Eritrean refugees crisscross between countries in the Horn of Africa and North Africa in search of a safe place. Along their journeys, they are looted, threatened, intimidated, violated, and held for ransom. This book revisits the human trafficking crisis that first emerged in the Sinai at the end of 2008 and examines the expansion of human trafficking of Eritrean refugees and other forms of exploitation beyond the Sinai. It focuses on the modus operandi of these practices and on identifying their key facilitators and beneficiaries. The book locates the origin of these practices within Eritrea; it reveals how a deliberate policy of impoverishment and human rights abuses has driven the people out of the country, and how individuals within Eritrea, and particularly within the ruling party, benefit from the smuggling and trafficking of Eritrean refugees. The use of information

communication technologies (ICTs) is identified as key to the new modus operandi of this criminal business and is found to further facilitate widespread collective trauma amongst Eritreans, who witness the abuse of their family members and fellow nationals through digital networks. An entire section in this book is dedicated to assessing the extent and effects of individual and collective trauma caused by Sinai trafficking and to examining potential approaches to healing. Other sections discuss the vulnerabilities of Eritrean minors and women, and the connections between human trafficking, terrorism and organ trafficking. The last section of the book raises the question of accountability. It examines and evaluates international responses to this forgotten crisis, and discusses the need for policies that tackle the problem where it emerges: in Eritrea.

The Spanish conquest of the Americas in the 16th century was one of the most important and cataclysmic events in history. Spanish expeditions endured incredible hardships in order to open up the lands of the 'New World', and few stories in history can match these for drama and endurance. In *Conquistadors*, Michael Wood follows in the footsteps of some of the greatest of the Spanish adventurers travelling from the forests of Amazonia to Lake Titicaca, the deserts of North Mexico, the snowpeaks of the Andes and the heights of Machu Picchu. He experiences the epic journeys of Cortes, Pizarro, Orellana and Cabeza de Vaca, and explores the turbulent and terrifying events surrounding the Spanish conquest of the Aztec and Inca empires. Wood brings these stories to vivid life, highlighting both the heroic accomplishments and the complex moral legacy of the European invasion. *Conquistadors* is Michael Wood at his best - thoughtful, provocative and gripping history.

This book explains the dynamics behind the economic transformation from the colonial era to the post-independence period in Indonesia and Vietnam. It analyses the different Vietnamese and Indonesian government approaches to the economic legacies of colonialism remaining in these countries after independence. It also demonstrates that despite critical differences between the two nation-states, the Vietnamese and Indonesian leaderships were pursuing similar long-term goals: to create a truly independent national economy. The book discusses the way in which the Indonesian government established complete economic control, resembling the socialist transformation of North Vietnam in the 1950s, and the various means by which the government of South Vietnam concentrated economic power in its own hands during the late 1950s and early 1960s. It also explores how the Indonesian government was determined to remove the economic legacy of Dutch colonialism by placing the entire economy under strong state control and ownership in accordance with the spirit of Guided Democracy and Guided Economy in the late 1950s and the early 1960s. This book is a point of reference for students, researchers and academics interested in a comparative analysis of the economic systems implemented by the colonial and fascist powers in Indonesia and Vietnam.

The Industrial Revolution, powered by oil and other fossil fuels, is spiraling into a dangerous endgame. The price of gas and food are climbing, unemployment remains high, the housing market has tanked, consumer and government debt is soaring, and the recovery is slowing. Facing the prospect of a second collapse of the global economy, humanity is desperate for a sustainable economic game plan to take us into the future. Here, Jeremy Rifkin explores how Internet technology and renewable energy are merging to create a powerful "Third Industrial Revolution." He asks us to imagine hundreds of millions of people producing their own green energy in their homes, offices, and factories, and sharing it with each other in an "energy internet," just like we now create and share information online. Rifkin describes how the five-pillars of the Third Industrial Revolution will create thousands of businesses, millions of jobs, and usher in a fundamental reordering of human relationships, from hierarchical to lateral power, that will impact the way we conduct commerce, govern society, educate our children, and engage in civic life. Rifkin's vision is already gaining traction in the international

community. The European Union Parliament has issued a formal declaration calling for its implementation, and other nations in Asia, Africa, and the Americas, are quickly preparing their own initiatives for transitioning into the new economic paradigm. The Third Industrial Revolution is an insider's account of the next great economic era, including a look into the personalities and players — heads of state, global CEOs, social entrepreneurs, and NGOs — who are pioneering its implementation around the world. *Marketing: Real People, Real Choices* Cambridge University Press

This book gives an excellent overview of Flemish art from the Hermitage in St Petersburg. A large proportion was acquired in the eighteenth century by Catherine the Great, from superb collections such as those of Crozat and Brühl, which she bought up in their entirety. Many of these paintings originally hung in churches and monasteries in Antwerp and other European cities. Most attention focuses on the 'big three': Peter Paul Rubens, Anthony van Dyck and Jacob Jordaens. Rubens was the most important, the most talented, and the most influential seventeenth-century Flemish painter. He was also a phenomenon in his day, a true homo universalis. The portraits produced by Van Dyck for the court of King Charles I of England also share the limelight, along with impressive history paintings by Jordaens, exuding the vibrant atmosphere in which he excelled. Homer gilt als Autor der Ilias und Odyssee und damit als erster

Dichter des Abendlandes. In der Antike wurden ihm weitere Werke wie die Homerischen Hymnen zugeschrieben, während andererseits immer wieder bezweifelt wird, ob Ilias und Odyssee überhaupt von einer einzigen historischen Person namens Homer verfasst worden sind. Unbestritten ist die unermessliche, bis heute andauernde Wirkung Homers, der schon in der Antike als der Dichter schlechthin galt.

Scientists have long disagreed on the origins of Greek mythology and the works of Homer. The Analysts that once dominated these discussions never succeeded in distinguishing between multiple oral traditions in the Iliad and the Odyssey - the earliest surviving

works of Greek literature - or in using them to draw conclusions about the Greek Bronze Age and the Mykenaian civilization. Until now, many attempts to recognize the right patterns in Greek mythology and ancient Greek literature have ended in failure. However, in these lengthy literature works, Ward Blondé has discovered five distinct oral traditions, thus proving that the scientific field of Greek literature still holds many surprises. In his book about the Mykenaian Alpha-tradition, Blondé exposes a whole new world, one with hidden stories and numerous narrative patterns that have been overlooked by scientists for centuries. These include an age-old king story, a hero story, and 49 characteristics of the oral tradition. The famous Trojan War is revealed to be a myth, with a history that reaches far into the second millennium BC.

The Kaddu Wasswa archive by photographer Andrea Stultiens is the visual biography of Ugandan John Kaddu Wasswa, born in 1933, who played an important role in his community as a teacher and social worker. What is exceptional about the now 77-year old Kaddu Wasswa is that he has always documented his activities. He wrote novels, plays and essays, took photographs and collected photos. Additionally, his extensive archive contains letters and newspaper clippings, often with added commentary. Andrea Stultiens met Kaddu Wasswa in 2008 through his grandson, photographer Arthur C. Kisitu. Together, Stultiens and Kisitu set out to explore Kaddu Wasswa's archive. She took photographs of the documents to which she added her and Kisitu's own photos which were taken during their meetings. The result is a unique biography in which the author is personally

visible as well. Exhibition: Nederlands Fotomuseum, Rotterdam (30.10.2010-2.01.2011).
