Japan's post-war armed forces are a paradox, both embarrassing remnants of the past and valuable repositories of experience. This book charts the development of the Japan Self-Defense Forces (JSDF) from 1954 as both unorthodox military institutions and servants of a civil society that decries militarism. Investigating JSDF contributions to Japanese and global security, the evolution of such contributions during and after the Cold War, and their possible reconfiguration for Japan's security needs ahead, Garren Mulloy offers insight into

the Forces' past, present and future. He explores the characteristics and contradictions of Japanese policy, including novel approaches in response to an increasingly assertive China, the latent threat of North Korea and contributory pressure from the US. Though the American alliance remains the core of Japanese security, new partnerships and international overtures will also shape the Forces' place in Prime Minister Abe's new vision of 'proactive contributions to peace'. Defenders of Japan deconstructs how the JSDF have adapted and will continue to adapt within domestic norms, caught between unresolved legacies of Japan's imperial past and a dynamically shifting balance of future global power. More than one-half million people of Korean descent reside in Japan today—the largest ethnic minority in a country often assumed to be homogeneous. This timely, interdisciplinary volume blends original empirical research with the vibrant field of diaspora studies to understand the complicated history, identity, and status of the Korean minority in Japan. An international group of scholars explores commonalities and contradictions in the Korean diasporic experience, touching on such issues as citizenship and belonging, the personal and the political, and homeland and hostland.

The modern histories of China and Japan are inexorably intertwined. Their relationship is perhaps most obvious in the fields of political, economic, and military history, but it is no less true in cultural and art history. Yet the traffic in artistic practices and practitioners between China and Japan remains an understudied field. In this volume, an international group of scholars investigates Japan's impact on Chinese art from the mid-nineteenth century through the 1930s. Individual essays address a range of perspectives, including the work of individual Chinese and Japanese painters, calligraphers, and sculptors, as well as artistic associations, international exhibitions, the colotype production or artwork, and the emergence of a modern canon.

In 2016 Scottish writer Iain Maloney and his Japanese wife Minori moved to a village in rural Japan. This is the story of his attempt to fit in, be accepted and fulfil his duties as a member of the community, despite being the only foreigner in the village. Even after more than a decade

living in Japan and learning the language, life in the countryside was a culture shock. Due to increasing numbers of young people moving to the cities in search of work, there are fewer rural residents under the retirement age - and they have two things in abundance: time and curiosity. Iain's attempts at amateur farming, basic gardening and DIY are conducted under the watchful eye of his neighbours and wife. But curtain twitching is the least of his problems. The threat of potential missile strikes and earthquakes is nothing compared to the venomous snakes, terrifying centipedes and bees the size of small birds that stalk Iain's garden. Told with self-deprecating humour, this memoir gives a fascinating insight into a side of Japan rarely seen and affirms the positive benefits of immigration for the individual and the community. It's not always easy being the only gaijin in the village.

Doing Fieldwork in Japan taps the expertise of North American and European specialists on the practicalities of conducting long-term research in the

social sciences and cultural studies. In lively first-person accounts, they discuss their successes and failures doing fieldwork across rural and urban Japan in a wide range of settings: among religious pilgrims and adolescent consumers; on factory assembly lines and in high schools and wholesale seafood markets; with bureaucrats in charge of defense, foreign aid, and social welfare policy; inside radical political movements; among adherents of "New Religions"; inside a prosecutor's office and the JET Program for foreign English teachers; with journalists in the NHK newsroom; while researching race, ethnicity, and migration; and amidst fans and consumers of contemporary popular culture. In Search of Our Frontier explores the complex transnational history of Japanese immigrant settler colonialism, which linked Japanese America with Japan's colonial empire through the exchange of migrant bodies, expansionist ideas, colonial expertise, and capital in the Asia-Pacific basin before World War II. The trajectories of Japanese transpacific migrants exemplified a prevalent national structure of thought and practice that not only functioned to shore up the backbone of Japan's empire building but also promoted the borderless quest for Japanese overseas development. Eiichiro Azuma offers new interpretive perspectives that will allow readers to understand Japanese settler colonialism's capacity to operate outside the aegis of the home empire.

In recent decades, many countries have experienced both a rapid increase of in-migration of foreign nationals and a large-scale devolution of governance to the local level. The result has been new government policies to promote the social inclusion of recently arrived residents. In *New Policies for New Residents*, Deborah J. Milly focuses on the intersection of these

trends in Japan. Despite the country's history of restrictive immigration policies, some Japanese favor a more accepting approach to immigrants. Policies supportive of foreign residents could help attract immigrants as the country adjusts to labor market conditions and a looming demographic crisis. As well, local citizen engagement is producing more inclusive approaches to community. Milly compares the policy discussions and outcomes in Japan with those in South Korea and in two similarly challenged Mediterranean nations, Italy and Spain. All four are recent countries of immigration, and all undertook major policy innovations for immigrants by the 2000s. In Japan and Spain, local NGO-local government collaboration has influenced national policy through the advocacy of local governments. South Korea and Italy included NGO advocates as policy actors and partners at the national level far earlier as they responded to new immigration, producing policy changes that fueled local networks of governance and advocacy. In all these cases, Milly finds, nongovernmental advocacy groups have the power to shape local governance

and affect national policy, though in different ways.

While growing older is inevitable, many of the troubles we associate with aging--including dementia, disability, and an increased dependence on others--are not. The choices we make now can help us to maintain our vitality, a sharp mind, and our independence as we age. Filled with simple, everyday actions we can take to avoid disease, promote vitality, and prevent dementia and late onset Alzheimer's, *The Aging Brain* is an easy-to-use guide to maintaining brain and body health throughout our lives. Based on solid, up-to-date scientific research, the

interventions explained in this book not only prevent progression toward dementia even in those who have already shown mild cognitive impairment, they also reduce disability and depression and keep people living independently longer than those who do not practice these methods. For anyone hoping to slow the aging process, as well as anyone who acts as a caregiver to someone at risk of or already beginning to suffer from dementia and other age-related diseases, this book offers a hopeful, healthy way forward.
