THE YOUNGER SONS' BALL. The " Younger Sons" celebrated their fortnightly ball that evening in the dining-room of the Colonnade House; the only suggestion of a Colonnade in connection with the house

being the row of hitching-posts embedded in the dried mud of the street before it. The " Younger Sons" was a select bachelor club, of the highest social aspirations. The sons were not all in their first youth. Some of them, it is to be feared, had known moments which were not those of aspiration; but, as sons go, they represented a tolerable filial average. There might have been

something deprecatory in the modest title they had chosen; at all events, they had found favor with the indulgent mothers of the camp, who accepted their invitations, and danced with them at the fortnightly ball, with the assumed approbation of the fathers. Hilgard could have been a " Younger Son" had he desired. He had complimentary tickets sent him for the dances, for which unusual attention he

was indebted to feminine, if not to maternal, influence. Men were at a discount on these occasions. They stood about in one another's way, and trod on one another's toes, against the wall, in a dreary, superfluous manner, which would have touched the sympathies of women not already overburdened with masculine claimants for them. Hilgard, having been gratuitously chosen as an

object of feminine sympathy, would doubtless not have been sent to the wall; but heretofore he had been an unresponsive and ungrateful object. He had given away his ball-tickets, and his dress-suit had remained folded in the bottom of his trunk. Tonight, however, at half-past nine o'clock, a visitor who stepped in out of the fresh night-air found him sitting at his office-desk, in full

Petroleum and Gas By A.R. XVI-An Agent of Death XVII-An Inflammable Subject XVIII-Early Mention of American Petroleum XIX-Getting Oil and Gas Lands XX-Men, Good and Bad XXI-Random Incidents of Interest XXII-Memorials and Projects XXIII-A Few Facts and Figures Preface The Petroleum and Natural Gas Industry is a mining business. Its development has been attended by all the excitement incident to mining camps

and the usual camp followers. In every branch, production, transportation and manufacture, it has presented the great hazards that test brave hearts and mould strong characters. It has created a race of men capable of meeting any emergency and ready for any achievement. Inevitably the story of such an industry is romance. The term here does not denote fiction for the truth of

petroleum and natural gas is more exciting than imaginary scenes. The aim in these pages has been to preserve the truth and to tell the tale without the intrusion of the dry detail of a statistical or technical work. There has been no attempt to paint the lily or to gild refined gold. There is so much rich material in the origin and growth of the petroleum industry that it is wholly unnecessary to draw on the

imagination for color. This is not a history, because it omits minutiae inseparable from a continuous record. It is just the romance of petroleum and natural gas, and some account of the human factors who have made the history of the business. It trails no other book, nor does it bar the way of any that may follow. It takes its own path into a fascinating field of romance in

craftsmen who laid out the text, often by hand, of each and every page you will read. Their subtle art involving judgment and interaction with the text is in many ways superior and more human than the mechanical methods utilized today, and gave each book a unique, hand-crafted feel in its text that connected the reader organically to the art of bindery and book-making. We think

these benefits are worth the occasional imperfection resulting from the age of these books at the time of scanning, and their vintage feel provides a connection to the past that goes beyond the mere words of the text.

Excerpt: ...original company had been employed and consumed; and the faculty and power to create 700 other free shares, without which resource and assistance it would have been impossible for him to have proceeded further with the working and development

of the mines. These 700 new shares were to be issued, in the first place, if they elected to take them, to the original shareholders, and if not, then Tiquet was to be free to seek new subscribers (clause 8). Of this new "asiento" it will be sufficient to observe that the thirteen clauses composing it set out in full detail the history of the previous transactions between the Crown and Wolters--

already related in substance. Amongst these new shareholders and associates with Tiquet the man destined to rediscover practically the vast wealth so many centuries hidden from the light of day, and almost entirely forgotten, to found that colony of miners, to develop those works, to establish on a firm basis that industry which to-day is still in progress, to exhume, in

fact, the mummified and rigid body of the mining industry, and to reanimate and rejuvenate it with the breath and force of his zeal and intelligence, was fated to appear. This veritable reformer of the condition of things in this part of Spain was one Francisco Tomas Sanz, whom tradition describes as "from Valencia," where he had occupied a humble place in the world's

<p>affairs, and whom caprice or Providence had directed to Rio Tinto to offer his limited fortune to assist Tiquet, and also aid him with the not inconsequential co-operation of his abilities. Promptly the lessee recognized the worth of his new associate, seeing him attend to all parts of the works with unceasing activity, and observing the correct impulses... <i>Author-catalogue of</i></p>	<p><i>printed books in European languages.
