparency, addressing the affordability issue and the protection of vulnerable customers. The book is remarkable for its clear analysis of the policy lessons arising from the export of the idea of liberalized energy markets, and will be welcomed by practitioners, officials, academics and others in energy law and policy for its informative and forward-looking overview of the national and cross-border reforms in the Energy Community framework.

Routledge Handbook of International Environmental Law State University of New York Press

Presents the intellectual world of early medieval Sichuan through a critical biography of historian and classicist Qiao Zhou.

Fundamentals of Software Engineering Frontiers Media SA

Bringing together leading scholars from across a diverse range of disciplines, this unique book examines a key question: How can we best conserve marine living resources in the polar regions, where climate change effects and human activities are particularly pressing?

Three Kingdoms, A Historical Novel Springer

This book is based on presentations from the Conference 'Arctic Marine Resource Governance' held in Reykjavik Iceland in October 2015. The book is divided into four main themes: 1. Global management and institutions for Arctic marine resources 2. Resource stewards and users:

local and indigenous co-management 3. Governance gaps in Arctic marine resource management and 4. Multi-scale, ecosystem-based, Arctic marine resource management'. The ecosystem changes underway in the Arctic region are expected to have significant impacts on living resources in both the short and long run, and current actions and policies adopted over such resource governance will have serious and ultimately irreversible consequences in the near and long terms.

Three Kingdoms Routledge

Wu Tingfang (1842-1922) was a contemporary of Li Hongzhang, Yuan Shikai, Hei and Sun Yixian (Sun Yat-sen), all of whom were involved in China's attempt at reform and modernization in the late 19th and early 20th centuries. During his time, Wu was a prominent political figure, participating actively in public service and political activities in Hong Kong, Shanghai and Guangzhou. This book is a biography of Wu, and sheds considerable light on a crucial period in Chinese history.

Sweet Wedding and Pampering Love BRILL

This book constitutes the thoroughly refereed post-conference proceedings of the Fourth International Conference on Fundamentals of Software Engineering, FSEN 2011, held in Tehran, Iran, in April 2011. The 19 revised full papers and 5 revised short papers presented together with 3 poster presentations were carefully reviewed and selected from 64 submissions. The papers are organized in topical section on models of programs and systems, software specification, validation and verification, software architectures and their description languages, object and multi-agent systems, CASE tools and tool integration, model checking and theorem proving, and Integration of different formal methods.

Encyclopedia of New Religions

Routledge

She was an arrogant young lady who had been deprived of the warmth of her family since she was a child and longed for affection; he was a kind young mafia lord, but he had killed his beloved woman and made her afraid of love; by a coincidence,

she had become the tutor of his son; he had doted on her as a eldest daughter, and made her happy, took care of her illness, and fought for her inheritance; she had always thought that he was the best person in the world for her; but in the end she had discovered how cruel he was to her, and he had spoiled her so much that the world thought he liked her, but he had said, I think of you only as a daughter. And it was only when the other men took her hand did he come to realize that I have not married in so many years because I was waiting for you to grow up ...

Emerging Legal Orders in the Arctic
AuthorHouse

This book examines what counts regarding the role and conceptualization of regions in world politics. It presents a fresh look at which narratives awake, persist, fall dormant or re-emerge amidst diverse interlocking processes of environmental, technological and global political changes. It puts forward a thorough and multidimensional conceptualization of regions as embedded in changing, overlapping environments, and requires more attention to regions' shifting materiality, temporality and technological underpinnings. Combing the approaches, questions and analyses of Critical IR and Political Geography, it calls for a renewed emphasis on the puzzle of how the contextual environment of regions may become more (or less) multidimensional, or how some aspects of a region's contextual environment may be mutually constitutive in non-intuitive ways. Ultimately, it sheds light on the politics of regions and the regional scale in international politics in order to overcome the often-underlying territorial fixity of territory and space within IR approaches. This book will be of key interest to scholars and students of international relations, international political sociology, political geography, regionalism, geopolitics and area studies.

Central Africa Kluwer Law International B.V.

This book explores the growing interests of China in the Arctic and examines the nature of its interests and motivations in maintaining its involvement and presence in the region. The new geopolitical landscape of the Arctic today is a significant departure from the great power politics that existed in the region during the Cold War era. Apart from traditional Arctic states, more and more international organizations and non-Arctic states are showing an increased interest in this region, not least China. Many have attempted to interpret China's intention in moving to the high north and this book

aims to add to the existing literature from three approaches: China's participation in the international institutions, China's relationships with the Arctic stakeholders and China's sectoral engagement in the Arctic. In taking a three-dimensional approach to the analysis, the author builds a comprehensive picture of China's interests and activities in the Arctic, not only from the perspective of China but also from the viewpoint of other Arctic states (Russia, Canada, the U.S., Norway, Sweden, Denmark, Finland and Iceland). One of the first books in English to cover the subject since the release of China's Arctic policy white paper in January 2018, this analysis will be of interest to academics, students of Arctic studies, maritime law and international law, as well as policy makers in Arctic and non-Arctic states.

Central Nervous System Metastases in Lung Cancer Patients: From Prevention to Diagnosis and Treatment Fundacion BBVA
Ocean Law Debates: The 50-Year Legacy and Emerging Issues for the Years Ahead offers historical perspectives on the ocean-law debates of the 1960s and after, leading to the signing of UNCLOS in 1982, along with perceptive analyses of various key current-day issues, including climate change, biodiversity in the Area Beyond National Jurisdiction, seabed mining, genetic prospecting, and the geopolitics of Marine Protected Areas.

