For White Folks Who Teach in the Hood... and the Rest of Y'all Too Beacon Press

Effective science teaching requires creativity, imagination, and innovation. In light of concerns about American science literacy, scientists and educators have struggled to teach this discipline more effectively. *Science Teaching Reconsidered* provides undergraduate science educators with a path to understanding students, accommodating their individual differences, and helping them grasp the methods and the wonder of science. What impact does teaching style have? How do I plan a course

curriculum? How do I make lectures, classes, and laboratories more effective? How can I tell what students are thinking? Why don't they understand? This handbook provides productive approaches to these and other questions. Written by scientists who are also educators, the handbook offers suggestions for having a greater impact in the classroom and provides resources for further research.

A New York Times Best Seller "Essential reading for all adults who work with black and brown young people...Filled with exceptional intellectual sophistication and necessary wisdom for the future of education."—Imani Perry, National Book

Award Winner author of *South To America* An award-winning educator offers a much-needed antidote to traditional top-down pedagogy and promises to radically reframe the landscape of urban education for the better Drawing on his own experience of feeling undervalued and invisible in classrooms as a young man of color, Dr. Christopher Emdin has merged his experiences with more than a decade of teaching and researching in urban America. He takes to task the perception of urban youth of color as unteachable, and he challenges educators to embrace and respect each student's culture and to reimagine the classroom as a site

where roles are reversed and students become the experts in their own learning. Putting forth his theory of Reality Pedagogy, Emdin provides practical tools to unleash the brilliance and eagerness of youth and educators alike—both of whom have been typecast and stymied by outdated modes of thinking about urban education. With this fresh and engaging new pedagogical vision, Emdin demonstrates the importance of creating a family structure and building communities within the classroom, using culturally relevant strategies like hip-hop music and call-and-response, and connecting the experiences of urban youth to indigenous

populations globally. Merging real stories with theory, research, and practice, Emdin demonstrates how by implementing the “Seven Cs” of reality pedagogy in their own classrooms, urban youth of color benefit from truly transformative education.

2018 Outstanding Academic Title, Choice Ambitious Science Teaching outlines a powerful framework for science teaching to ensure that instruction is rigorous and equitable for students from all backgrounds. The practices presented in the book are being used in schools and districts that seek to improve

science teaching at scale, and a wide range of science subjects and grade levels are represented. The book is organized around four sets of core teaching practices: planning for engagement with big ideas; eliciting student thinking; supporting changes in students’ thinking; and drawing together evidence-based explanations. Discussion of each practice includes tools and routines that teachers can use to support students’ participation, transcripts of actual student-teacher dialogue and descriptions of teachers’ thinking as it unfolds, and examples of student work. The book also provides explicit guidance for “opportunity to learn”

strategies that can help scaffold the participation of diverse students. Since the success of these practices depends so heavily on discourse among students, *Ambitious Science Teaching* includes chapters on productive classroom talk. Science-specific skills such as modeling and scientific argument are also covered. Drawing on the emerging research on core teaching practices and their extensive work with preservice and in-service teachers, *Ambitious Science Teaching* presents a coherent and aligned set of resources for educators striving to meet the considerable challenges that have been set for them. *Grit* Harvard Education Press  
In this instant New York Times bestseller, Angela Duckworth shows anyone striving to succeed that the secret to outstanding achievement is not talent, but a special blend of passion and persistence she calls "grit." "Inspiration for non-geniuses

everywhere" (People). The daughter of a scientist who frequently noted her lack of "genius," Angela Duckworth is now a celebrated researcher and professor. It was her early eye-opening stints in teaching, business consulting, and neuroscience that led to her hypothesis about what really drives success: not genius, but a unique combination of passion and long-term perseverance. In *Grit*, she takes us into the field to visit cadets struggling through their first days at West Point, teachers working in some of the toughest schools, and young finalists in the National Spelling Bee. She also mines fascinating insights from history and shows

what can be gleaned from modern experiments in peak performance. Finally, she shares what she's learned from interviewing dozens of high achievers—from JP Morgan CEO Jamie Dimon to New Yorker cartoon editor Bob Mankoff to Seattle Seahawks Coach Pete Carroll. "Duckworth's ideas about the cultivation of tenacity have clearly changed some lives for the better" (The New York Times Book Review). Among Grit's most valuable insights: any effort you make ultimately counts twice toward your goal; grit can be learned, regardless of IQ or circumstances; when it comes to child-rearing, neither a warm embrace nor high standards will work by

themselves; how to trigger lifelong interest; the magic of the Hard Thing Rule; and so much more. Winningly personal, insightful, and even life-changing, Grit is a book about what goes through your head when you fall down, and how that—not talent or luck—makes all the difference. This is "a fascinating tour of the psychological research on success" (The Wall Street Journal).

Effective Online Teaching is an essential resource that offers a clear understanding of how cognition and learning theory applies to online learning. This much-needed resource provides specific strategies for incorporating this knowledge into effective learner-centered teaching that gets results. The book includes strategies on motivation, tailored instruction, interaction, collaboration, monitoring and communication, time and information management, student concerns, and legal and ethical issues. Designed as a text for online instructors, the chapters can be used for self-directed learning or in a formal

training setting in concert with the companion Training Manual and CD. "Tina Stavredes has done something sorely needed in the online teaching world —she has successfully combined solid theory and research with the practical application of instructor training. Both the book and the training manual are a 'must' for any online education organization. Bravo!"—Dr. Darcy W. Hardy, assistant vice provost for Technology Education Initiatives, University of Texas at San Antonio, and chair emerita, United States Distance Learning Association "Drawing from years of experience and solidly grounded in an understanding of the adult learner and learning, Stavredes

offers dozens of helpful instructor strategies, activities, and resources to support adult learners' success in an online environment. Effective Online Teaching and its accompanying training manual is a 'must-have' set for online instructors in higher education, corporate, and government settings."—Sharan B. Merriam, professor emeritus of adult education, University of Georgia, and coauthor, Learning in Adulthood "An eminently practical book that provides clear and unpretentious explanations of the learning theories that are essential knowledge for every online teacher, together with equally uncluttered and easy-

to-follow guidance about how to apply this knowledge to achieve excellent teaching."—Michael Grahame Moore, Distinguished Professor of Education, The Pennsylvania State University, and editor, The American Journal of Distance Education Accomplished Teaching Research & Education Assn  
"A deeply felt meditation on the vital role of passion in good teaching"—with useful samples, interviews, and advice (Anthony Rotundo, The Washington Post)  
Every teacher can be a passionate teacher—one who engages young people in the excitement of learning and ideas—if teaching is not undermined by the ways we "do business"

in schools. In this book, a professor draws on the voices and firsthand accounts of teachers in urban, rural, and suburban classrooms to provide educators everywhere with useful advice and 'things to try'. Their successes will inspire you to grow and maintain your own passion for teaching in the face of day-to-day obstacles. This edition of The Passionate Teacher also includes a new chapter for teachers beginning their careers.

Teacher Certification Exam. After nearly 20 years of teaching we discovered a startling fact: Most students didn't struggle with the subject, they struggled with the language. It was never about brains or ability. His students simply didn't have the knowledge of the specific language needed to succeed. Through experimentation and research, he discovered that for any subject there was a list of essential words, that, when mastered, unlocked a student's ability to progress in the subject. We called this set of vocabulary the "Insider's Words." When he applied these "Insider's Words" the results were incredible.

His students began to learn with ease. He was on his way to developing the landmark series of Books and applications to teach this "Insider's Language" to students around the world. Our books and applications are helpful to any student. They are especially helpful to struggling students, English language learners, and students beginning a course of study.
