BYRON AUGUST

Time Travel Bantam Books

Contains the entire crew of Apollo 11's personal observations upon returning to earth.

Cold War Germany, the Third World, and the Global Humanitarian Regime Timothy Mean and the Time Mach

Every age has characteristic inventions that change the world. In the 19th century it was the steam engine and the train. For the 20th, electric and gasoline power, aircraft, nuclear weapons, even ventures into space. Today, the planet is awash with electronic business, chatter and virtual-reality entertainment so brilliant that the division between real and simulated is hard to discern. But one new idea from the 19th century has failed, so far, to enter reality—time travel, using machines to turn the time dimension into a two-way highway. Will it come true, as foreseen in science fiction? Might we expect visits to and from the future, sooner than from space? That is the Time Machine Hypothesis, examined here by futurist Damien Broderick, an award-winning writer and theorist of the genre of the future. Broderick homes in on the topic through the lens of science as well as fiction, exploring some fifty different time-travel scenarios and conundrums found in the science fiction literature and film.

Mission to World War II McFarland

Grace sneaks onto Apollo 11 with a little help from some surprising allies in this fourth wacky novel, part of the all-new *In Due Time* series. "Graceless Grace" is the smartest seventh grader at Sands Middle School, but she's constantly being teased for stumbling over doorjams and knocking over lunch trays. And lately, the name-calling has been even worse. So when Ms. Tremt offers to lend *The Book of Memories* to Grace for an extended trip, she decides to go completely out of this world. She travels back to 1969 to stow away on Apollo 11 and become the first kid, the first female, and maybe even the first person to walk on the moon. Take that, teasers! Sneaking onboard Apollo 11 without messing up the mission requires some serious brainpower. Luckily, Grace has something NASA doesn't—a time portal. She opens up *The Book of Memories* and assembles her dream team: Isaac Newton, Albert Einstein, and Hypatia of Alexandria, and works with them to reduce the cargo just enough to safely board the rocket. Apollo 11 leaves the atmosphere with 6,099,920 pounds of space ship and eighty pounds of middle school girl. Grace impresses Neil Armstrong with her smarts and dazzles the world with her spacewalk. After all, you can't face-plant in zero gravity! But when Grace returns to the present, she's dismayed to discover NASA has covered up her historic achievement. There is no mention of her in history books, no record of her spacewalk. Some things in history can't be changed, explains Ms. Tremt, but people can change. And now, "Graceless Grace" has the confidence to redefine her reputation!

Moonshot Classics

When the peasants and townspeople of Mexico revolted against the corrupt government from 1910-1923, their leader was the legendary Pancho Villa. Your mission is to go back in time and find the missing plaster cast that was made of Villa's face right before his funeral, and make sure it finds its way safely through time. The Time Machine series challenges young readers to use their imagination and decision-making skills to write their own story. Options in the text allow readers to choose any path they like within the plot. Readers must draw on background information about the period to make the right choices. This makes the series a great educational device for youngsters to learn about history and all the different cultures, events, and periods that shaped it.

Breaking the Time Barrier A&C Black

Take a deep breath. You're going on a journey back in time. Get on board the time machine that will take you back to the Cross and the beginning of time itself. This adventure hinges on God the Father's Plan to give his one and only Son to save sinners.

Tilly and the Time Machine Penguin

"Endearing, exciting, and very clever, Danielle Rollins' *Stolen Time* is the kind of time-travel story I'm always on the lookout for. I know I can't really speak for him, but I feel like Doc Brown would be onboard with this one."—Kendare Blake, #1 New York Times bestselling author of the *Three Dark Crowns* series "The hauntingly evocative prose seduced me, the compellingly nuanced characters captivated me, and the twisting storyline ensnared my thoughts in an infinite spiral that refused to release me until the final word."—Romina Russell, New York Times bestselling author of the *Zodiac* series *Seattle, 1913* Dorothy spent her life learning the art of the con. But after meeting a stranger and stowing away on his peculiar aircraft, she wakes up in a chilling version of the world she left behind—and for the first time in her life, realizes she's in way over her head. *New Seattle, 2077* If there was ever a girl who was trouble, it was one who snuck on board Ash's time machine wearing a wedding gown—and the last thing he needs is trouble if he wants to prevent his terrifying visions of the future from coming true.

Apollo 8 Cambridge University Press

The Pearson Education Library Collection offers you over 1200 fiction, nonfiction, classic, adapted classic, illustrated classic, short stories, biographies, special anthologies, atlases, visual dictionaries, history trade, animal, sports titles and more

The Time Machine -illustrated National Geographic Books

The untold story of the historic voyage to the moon that closed out one of our darkest years with a nearly unimaginable triumph In August 1968, NASA made a bold decision: in just sixteen weeks, the United States would launch humankind's first flight to the moon. Only the year before, three astronauts had burned to death in their spacecraft, and since then the Apollo program had suffered one setback after another. Meanwhile, the Russians were winning the space race, the Cold War was getting hotter by

the month, and President Kennedy's promise to put a man on the moon by the end of the decade seemed sure to be broken. But when Frank Borman, Jim Lovell and Bill Anders were summoned to a secret meeting and told of the dangerous mission, they instantly signed on. Written with all the color and verve of the best narrative non-fiction, *Apollo 8* takes us from Mission Control to the astronaut's homes, from the test labs to the launch pad. The race to prepare an untested rocket for an unprecedented journey paves the way for the hair-raising trip to the moon. Then, on Christmas Eve, a nation that has suffered a horrendous year of assassinations and war is heartened by an inspiring message from the trio of astronauts in lunar orbit. And when the mission is over—after the first view of the far side of the moon, the first earth-rise, and the first re-entry through the earth's atmosphere following a flight to deep space—the impossible dream of walking on the moon suddenly seems within reach. The full story of Apollo 8 has never been told, and only Jeffrey Kluger—Jim Lovell's co-author on their bestselling book about Apollo 13—can do it justice. Here is the tale of a mission that was both a calculated risk and a wild crapshoot, a stirring account of how three American heroes forever changed our view of the home planet. *The Magnificent Amazing Time Machine* Henry Holt and Company

