living room in the jungles, the International Ecological Organization was systematically exterminating the voracious insects which made these areas uninhabitable. Using deadly foamal bombs and newly developed vibration weapons, men like Joao Martinho and his co-workers fought to clear the green hell of the Mato Grosso. But somehow those areas which had been completely

cleared were becoming reinfested, despite the impenetrable vibration barriers. And tales came out of the jungles . . . of insects mutated to incredible sizes . . . of creatures who seemed to be men, but whose eyes gleamed with the chitinous sheen of insects. . . . A fascinating examination of the fragile balance between consciousness , man and insect from one of the best-loved science fiction

creators of all time. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied. The Life of August Wilhelm Schlegel, Cosmopolitan of Art and Poetry CRC Press This collection provides vivid ethnographic explorations of particular, local Christianities as they are experienced by different groups around the world. At the same time, the

contributors, all anthropologists, rethink the vexed relationship between anthropology and Christianity. As Fenella Cannell contends in her powerful introduction, Christianity is the critical “repressed” of anthropology. To a great extent, anthropology first defined itself as a rational, empirically based enterprise quite different from theology. The theology it repudiated

was, for the most part, Christian. Cannell asserts that anthropological theory carries within it ideas profoundly shaped by this rejection. Because of this, anthropology has been less successful in considering Christianity as an ethnographic object than it has in considering other religions. This collection is designed to advance a more subtle and less self-limiting

anthropological study of Christianity. The contributors examine the contours of Christianity among diverse groups: Catholics in India, the Philippines, and Bolivia, and Seventh-Day Adventists in Madagascar; the Swedish branch of Word of Life, a charismatic church based in the United States; and Protestants in Amazonia, Melanesia, and Indonesia. Highlighting the wide

variation in what it means to be Christian, the contributors reveal vastly different understandings and valuations of conversion, orthodoxy, Scripture, the inspired word, ritual, gifts, and the concept of heaven. In the process they bring to light how local Christian practices and beliefs are affected by encounters with colonialism and modernity, by the opposition between

Catholicism and Protestantism, and by the proximity of other religions and belief systems. Together the contributors show that it is not sufficient for anthropologists to assume that they know in advance what the Christian experience is; each local variation must be encountered on its own terms. Monsters & Aliens BRILL
 This book presents a collection of papers from the fifth conference of the Enoch Seminar. The conference re-examined 2 Enoch, an early Jewish apocalyptic text previously known to scholars only in its Slavonic translation, in light of

recently identified Coptic fragments. Twelve Years A Slave, Illustrated Edition Immedium A retrospective of ten years of strips with comments by the author. **Batman/Fortnite: Zero Point** Tor Books The last decade has seen a surge of scholarly interest in these religious professionals and a good number of high quality publications. Our volume, however, with

its unique intercultural character and its explicit focus on appropriation and contestation of religious expertise in the Imperial Era is substantially different. Unlike the rather narrow focus of earlier studies of civic priests, the papers presented here examine a wider range of religious professionals, their dynamic interaction with established religious authorities

and institutions, and their contributions to religious innovation in the ancient Mediterranean world, from the late Hellenistic period through to Late Antiquity, from the City of Rome to mainland Greece, Asia Minor, Syria and Egypt, from Greek civic practice to ancient Judaism. A further advantage of our volume is the wide range of media of transmission taken into

account. Our contributors look at both old and new materials, which derive not only from literary sources but also from papyri, inscriptions, and material culture. Above all, this volume assesses critically convenient terminological usage and offers a unique insight into a rich gamut of ancient Mediterranean religious specialists.

The Year of the Snake

One World
This is the first full-scale biography, in any language, of a towering figure in German and European Romanticism: August Wilhelm Schlegel whose life, 1767 to 1845, coincided with its inexorable rise. As poet,

translator, critic and oriental scholar, Schlegel's extraordinarily diverse interests and writings left a vast intellectual legacy, making him a foundational figure in several branches of knowledge. He was one of the last thinkers in Europe able to practise as well as to theorise, and to attempt to comprehend the nature of culture without being forced to be a narrow specialist.

With his brother Friedrich, for example, Schlegel edited the avant-garde Romantic periodical *Athenaeum*; and he produced with his wife Caroline a translation of Shakespeare, the first metrical version into any foreign language. Schlegel's *Lectures on Dramatic Art and Literature* were a defining force for Coleridge and for the French Romantics. But his

interests extended to French, Italian, Spanish and Portuguese literature, as well to the Greek and Latin classics, and to Sanskrit. August Wilhelm Schlegel is the first attempt to engage with this totality, to combine an account of Schlegel's life and times with a critical evaluation of his work and its influence. Through the study of one man's rich life, incorporating the most

recent scholarship, theoretical approaches, and archival resources, while remaining easily accessible to all readers, Paulin has recovered the intellectual climate of Romanticism in Germany and traced its development into a still-potent international movement. The extraordinarily wide scope and variety of Schlegel's activities have hitherto acted as a barrier to literary

scholars, even in Germany. In Roger Paulin, whose career has given him the knowledge and the experience to grapple with such an ambitious project, Schlegel has at last found a worthy exponent. Individuals and Materials in the Greco-Roman Cults of Isis (SET) Andrews McMeel Publishing Portraying the two critical moments in Oscar Wilde's late life -- when he decides to stay in

England and face imprisonment and the night after his release, two years later -- David Hare's *The Judas Kiss* presents the consequences of taking an uncompromisingly moral position in a world defined by fear, expedience, and conformity. *Adventures Away* Andrews McMeel Publishing A breakthrough paper-folding book for kids—paper airplanes meet Origami meets

