The Real Work

Shambhala  
Publications  
Gary Snyder's second  
collection, Myths &  
Texts, was originally  
published in 1960 by  
Totem Press. It is now  
reissued by New

Directions in this completely revised format, with an introduction by the author.

**Regarding Wave** New

Directions Publishing

The people of Vassilikos, farmers and tourist entrepreneurs on the Greek island of Zakynthos, are involved in a bitter environmental dispute concerning the conservation of sea turtles. Against the environmentalists' practices and ideals they set their own culture of relating to the land, cultivation, wild and domestic animals. Written from an anthropological perspective, this book puts forward the idea that a thorough study of indigenous cultures is a fundamental step to understanding conflicts over the

environment. For this purpose, the book offers a detailed account of the cultural depth and richness of the human environmental relationship in Vassilikos, focusing on the engagement of its inhabitants with diverse aspects of the local environment, such as animal care, agriculture, tourism and hunting.

*Bioregionalism* New

Directions Publishing

A collection of captivatingly meditative essays that display a deep understanding of Buddhist belief, wildness, wildlife, and the world from an American cultural force. With thoughts ranging from political and spiritual matters to those regarding the environment and the

art of becoming native to this continent, the nine essays in *The Practice of the Wild* display the deep understanding and wide erudition of Gary Snyder. These essays, first published in 1990, stand as the mature centerpiece of Snyder's work and thought, and this profound collection is widely accepted as one of the central texts on wilderness and the interaction of nature and culture.

"A reaffirmation of a back country of the spirit."—Kirkus Reviews

"A reaffirmation of a back country of the spirit."—Kirkus Reviews

This collection is made up of four sections: "Far West"—poems of the Western mountain country where, as a

young man. Gary Snyder worked as a logger and forest ranger; "Far East"—poems written between 1956 and 1964 in Japan where he studied Zen at the monastery in Kyoto; "Kali"—poems inspired by a visit to India and his reading of Indian religious texts, particularly those of Shivaism and Tibetan Buddhism; and "Back"—poems done on his return to this country in 1964 which look again at our West with the eyes of India and Japan. The book concludes with a group of translations of the Japanese poet Miyazawa Kenji (1896-1933), with whose work Snyder feels a close affinity. The title, *The Back Country*, has three major associations;

wilderness. the "backward" countries, and the "back country" of the mind with its levels of being in the unconscious.

"A Native American healer, teacher, and activist, Rolling Thunder is known to millions of people all over the world through his stories and talks, through Doug Boyd's book about him, and the Billy Jack films, which were based upon incidents in this life.

This book, long overdue by those who knew Rolling Thunder and his work, is a major legacy of his extraordinary life and the summation of his teachings and in his own words. As controversial and plain-speaking as Rolling Thunder himself, it exhorts, enlightens,

and teaches through anecdotes and stories, forces us to listen and to think, and carries on his primary mission: to bring Indian knowledge to non-Indian people." -

- Publisher's description

Turtle Island Trillium

A spirited collection of poems inspired by the Zen practice of one of America's most celebrated authors, Jim Harrison, a New York Times best-selling author. The popular novels of Jim Harrison (1937–2016) represent only part of his literary output—he was also widely acclaimed for the "renegade genius" of his powerful, expressive poems. After *Ikkyū* is the first collection of Harrison's poetry directly inspired by his many years of Zen practice. The writing here is at once

thought-provoking and passionate, immortalizing a celebrated American writer's relationship to Zen in beautiful verse. These short, spirited poems will inspire you to look at life differently with a newfound sense of wonder and gratitude for everyday moments. *The Old Ways* Catapult With a new afterword by the authors A powerful, intimate collection of conversations with Indigenous Americans on the climate crisis and the Earth's future Although for a great many people, the human impact on the Earth—countless species becoming extinct, pandemics claiming millions of lives, and climate crisis causing worldwide social and

environmental upheaval—was not apparent until recently, this is not the case for all people or cultures. For the Indigenous people of the world, radical alteration of the planet, and of life itself, is a story that is many generations long. They have had to adapt, to persevere, and to be courageous and resourceful in the face of genocide and destruction—and their experience has given them a unique understanding of civilizational devastation. An American Library Association Notable Book, *We Are the Middle of Forever* places Indigenous voices at the center of conversations about today's environmental crisis. The book draws on interviews with

people from different North American Indigenous cultures and communities, generations, and geographic regions, who share their knowledge and experience, their questions, their observations, and their dreams of maintaining the best relationship possible to all of life. A welcome antidote to the despair arising from the climate crisis, *We Are the Middle of Forever* will be an indispensable aid to those looking for new and different ideas and responses to the challenges we face.

