 The Catcher in Rye is the ultimate novel for disaffected youth, but it's relevant to all ages. The story is told by Holden Caulfield, a seventeen- year-old dropout who has just been kicked out of his fourth school. Throughout, Holden dissects the 'phony' aspects of society, and the 'phonies' themselves- the headmaster whose affability depends on the wealth of the parents, his roommate who scores with girls using sickly-sweet affection. Lazy in style, full of slang and swear words, it's a novel whose interest and

appeal comes from its observations rather than its plot intrigues (in conventional terms, there is hardly any plot at all). Salinger's style creates an effect of conversation, it is as though Holden is speaking to you personally, as though you too have seen through the pretences of the American Dream and are growing up unable to see the point of living in, or contributing to, the society around you. Written with the clarity of a boy leaving childhood, it deals with society, love, loss, and expectations without ever falling into the clutch of a cliché

Kamal Abdulla is a well-known Azerbaijani writer and scholar. He has written works on linguistics, culturology and mythology, and is the author of poetry, essays, plays, stories, and novels. His prose has been published and translated into French, Turkish, Russian, English, Portuguese, German, Polish, Bulgarian, Georgian, Arabic, Lithuanian, Japanese, and other languages. His plays have been performed in Azerbaijan, Georgia, and Estonia. His work is not without its detractors. Many articles and books have been written about his work, some positive, some

negative. He has won literary awards in his own country, and been subject to unfair criticism. In the early years of Azerbaijan's independence, liking his novels was considered a sign of good literary taste. In later years, not liking these works is considered a sign of good literary taste. Original language, world view, philosophical foundation, and mythological sense characterize his work. His writing features mountains invisible to the eye, and valleys of sorcerers where it is forever spring. Here ancient manuscripts come to life and history is re-read in a completely different way. Centaurs roam his favourite city, Baku, while in ancient Egypt,

people turn into flowers, and flowers into people. The idolized heroes of his mythological texts are fleshed out as ordinary, everyday people. Sometimes dead people emerge from their images, restore justice, and then return to their images. Not satisfied with living in their own worlds, characters lead very different lives in parallel worlds. The story of Theseus and the Minotaur enters our own time, and finally the phantasmagoria reaches such a point that Paris gives the apple to Hera, not Aphrodite...

 All human activity takes place in space and time in one way or another, which is consequently reflected

in our language. We not only talk about space and time but also cannot but ground our linguistic activity in space and time. Furthermore, space and time are closely, although asymmetrically, related in our experience and we often think and talk about one in terms of the other. Specifically, time is conceived in terms of space far more frequently than vice versa. The volume contains a selection of essays that are revised versions of papers presented at the 23rd annual conference of the Croatian Applied Linguistics Society (CALs), entitled «Space and Time in Language: Language in Space and Time», which took place from 21 to 23 May 2009 in Osijek (Croatia).

Like the other republics floating free after the demise of the Soviet empire, the

independent republic of Georgia is reinventing its past, recovering what had been forgotten or distorted during the long years of Russian and Soviet rule. Whether Georgia can successfully be transformed from a society rent by conflict into a pluralistic democratic nation will depend on Georgians rethinking their history. This is the first comprehensive treatment of Georgian history, from the ethnogenesis of the Georgians in the first millennium B.C., through the period of Russian and Soviet rule in the nineteenth and twentieth centuries, to the emergence of an independent republic in 1991, the ethnic and civil warfare that has ensued, and

Against Their Will U of Minnesota Press Crime and punishment, criminal law and its administration, are areas of ancient history that have been explored less than many other aspects of ancient civilizations. Throughout history women have been affected by crime both as victims and as offenders. Yet, in the ancient world customary laws were created by men, formal laws were written by men, and both were interpreted and

enforced by men. Etymological Dictionary of the Kartvelian Languages Peter Lang D Cognitive Linguistics argues that language is governed by general cognitive principles, rather than by a special-purpose language module. This introductory textbook surveys the field of cognitive linguistics as a distinct area of study, presenting its theoretical foundations and the arguments supporting it. Clearly organised and accessibly written, it provides a useful introduction to the relationship between language and cognitive processing in the human brain. It covers the main topics likely to be encountered in a course or seminar, and provides a synthesis of

study and research in this fast-growing field of linguistics. The authors begin by explaining the conceptual structures and cognitive processes governing linguistic representation and behaviour, and go on to explore cognitive approaches to lexical semantics, as well as syntactic representation and analysis, focusing on the closely related frameworks of cognitive grammar and construction grammar. This much-needed introduction will be welcomed by students in linguistics and cognitive science.

First published in 1977, *A History of Georgia* has become the standard history of the

state. Documenting events from the earliest discoveries by the Spanish to the rapid changes the state has undergone with the civil rights era, the book gives broad coverage to the state's social, political, economic, and cultural history. This work details Georgia's development from past to present, including the early Cherokee land disputes, the state's secession from the Union, cotton's reign, Reconstruction, the Bourbon era, the effects of the New Deal, Martin Luther King, Jr., the fall of the county-unit system, and Jimmy Carter's election to the presidency. Also noted are the often-overlooked contributions of Indians, blacks, and

women. Each imparting his own special knowledge and understanding of a particular period in the state's history, the authors bring into focus the personalities and events that made Georgia what it is today. For this new edition, available in paperback for the first time, *A History of Georgia* has been revised to bring the work up through the events of the 1980s. The bibliographies for each section and the appendixes have also been updated to include relevant scholarship from the last decade.