The 21st Century Maritime Silk Road
Frontiers Media SA

More than ever before the changing environmental and political landscape in the Arctic requires stability and foreseeability based on resilient common norms. The emerging legal orders in the Arctic cannot be legitimately created or effectively implemented unless all relevant actors are involved. Simultaneously, it must always be based on respect for the sovereign rights of the eight Arctic states in the region, as well as the tradition and cultural livelihood of the local communities. It is this delicate balance between Arctic and non-Arctic interests that is the core problématique for the emerging legal orders in the Arctic. *Emerging Legal Orders in the Arctic* critically examines the role of non-Arctic actors in this advancement of the shape and scope of the Arctic legal order. Discussing the admittance and participation of Observer states and organisations in the Arctic Council, including task force meetings where new treaties are negotiated, it details the issues and successes this can result in. Setting up the context of the current legal orders in the Arctic, the book discusses

Asian, indigenous and European perspectives, amongst others. There is a strong focus on the groundbreaking fisheries agreement of November 2017 in the Central Arctic Ocean (CAO), and the impact on both Arctic and non-Arctic actors. Interests in marine living resources, scientific cooperation and the Arctic shipping regimes and governance are also thoroughly discussed from multiple perspectives. The book combines the expertise of academics and practitioners in the fields of international law and Arctic governance, uniquely focusing on Asian actors in the Arctic legal order-making. The resulting study is a fascinating insight into the interplay between non-Arctic actors and the Arctic legal order, and will be invaluable to academics in the field of Arctic and international law.

The Ocean and Cryosphere in a Changing Climate Lion Books

The Handbook of East Asian New Religious Movements is the first comprehensive reference work to explore major new religious actors and trajectories of the East Asian region (China/Taiwan, Korea, Japan, and Vietnam).

Research Handbook on Climate Change, Oceans and Coasts Routledge

This topical Research Handbook examines the legal intersections of climate change, oceans and coasts across multiple scales and sectors, covering different geographies and regions. With expert contributions from Europe, Australasia, the Pacific, North America and Asia, it includes insightful chapters on issues ranging across the impacts of climate change on marine and coastal environments. It assesses institutional responses to climate change in ocean and marine governance regimes, adaptation to climate impacts on ocean and coastal systems and communities, and climate change mitigation in marine and coastal environments. Through a plurality of voices, disciplinary and geographical perspectives, this Research Handbook explores cross-cutting themes of institutional complexity, fragmentation, scale and design trade-offs.

Governing Marine Living Resources in the Polar Regions Bloomsbury Publishing

"A material epic with an astonishing fidelity to history."—New York Times Book Review
Three Kingdoms tells the story of the fateful last reign of the Han dynasty (206 B.C.–A.D. 220), when the Chinese empire was divided into three warring kingdoms. Writing some twelve hundred years later, the Ming author Luo Guanzhong drew on histories, dramas, and

poems portraying the crisis to fashion a sophisticated, compelling narrative that has become the Chinese national epic. This abridged edition captures the novel's intimate and unsparing view of how power is wielded, how diplomacy is conducted, and how wars are planned and fought. As important for Chinese culture as the Homeric epics have been for the West, this Ming dynasty masterpiece continues to be widely influential in China, Korea, Japan, and Vietnam and remains a great work of world literature.

China's Role in the Arctic The Stationery Office

"The Three Kingdoms gives us The Iliad of China. First of the five great works of traditional prose fiction, this master narrative transforms history into epic and has thereby educated and entertained readers of five centuries with unforgettable exemplars of martial and civic virtue, of personal fidelity and political treachery. Moss Roberts's translation, the first complete rendering in English, is one of surpassing excellence and impeccable scholarship. It should delight and captivate Western readers for many more years to come."—Anthony C. Yu, University of Chicago

Three Kingdoms and Chinese Culture State

Reflections on the UN Declaration on the Rights of Indigenous Peoples BRILL

This book offers a systematic and comprehensive introduction to the Arctic in the era of globalization, or as it is referred to here, the 'GlobalArctic'. It provides an overview of the current status of the Arctic as a result of global change, while also considering the changes in the Arctic that have a global effect. It positions the Arctic within a broad international context, it addresses four main themes are discussed: economics and resources; environment and earth system dynamics; peoples and cultures; and geopolitics and

governance. Gathering together expert authors and building on long-term research activities, it serves as a valuable reference for future research endeavors.

This lively and readable survey introduces students to key areas of the field and shows how to apply an anthropological approach to the study of contemporary world religions. Written by an experienced teacher, it covers all of the traditional topics of anthropology of religion, including definitions and theories, beliefs, symbols and language, and ritual and myth, and combines analytic and conceptual discussion with up-to-date ethnography and theory. Eller includes copious examples from religions around the world – both familiar and unfamiliar – and two mini-case studies in each chapter. He also explores classic and contemporary anthropological contributions to important but often overlooked issues such as violence and fundamentalism, morality, secularization, religion in America, and new religious movements. Introducing Anthropology of Religion demonstrates that anthropology is both relevant and essential for understanding the world we inhabit today.