From Connie Willis, winner of multiple Hugo and Nebula Awards, comes a comedic romp through an unpredictable world of mystery, love, and time travel . . . Ned Henry is badly in need of a rest. He's been shuttling between the 21st century and the 1940s searching for a Victorian atrocity called the bishop's bird stump. It's part of a project to restore the famed Coventry Cathedral, destroyed in a Nazi air raid over a hundred years earlier. But then Verity Kindle, a fellow time traveler, inadvertently brings back something from the past. Now Ned must jump back to the Victorian era to help Verity put things right—not only to save the project but to prevent altering history itself.

The Rings of Saturn Bantam

The Time Machine is a science fiction novella by H. G. Wells, published in 1895 and written as a frame narrative. The work is generally credited with the popularization of the concept of time travel by using a vehicle or device to travel purposely and selectively forward or backward through time

The Revisionists Oxford University Press

A definitive collection of time-travel stories from more than a century of literature features pieces by such leading authors as Douglas Adams, Isaac Asimov and Ray Bradbury and is complemented by a selection of informative nonfiction articles, including Charles Yu's "Top Ten Tips For Time Travelers."

The Mystery of Atlantis Basic Books

Your mission is to go back in time and discover the identity of the man who fired the first shot of the American revolution, and bring back his musket. From 1775 to 1781, the thirteen colonies on the North American continent fought a war of independence from England, then the mightiest power in the world. By the rude bridge that arched the flood, Their flag to April's breeze unfurled, Here once the embattled farmers stood, And fired the shot heard round the world. So begins Ralph Waldo Emerson's famous poem "Concord Hymn," sung at the dedication of the Battle Monument in 1837. Even then, the identity of the man who fired the first shot of the war, beginning the Battle of Lexington and Concord, in April 1775, was a mystery. The Time Machine series challenges young readers to use their imagination and decision-making skills to write their own story. Options in the text allow readers to choose any path they like within the plot. Readers must draw on background information about the period to make the right choices. This makes the series a great educational device for youngsters to learn about history and all the different cultures, events, and periods that shaped it.

Sword of the Samurai Simon and Schuster

"In science fiction, time machines let people travel backwards in history and forward to the future. How could one of these time-traveling devices be created? Scientists have some ideas, which include using spaceships and black holes. Discover the science and technology behind what it would take to make a real-life time machine!"--

Flashback Four #2: The Titanic Mission Ibooks for Young Readers Buzz Aldrin speaks out as a vital advocate for the continuing quest to push the boundaries of the universe as we know it. As a pioneering astronaut who first set foot on the moon during mankind's first landing of Apollo 11-- and as an aerospace engineer who designed an orbital rendezvous technique critical to future planetary landings -- Aldrin has a vision, and in this book he plots out the path he proposes, taking humans to Mars by 2035. --

Once Upon a Time Machine ibooks

The reader's choices determine what adventures will occur on a trip back in time to the era of the dinosaurs to find out what an archaeopteryx looks like.

The reader is transported back through time to Poland during World War II and becomes a fugitive fleeing the Nazis through the streets of Warsaw.

Time Machine 11: Mission to World War II HarperCollins

Tilly is seven and a half - and about to make history. When Tilly's dad builds a time machine in the shed there's only one place she really wants to go: back to her sixth birthday party, when she ate too many cupcakes and her mummy was still here. But then something goes wrong! Tilly's dad gets stuck in the past and only she can save him . . . Will they make it back in time for tea?

What Would It Take to Build a Time Machine? ibooks

With his unique knack for making cutting-edge theoretical science effortlessly accessible, world-renowned physicist Paul Davies now tackles an issue that has boggled minds for centuries: Is time travel possible? The answer, insists Davies, is definitely yes—once you iron out a few kinks in the space-time continuum. With tongue placed firmly in cheek, Davies explains the theoretical physics that make visiting the future and revisiting the past possible, then proceeds to lay out a four-stage process for assembling a time machine and making it work. Wildly inventive and theoretically sound, *How to Build a Time Machine* is creative science at its best—illuminating, entertaining, and thought provoking.

Stolen Time CreateSpace

In New York Times bestselling author Dan Gutman's thrilling Flashback Four series, four very different kids are picked by a mysterious billionaire to travel through time and photograph some of history's most important events. Blends fascinating real history with an action-packed adventure! This time, Luke, Julia, David, and Isabel are headed to the deck of the doomed Titanic. Their mission? Capture a shot of the sinking ship, then come right back. The only problem is, once they arrive aboard the ship, the four friends can't agree on what to do next. Should they try to

save the passengers? Or maybe bring back a priceless book before it sinks with the ship? With real historical photographs to put young readers right in the action, plus back matter that

separates fact from fiction, *The Titanic Mission* tells the story of the ship's fateful last voyage like you've never seen it before.
