Learn how to translate an executable model of your application into running code. This is not a book about theory, good intentions or possible future developments. You'll benefit from translation technology and solid software engineering principles that are demonstrated with concrete examples using an open source tool chain. Models don't deliver enough value if they are not on a direct path to code production. But to waste time building models that are merely pictures of your code doesn't add much value either. In this book, you'll translate detailed, yet platform-independent models that solve real application problems. Using a pragmatic approach, Models to Code quickly dives into two case studies of Executable UML models. The models and code are extensively annotated and illustrate key principles that are emphasized throughout the book. You'll work with code production using "C" as the implementation language and targeting

microcomputer class processors. This might not be your particular target language or platform, but you can use you can use what you learn here to engineer or re-evaluate your own code translation system to dramatically increase the value of both your modeling and code generation solution. Written by three leading experts, Models to Code is an exceptional resource for producing software by model translation— add it to your library today. What You'll Learn See how detailed models resolve ambiguity and contradiction common in requirements. Examine how a model can be detailed enough to be executable and testable while remaining platform independent Produce code from a model, leaving the model intact so it can be redeployed on new platforms or adapted to changing software and hardware technology. Implement platform independent model execution rules in platform specific run-time code Who This Book Is For Modelers and systems engineers on active MBSE projects (using Executable UML or not), projects using Simulink, Matlab, Dymola, MatrixX and other math modelling tools. Any developers with current or past model experience, professors, students, systems engineers, embedded systems developers, or anyone interested in learning more about software modelling. **Directory of Human Services for San**

So what is evil? What makes a person a "villain?" Is it intent to harm...or is it something deeper than that? Each one of the thirteen authors in this amazing collection has taken a completely different approach to answering this question. They have gone above and

beyond expressing the idea of evil and supervillainy. They get to the bottom of why villains are the way they are, and what they hope to gain from it. These are dangerous women wielding Absolute Power... and they'll be glad to let you know exactly why you should fear them.

"Sexual assault continues to be a pervasive problem, both for society in general and within the military community. To assist the Air Force in its continued efforts to combat sexual assault within its ranks, we reviewed the existing empirical literature on the characteristics and behaviors of adult perpetrators who commit sexual assault against other adults. Our search was not limited to studies of military populations. While a vast majority of the existing literature has focused on sole male perpetrators who assault female victims, we identified some research on other types of perpetrators, including female sexual assault perpetrators, men who perpetrate assault against other men, and perpetrators who participate in group sexual assault. This body of research indicates that adult perpetrators are diverse in terms of their demographics, background characteristics, and motivations.

Moreover, research indicates that sexual assault perpetration is likely influenced by a combination of factors, including an individual's developmental and family history; his or her personality, including attitudes/cognitions; and environmental factors, including peer attitudes and alcohol consumption. The complexity of factors that influence sexual assault perpetration and the multiple pathways that lead to an attack make it difficult to predict whether an individual is prone to commit sexual assault. While predicting

sexual assault perpetration is problematic, we identified a number of factors related to perpetration that may be relevant for intervention efforts and offer recommendations for the Air Force"--Publisher's web site.

 "Powerful and important . . . an instant classic." —The Washington Post Book World The award-winning look at an ugly aspect of American racism by the bestselling author of *Lies My Teacher Told Me*, reissued with a new preface by the author In this groundbreaking work, sociologist James W. Loewen, author of the classic bestseller *Lies My Teacher Told Me*, brings to light decades of hidden racial exclusion in America. In a provocative, sweeping analysis of American residential patterns, Loewen uncovers the thousands of "sundown towns"—almost exclusively white towns where it was an unspoken rule that blacks weren't welcome—that cropped up throughout the twentieth century, most of them located outside of the South. Written with Loewen's trademark honesty and thoroughness, *Sundown Towns* won the Gustavus Myers Outstanding Book Award, received starred reviews in *Publishers Weekly* and *Booklist*, and launched a nationwide online effort to track down and catalog sundown towns across America. In a new preface, Loewen puts this history in the context of current controversies around white supremacy and the Black Lives Matter movement. He revisits sundown towns and finds the number way down, but with notable exceptions in exclusive all-white suburbs such as Kenilworth, Illinois, which as of 2010 had not a single black household. And, although many former sundown towns are now integrated, they often face "second-generation sundown town issues," such

as in Ferguson, Missouri, a former sundown town that is now majority black, but with a majority-white police force.

Throughout her career, Toni Tipton-Martin has shed new light on the history, breadth, and depth of African American

cuisine. She's introduced us to black

cooks, some long forgotten, who

established much of what's considered

to be our national cuisine. After all, if

Thomas Jefferson introduced French

haute cuisine to this country, who do you

think actually cooked it? In *Jubilee*,

Tipton-Martin brings these masters into

our kitchens. Through recipes and

stories, we cook along with these

pioneering figures, from enslaved chefs

to middle- and upper-class writers and

entrepreneurs. With more than 100

recipes, from classics such as Sweet

Potato Biscuits, Seafood Gumbo,

Buttermilk Fried Chicken, and Pecan Pie

with Bourbon to lesser-known but even

more decadent dishes like Bourbon &

Apple Hot Toddies, Spoon Bread, and

Baked Ham Glazed with Champagne,

*Jubilee* presents techniques, ingredients,

and dishes that show the roots of African

American cooking—deeply beautiful,

culturally diverse, fit for celebration.

Praise for *Jubilee* "There are precious few

feelings as nice as one that comes from falling in love with a cookbook. . . . This great gift book combines wonderful stories and paintings from a writer/lawyer/artist and San Clemente resident/fisherman who loves its pier. His stories get better each time you read them. This outstanding gift book has six sections: 1. Pier and Pier Pals: pier incidents and pals; 2. The Search: observations of life by an old fisherman; 3. Politics: reflections of a politically savvy former public official; 4. Changing Times: noted changes by the passage of time; 5. Family: its importance; 6. Among Anglers: memorable fishing tales. Each section reveals the extraordinary talents of the artist/writer. Sillas is a native of Los Angeles and a former scholarship holder at the Otis Art Institute of Los Angeles. He put his art career on hold while attending UCLA to pursue a legal career. During the 1960s he defended Chicano activists and entered the political arena. In 1975 Governor Jerry Brown appointed Sillas to serve as the Director of DMV. President Jimmy Carter then appointed Sillas as United States Attorney for the Eastern District of California. He continued to paint and returned to the private practice of law in 1980. Sillas' move to San Clemente introduced him to the San Clemente pier. The openness and freedom he experienced there inspired him to write a monthly column he called

a "View from the Pier." As an award winning painter, Sillas' art work has been described as "pictorial memories of a witness to social change." His writings convey more than that. He loves the pier and its gift of peacefulness, as he explores his cultural roots using an inquisitive attorney's mind, experienced eyes, and a pen that conveys emotion. Once you have read this gift book, you will no longer think of a pier as a walkway above the waves. It becomes a pathway of inspiration.
