Il volume 30 di

«Archeologia e
Calcolatori» si apre con
un inserto speciale,
dedicato al trentennale
della rivista. Alle
introduzioni di F.
Djindjian e di P.
Moscato, che delineano
un quadro
dell'informatica

archeologica nel suo divenire, seguono gli articoli dei membri del Comitato di Redazione, a testimoniare l'attività di ricerca e di sperimentazione che ha caratterizzato il cammino editoriale della rivista, e il contributo di una giovane laureata dell'Università Bocconi, che ha lavorato a stretto contatto con il team di «Archeologia e Calcolatori». Nella parte centrale sono pubblicati gli articoli proposti annualmente dagli autori. Ne emerge un quadro che rappresenta gli aspetti applicativi più qualificanti dell'informatica archeologica (le banche dati, i GIS, le analisi statistiche, i sistemi multimediali), ma che guarda oggi con sempre maggiore

interesse agli strumenti di visualizzazione scientifica e di comunicazione delle conoscenze. Il volume si chiude con gli Atti del XII Workshop ArcheoFOSS (Free, Libre and Open Source Software e Open Format nei processi di ricerca archeologica), un'iniziativa lodevole, nata nel 2006, cui si è più volte dato spazio nelle pagine della rivista.

Legends and Superstitions of the Sea and of Sailors in All Lands and at All Times
Rowman & Littlefield
This book makes accessible the major structural features of the dialects of Italy and emphasises the importance of a detailed understanding of the dialects for issues in general

linguistic theory.
Selected contents
include: * Phonology *
Morphology * Syntax *
Lexis * The Dialect
Areas * Sociolinguistics
of Dialects

Lingua nostra Actar
The city is more than
demography and
architecture, it is a
state of mind. Various
groups, scenes and
subcultures, widely
known as "man in the
street", shape and are
shaped by urban space
and its history
according to
imaginings,

nightmares and dreams. Urban anthropologists get immersed in this closely knit fabric of urban culture and conduct field research with all their senses. The reader provides a compact introduction into urban anthropology, which has become the key discipline in exploring cities and city live as sites of encounter, conflict and sensation. It introduces the most influential writers in the field as well as young and upcoming field researchers. With essays by Peter Jackson, Les Back, Ruth Behar, Moritz Ege, Rolf Lindner, Mirko Zardini, Margarethe Kusenbach, Loic Wacquant.

The Dialects of Italy
All'Insegna del Giglio

This book explores how

the Medici Grand Dukes pursued ways to expand their political, commercial, and cultural networks beyond Europe, cultivating complex relations with the Ottoman Empire and other Islamicate regions, and looking further east to India, China, and Japan. The chapters in this volume discuss how casting a global, cross-cultural net was part and parcel of the Medicean political vision. Diplomatic gifts, items of commercial exchange, objects looted at war, maritime connections, and political plots were an inherent part of how the Medici projected their state on the global arena. The eleven chapters of this volume demonstrate that the mobility of

objects, people, and knowledge that generated the global interactions analyzed here was not unidirectional—rather, it went both to and from Tuscany. In addition, by exploring evidence of objects produced in Tuscany for Asian markets, this book reveals hitherto neglected histories of how Western cultures projected themselves eastwards.

In Defiance of Painting

"Every year between 250 000 and 500 000 people suffer a spinal cord injury, with road traffic crashes, falls and violence as the three leading causes. People with spinal cord injury are two to five times more likely to die prematurely. They also have lower rates of

school enrollment and economic participation than people without such injuries. Spinal cord injury has costly consequences for the individual and society, but it is preventable, survivable and need not preclude good health and social inclusion. Ensuring an adequate medical and rehabilitation response, followed by supportive services and accessible environments, can help minimize the disruption to people with spinal cord injury and their families. The aims of International perspectives on spinal cord injury are to: --- assemble and summarize information on spinal cord injury, in particular the epidemiology, services, interventions and policies that are relevant, together with

the lived experience of people with spinal cord injury; ---make recommendations for actions based on this evidence that are consistent with the aspirations for people with disabilities as expressed in the Convention on the Rights of Persons with Disabilities.

Grammatical Theory and Philosophy of Language in Antiquity
Routledge

This volume collects original theoretical work on the syntax and morphology of Italian and a wide range of Italian dialects. It contains contributions by such leading figures as Cecilia Poletto, Guglielmo Cinque, and Richard Kayne, and examines topics such as the syntax of "ne", the internal structure of personal pronouns,

the syntax/morphology interface, and functional projections at the clausal level.