Pokemon. Papertoys, the Internet phenomenon that's hot among graphic designers and illustrators around the world, now comes to kids in the coolest new book. Created and curated by Brian Castleforte, a graphic designer and papertoy pioneer who rounded up 25 of the hottest papertoy designers from around the world (Indonesia, Japan, Australia, Italy, Croatia,

Chile, even Jackson, Tennessee), Papertoy Monsters offers 50 fiendishly original die-cut designs that are ready to pop out, fold, and glue. The book interleaves card stock with paper stock for a unique craft package; the graphics are colorful and hip, combining the edginess of anime with the goofy fun of Uglydolls and other collectibles. Plus each character comes with its own back-

story. And the results are delicious: meet Pharaoh Thoth Amon, who once ruled Egypt but is now a mummy who practices dark magic in his sarcophagus. Or Zumbie the Zombie, who loves nothing more than a nice plate of brains and yams. NotSoScary, a little monster so useless at frightening people that he has to wear a scary mask. Yucky Chuck, the lunchbox creature born in the deepest depths of your school bag.

Plus Zeke, the monster under your bed, Nom Nom, eater of cities, and Grumpy Gramps, the hairy grandpa monster with his very own moustache collection. *Black Cowboys of Rodeo* UNESCO Publishing Why were the stars so important in Rome? of this being the predicted enjoyment of a celestial afterlife by emperors. Aratus' Phaenomena, a didactic poem in Greek hexameters, composed c. 270 BC, which describes the layout of the heavens and their effect on the lives of men, was an ideal text in expressing such relationships: a didactic model which was both accessible and elegant, and which combined the stars with notions of divine and human order. Across a period extending from the late Roman Republic and early Empire until the age of Christian humanism, the impact of this poem on the literary environment is apparently out of all proportion to its relatively modest size and the obscurity of its subject matter. It was translated into Latin many times between the first century BC and the Renaissance, and carried lasting influence outside its immediate genre. Aratus and the Astronomical Tradition answers the question of Aratus' popularity by looking at the poem in the light of Western cosmology. It argues that the Phaenomena is the ideal vehicle for the integration of astronomical "data" into abstract cosmology, a defining feature of the Western tradition. This

book embeds Aratus' text into a close network of textual interactions, beginning with the text itself and ending in the sixteenth century, with Copernicus. All conversations between the text and its successors experiment in some way with the balance between cosmology and information. The text was not an inert objet d'art, but a dynamic entity which took on colors often in

conflict in the ongoing debate about the place and role of the stars in the world. With this detailed treatment of Aratus' poem and its reception, Emma Gee resituates a peculiar literary work within its successive cultural contexts and provides a benchmark for further research.

The Green Brain

Workman Publishing Organized chronologically, this book presents a

complete picture of Greek civilization as a history. It features sections on the art, architecture, literature, and thought of each period. Names and dates are provided, and cultural achievements and social transformations that accompanied the cascade of historical events are carefully examined. This comprehensive, balanced treatment of ancient Greece covers

its history from the prehistoric through the Mycenaean Period, the Dark Ages, the Classical Period, the Hellenistic, and the absorption of Greek culture by Rome. For an understanding of Greek history-its culture and the people-as a whole.

The first book in a series of autobiographical incidences chronicling the life and

voice of an outspoke Black girl. Sonia at age 7 refused to stand and pledge allegiance to the flag because she didn't see "liberty and justice for all." *Monsters & Aliens* is likened to the *Diary of Anne Frank*, as they both magnify the voices of children speaking their truth, a truth less jaded by the normalcy of lies? Imagine the voice you wish they heard while growing up. Imagine

feeling valued for your race, complexion, features, textures, and socio-economic status. Likewise, imagine being encouraged to use your voice regularly in an effort to stand unwavering for the things that matter to you the most. All of the things my parents, family, and friends said made me beautiful, were the very things used to tear her down. For 7-year old Sonia, her voice was

forced to mature sooner than her peers because too often Black children are expected to deal with adult situations as if they instinctively know better and are inherently prepared. "Monsters & Aliens" is a coming-of-age story that speaks to Sonia's journey of seeking to understand the forced tradition and norm of saying the Pledge of Allegiance to a flag. This story

illuminates the juxtaposition of being American and Black, without reaping the benefits of "freedom and justice for all." It tells the tale of two Americas, with staunchly different rules and results. The America that has been highly dependent upon ideations of anti-blackness to sustain the white normative we've all become conditioned to accept, is put under the microscope.

Sonia Williams-Lewis at age 50 finally gives voice to her 7-year old self, a Black girl from California refusing to say the Pledge of Allegiance and the consequences associated with said decision. "Monsters & Aliens" isn't just about Sonia's refusal to say the Pledge of Allegiance, nor is it about the punishment. It is more about courage, asserting agency, adultification, racism, socio-economic

inequities, and the layers we wear while trying to make sense of our way through the swampy parts of life's journey.

Thorndike Press Wiggerman's study of Mesopotamian monsters bridges the gap between text and image. Wooden and clay figures of monstrous spirits such as Hairy-One (lahmu), Bison-Bull (kusarikku), and Furious-Snake (mushussu)

stand guard at the entrances to buildings to protect the inhabitants from demonic intruders. Deriving his information from the ritual texts that describe the production and installation of these figures, the author identifies the monsters of the texts with the archaeological record and presents a detailed discussion of the identities and histories of a variety of Mesopotamian monsters.

Women in the Ancient Near East

Grove Press Women in the Ancient Near East offers a lucid account of the daily life of women in Mesopotamia from the third millennium BCE until the beginning of the Hellenistic period. The book systematically presents the lives of women emerging from the available cuneiform material and discusses modern scholarly opinion. Stol's

book is the first full-scale treatment of the history of women in the Ancient Near East.