*Turtle Island* The New Press

The first collection of poems by the acclaimed poet in two decades experiments with the Japanese poetic form known as

"haibun" while exploring the immediacies of intimate contacts and gossip, with poems about an ascent up Mount St. Helens and the destruction of Hiroshima. Reprint. *We Are the Middle of Forever* Outskirts Press  
By any measure, Gary Snyder is one of the greatest poets in America in the last century. From his first book of poems to his latest collection of essays, his work and his example, standing between Tu Fu and Thoreau, have been influential all over the world. *Riprap*, his first book of poems, was published in Japan in 1959 by Origin Press, and it is the fiftieth anniversary of that groundbreaking book we celebrate with this edition. A small press

reprint of that book included Snyder's translations of Han Shan's Cold Mountain Poems, perhaps the finest translations of that remarkable poet ever made into English. Reintroducing one of the twentieth century's foremost collections of poetry, this edition will please those already familiar with this work and excite a new generation of readers with its profound simplicity and spare elegance.

Clear Light Publishing

"The letters are valuable for ecologists, students, and teachers of contemporary American literature and for those of us eager to know how these two distant neighbors networked, negotiated, and remained friends."

—San Francisco Chronicle "In Distant

Neighbors, both Berry and Snyder come across as honest and open-hearted explorers. There is an overall sense that they possess a deep and questing wisdom, hard earned through land work, travel, writing, and spiritual exploration. There is no rushing, no hectoring, and no grand gestures between these two, just an ever-deepening inquiry into what makes a good life and how to live it, even in the depths of the machine age."—Orion Magazine In 1969 Gary Snyder returned from a long residence in Japan to northern California, to a homestead in the Sierra foothills where he intended to build a house and settle on the land with his wife and young sons. He had just published his first

book of essays, *Earth House Hold*. A few years before, after a long absence, Wendell Berry left New York City to return to land near his grandfather's farm in Port Royal, Kentucky, where he built a small studio and lived there with his wife as they restored an old house on their newly acquired homestead. In 1969 Berry had just published *Long-Legged House*. These two founding members of the counterculture and of the new environmental movement had yet to meet, but they knew each other's work, and soon they began a correspondence. Neither man could have imagined the impact their work would have on American political and

literary culture, nor could they have appreciated the impact they would have on one another. Snyder had thrown over all vestiges of Christianity in favor of becoming a devoted Buddhist and Zen practitioner, and had lived in Japan for a prolonged period to develop this practice. Berry's discomfort with the Christianity of his native land caused him to become something of a renegade Christian, troubled by the church and organized religion, but grounded in its vocabulary and its narrative. Religion and spirituality seemed like a natural topic for the two men to discuss, and discuss they did. They exchanged more than 240 letters from 1973 to 2013, remarkable letters of

insight and argument. The two bring out the best in each other, as they grapple with issues of faith and reason, discuss ideas of home and family, worry over the disintegration of community and commonwealth, and share the details of the lives they've chosen to live with their wives and children. Contemporary American culture is the landscape they reside on. Environmentalism, sustainability, global politics and American involvement, literature, poetry and progressive ideals, these two public intellectuals address issues as broad as are found in any exchange in literature. No one can be unaffected by the complexity of their relationship, the subtlety of their

arguments, and the grace of their friendship. This is a book for the ages.