Despite intermittent turbulence and destruction, much of the Roman West came under barbarian control in an orderly fashion. Goths, Burgundians, and other aliens were accommodated within the provinces without disrupting the settled population or overturning the patterns of landownership. Walter Goffart examines these arrangements and

shows that they were based on the procedures of Roman taxation, rather than on those of military billeting (the so-called hospitalitas system), as has long been thought. Resident proprietors could be left in undisturbed possession of their lands because the proceeds of taxation, rather than land itself, were awarded to the barbarian troops and their leaders.

What is a Romance language? How is one Romance language related to others? How

did they all evolve? And what can they tell us about language in general? In this comprehensive survey Rebecca Posner, a distinguished Romance specialist, examines this group of languages from a wide variety of perspectives. Her analysis combines philological expertise with insights drawn from modern theoretical linguistics, both synchronic and diachronic. She relates linguistic features to historical and sociological factors, and teases out those elements which can be attributed to divergence from a common source and those which indicate convergence towards a common aim. Her discussion is extensively illustrated with new and original

data, and an up-to-date and comprehensive bibliography is included. This volume will be an invaluable and authoritative guide for students and specialists alike.

Alderdene Routledge

A term with myriad associations, revolution is commonly understood in its intellectual, historical, and sociopolitical contexts. Until now, almost no attention has been paid to revolution and questions of geography. *Geography and Revolution* examines the ways that place and space matter in a variety of revolutionary situations. David N. Livingstone and Charles W. J. Withers assemble a set of essays that are

themselves revolutionary in uncovering not only the geography of revolutions but the role of geography in revolutions. Here, scientific revolutions—Copernican, Newtonian, and Darwinian—ordinarily thought of as placeless, are revealed to be rooted in specific sites and spaces. Technical revolutions—the advent of print, time-keeping, and photography—emerge as inventions that transformed the world's order without homogenizing it. Political revolutions—in France, England, Germany, and the United States—are notable for their debates on the nature of political institutions and national identity.

Gathering insight from geographers, historians, and historians of science, Geography and Revolution is an invitation to take the where as seriously as the who and the when in examining the nature, shape, and location of revolutions.

The invention of collage by Picasso and Braque in 1912 proved to be a dramatic turning point in the development of Cubism and Futurism and ultimately one of the most significant innovations in twentieth-century art. Collage has traditionally been

viewed as a new expression of modernism, one allied with modernism's search for purity of means, anti-illusionism, unity, and autonomy of form. This book - the first comprehensive study of collage and its relation to modernism - challenges this view. Christine Poggi argues that collage did not become a new language of modernism but a new language with which to critique modernism. She focuses on the ways Cubist collage - and the Futurist multimedia work that was inspired by it - undermined prevailing notions of material and stylistic unity, subverted the role of the frame and pictorial ground, and brought the languages of high and low culture into a

new relationship of exchange.

Art, Mobility, and Exchange in Early Modern Tuscany and Eurasia

Cambridge University Press

It is Christmas Eve.

Sitting on the steps of the village church, a father and son exchange stories. The father speaks of life as an emigrant from Italy, in perpetual limbo between his departure and return home. The son tells of an idyllic childhood spent in a vivid, enchanting land marred only by his father's long absences.

Each hides an awful secret concerning the fate of a mysterious man whose affair with the boy's older sister changed their lives. On this night of nights, as the long-buried details seep through each man's story, a shared

truth will finally emerge.

The Romance

Languages Oxford

University Press on Demand

The Rhaeto-Romance languages have been known as such to the linguistic community since the pioneering studies of Ascoli and Gartner over a century ago. There has never been a community of RR speakers based on a common history or polity and the various dialects are mutually unintelligible, but a unity, based on a number of common features, has been advanced. This book is the first general description of the Rhaeto-Romance languages to be written in English. It provides a critical examination of the phonology,

morphology, lexicon, and syntax of the modern Rhaeto-Romance dialects within the broader perspective of Romance comparative linguistics.

Archeologia e Calcolatori, 30, 2019

World Health Organization
Liberating Literature is, primarily, a bold and revealing book about feminist writers, readers, and texts. But it is also much more than that. Within this volume Maria Lauret manages to look with fresh vision at the American Civil Rights movement of the 1960s; socialist women's writing of the 1930s; the emergence of the New Left; and the second wave women's movement and its cultural practices. Lauret's

historicisation of feminist political writing allows for a new definition of the genre, and enables her to illuminate the profound influence and importance of African-American women's writing. Well-grounded historically and theoretically, *Liberating Literature* speaks about and to a political and cultural tradition, and offers stunning new readings of both familiar and neglected novels within the feminist canon. Reader and students of feminist fiction cannot afford to be without this major new work.
