The newly revised and thoroughly updated Environmental Compliance Made Easy handbook from Government Institutes' popular 'Made Easy' series reorganizes thousands of pages worth of federal environmental regulatory programs into one easy-to-use compliance resource, organized by program. Intended as both a beginner's guide and a veteran's reference, this edition provides readers with a concise summary of the major environmental programs and introduces readers to the laws and regulations programs, key requirements, responsibilities of regulated parties, and compliance and auditing processes of each. In addition to covering air quality management, hazardous materials management, impact assessments, and underground storage tank

management, this new edition now also covers homeland security and emergency response, compliance audits, information technology initiatives and innovation, pesticide management, property transfer and due diligence, solid waste and toxic substance management, and training. Readers will emerge with a fundamental understanding of which environmental management programs they should consider and how to implement them when developing proactive, successful, and reliable regulatory compliance programs. Key compliance sections include applicable methods, strategies for reviewing compliance status and implementing environmental programs, and checklists based on actual agency protocols. Readers can use the checklists to complete portions of their company's overall environmental compliance plan.

Sustainable development is still seen by authorities as an abstract concept. Local Environmental Auditing will help put it into practice. The book provides a comprehensive guide to monitoring the state of the local environment and establishing the impacts of local actions on global issues, and shows how current local authority policy and practice can be adapted to recognize environmental priorities. The authors provide both a guide to and an assessment of the subject: they link the processes with the issues, with specific information on carrying out the audit (including checklists, case studies and standards) and a detailed discussion of the issues and choices which local authorities may face. Clearly structured and accessible, this will be an essential handbook, both for local government departments and other local organizations, and students in a wide range of subjects, including environmental science and health, town planning, urban and rural studies, social science and politics.