**Uncollected Poems, Drafts, Fragments, and Translations**

Counterpoint

"Creating Aztlán interrogates the important role of Aztlán in Chicano and Indigenous art and culture. Using the idea that lowriding is an Indigenous way of being, author Dylan A. T. Miner (Mâetis) discusses the multiple roles that Aztlán has played at various moments in time, engaging pre-colonial indigeneities, alongside colonial, modern, and contemporary Xicano responses to colonization"--

In Praise of Radiant

Beings San Francisco : North Point Press

This text is a collection

of essays by noted curriculum scholar and philosopher of education, David W. Jardine. It ranges over twenty-five years of work with teachers and students in schools. The main purpose of these essays is to provide teachers with new ways of thinking about their circumstances that side step some of the panic and exhaustion that is all too typical of many school settings. Using ideas and images from Buddhism, ecological thinking, and hermeneutics, the author shows how these lineages help with the practical work of thinking and acting differently regarding the knowledge entrusted to teachers and students in schools. It offers the

image of living fields of relations as an alternative to the fragmented, industrial-assembly machinations that drive much curriculum thinking and practice. It roots this alternative in solid scholarly work, both inside and outside of the orbit of educational literature. This book can provide encouragement and example to those working in schools who have sensed the shifting of human consciousness and conscience over the past decades towards issues of sustainability, interrelatedness, diversity, ancestry, ecological well-being, and dependent co-arising. It provides solid classroom-based examples coupled with substantial scholarly delving into the roots

of such work in long-standing streams of thinking that are born outside of the usual orbits of educational theory and practice, but that provide that practice with a refuge and a relief and an alternative. This book can also provide examples to those doing graduate work in education of how interpretive research into classrooms can be conducted, and how this work is must be solid, well-rooted, scholarly and meticulously thought out. It is useful as a handbook and sourcebook for interpretive research or hermeneutic research, and provides a wide array of sources and themes for the conduct of such work. **Danger on Peaks IAP** Discover the amazing

story of the Indigenous peoples of the Americas from the end of the Ice Age to the arrival of the Europeans. You'll learn what people ate, how they expressed themselves through art, and how they adapted to the land. Archaeologists have been able to piece together what life may have been like pre-contact-- and how life changed with the arrival of the Europeans.

*Turtle Island* Catapult Both Pound and Williams have shown a good poet can revitalize prose style. *Earth House Hold* (a play on the root meaning of "ecology"), drawn from Gary Snyder's essays and journals, may prove a landmark for the new generation. "As a

poet," Snyder tells us, "I hold the most archaic values on earth. They go back to the late Paleolithic; the fertility of the soil, the magic of animals, the power-vision in solitude, the terrifying intuition and rebirth; the love and ecstasy of the dance, the common work of the tribe." He develops, as replacement for shattered social structures. a concept of tribal tradition which could lead to "growth and enlightenment in self-disciplined freedom. Whatever it is or ever was in any other culture can be reconstructed from the unconscious through meditation...the coming revolution will close the circle and link us in many ways with the most creative aspects of our archaic

past."

The Gary Snyder  
Reader Catapult

This monumental collection gathers the essays, travel journals, letters, poems, and translations of one of the most influential literary voices of the 20th century.

**The Practice of the Wild** Catapult

Written by two of the Southeast's foremost authorities on sea turtle conservation, this is an accessible, fully illustrated guide to the species that frequent the Atlantic and Gulf Coasts of the United States. No one who encounters a sea turtle soon forgets it. The leatherback, for instance, can grow to huge proportions, commonly approaching eight feet in length and more than half a ton in weight. Powerful

swimmers, they are also among the deepest divers of all air-breathing sea creatures. Despite these assets, the survival of the leatherback, like that of all sea turtle species, is under constant threat from commercial fishing operations, overdevelopment of nesting grounds, pollution, and predation by introduced species. The guide opens with comprehensive coverage of the sea turtle's evolution, juvenile and adult life cycles, nesting, diet and feeding, disease and parasites, predators, and conservation issues. Each subsequent chapter is dedicated to a particular turtle species: loggerhead,

leatherback, Kemp's ridley, green sea turtle, hawksbill, and olive ridley. The account of each species describes distribution, habitats, general appearance, life history and behavior, and conservation. For each species, photographs of hatchlings and adults and a map showing distribution and migration provide further information. Sea turtles have been swimming the seas for one hundred million years. Yet all of the species in this

book—indeed, all sea turtles worldwide—are on U.S. and international endangered lists. Biologists Carol Ruckdeschel and C. Robert Shoop have dedicated their careers to learning about sea turtles—and to ensuring that we understand that we are stakeholders in the fate of these ancient creatures. With this guide in hand, readers will be better equipped to understand sea turtle biology and support sea turtle conservation efforts.
