Who's who Oxford University Press
The object of this publication is to provide youth, as well as people and organizations involved and interested in youth-related issues, with a comprehensive source of information on South African young organizations and related relevant issues.

Urban Planning for City Leaders

Sudev Naduvath

All countries strive to ensure safety and security for their citizens and to increase the quality of their lives. The Handbook offers a concise overview of the main considerations to be taken into account in planning and implementing crime prevention strategies and interventions. It also recognises that there are some major differences between regions and countries in terms of the challenges posed by crime and victimization and the importance of adapting programmes to local contexts. The main emphasis is on how crime prevention strategies based on the guidelines developed by

the United Nations can be entrenched and sustained over time. It includes information on the kinds of methods and tools that can be utilised and are becoming increasingly available.

Gaffney's Local Government in South Africa Verso Books

It is the book version of the e-journal "Contemporary Studies in Discrete Mathematics" published by Contemporary Studies in Discrete Mathematics, Thrissur, India.

Drum HSRC Press

This book deals with positive tactics officers can employ on the street to effectively use their own firearms to defeat those of assailants. It is devoted exclusively to understanding and mastering techniques that work for survival in real life situations.

Unfortunately, most of the current literature on so-called 'combat shooting' explores what works against paper targets. Few street-wise experts or truly contemporary articles have emerged on street survival, although deadly assaults on the police continue to occur year after year. This book can help make you survival sensitive. The techniques it

emphasizes are designed to affect the way you prepare, plan and react, to keep you alive in real situations. They are not hypotheses, but proven procedures, based on the insights of officers who have experienced gun battles and survived and on the lessons left behind by those who have died.

The Security-development Nexus

Gale Cengage

Chronic homelessness is a highly complex social problem of national importance. The problem has elicited a variety of societal and public policy responses over the years, concomitant with fluctuations in the economy and changes in the demographics of and attitudes toward poor and disenfranchised citizens. In recent decades, federal agencies, nonprofit organizations, and the philanthropic community have worked hard to develop and implement programs to solve the challenges of homelessness, and progress has been made. However, much more remains to be done. Importantly, the results of various efforts, and especially the efforts to reduce homelessness among veterans in recent years, have shown that the problem of homelessness can be successfully addressed. Although a number of programs have been developed to meet the needs of persons experiencing homelessness, this report focuses on one particular type of intervention: permanent supportive housing (PSH). Permanent Supportive Housing focuses on the impact of PSH on health care outcomes and its cost-effectiveness. The report also addresses policy and program barriers that affect the ability to bring the PSH and other housing models to scale to address housing and health care needs.

Handbook on the Crime Prevention

Guidelines Penguin

How policing became the major political issue of our time Combining firsthand accounts from activists with the research of scholars and reflections from artists, *Policing the Planet* traces the global spread of the broken-windows policing strategy, first established in New York City under Police Commissioner William Bratton. It's a doctrine that has vastly broadened police power the world over—to deadly effect. With contributions from #BlackLivesMatter cofounder Patrisse Cullors, Ferguson activist and Law Professor Justin Hansford, Director of New York-based Communities United for Police Reform Joo-Hyun Kang, poet Martín Espada, and journalist Anjali Kamat, as well as articles from leading scholars Ruth Wilson Gilmore, Robin D. G. Kelley, Naomi Murakawa, Vijay Prashad, and more, *Policing the Planet* describes ongoing struggles from New York to Baltimore to Los Angeles, London, San Juan, San Salvador, and beyond.

Planet of Slums Routledge

"One of the more momentous books of the decade." —The New York Times Book Review Nate Silver built an innovative system for predicting baseball performance, predicted the 2008 election within a hair's breadth, and became a national sensation as a blogger—all by the time he was thirty. He solidified his standing as the nation's foremost political forecaster with his near perfect prediction of the 2012 election. Silver is the founder and editor in chief of the website FiveThirtyEight. Drawing on his own groundbreaking work, Silver examines the world of prediction, investigating how we can distinguish a true signal from a universe of noisy data. Most predictions fail, often at great cost to society, because most of

us have a poor understanding of probability and uncertainty. Both experts and laypeople mistake more confident predictions for more accurate ones. But overconfidence is often the reason for failure. If our appreciation of uncertainty improves, our predictions can get better too. This is the “prediction paradox”: The more humility we have about our ability to make predictions, the more successful we can be in planning for the future. In keeping with his own aim to seek truth from data, Silver visits the most successful forecasters in a range of areas, from hurricanes to baseball to global pandemics, from the poker table to the stock market, from Capitol Hill to the NBA. He explains and evaluates how these forecasters think and what bonds they share. What lies behind their success? Are they good—or just lucky? What patterns have they unraveled? And are their forecasts really right? He explores unanticipated commonalities and exposes unexpected juxtapositions. And sometimes, it is not so much how good a prediction is in an absolute sense that matters but how good it is relative to the competition. In other cases, prediction is still a very rudimentary—and dangerous—science. Silver observes that the most accurate forecasters tend to have a superior command of probability, and they tend to be both humble and hardworking. They distinguish the predictable from the unpredictable, and they notice a thousand little details that lead them closer to the truth. Because of their appreciation of probability, they can distinguish the signal from the noise. With everything from the health of the global economy to our ability to fight terrorism dependent on the quality of our predictions, Nate Silver’s insights are an essential read.

Affective Trajectories Gale Cengage

An A-Z guide to Witwatersrand. Streets, suburbs and places of interest are indexed.

Guide to Municipal Finance Criminal Justice Handbook

This critically acclaimed reference provides biographical and career details on notable African Americans, including leaders from sports, the arts, business, religion, and more.

Devoted to recording the scope of African American achievement, reference provides biographical and career details on more than 20,000 notable African American individuals, including leaders from sports, the arts, business, religion and more. An obituary section contains fully updated entries for listees who have died since the previous edition.

The Signal and the Noise Calibre Press

An annual biographical dictionary, with which is incorporated "Men and women of the time."

Peace, Human Security and Conflict Prevention in Africa National Academies Press

Building on global interest in migration development, the volume draws attention to one of the most important migration systems in sub-Saharan Africa. It reviews South Africa’s approach to international migration in the post-apartheid period from a regional development perspective, highlighting key policy issues, debates, and consequences. The authors find at least three areas where migration is resulting in important development impacts. First, by offering options to those affected by conflict and crises in a region that has limited formal disaster management and social protection systems. Second, by

mitigating shortcomings and distortions in regional labour markets. Third, by providing support to struggling rural economies and ever expanding urban areas in terms of livelihoods and social capital transfers. Chapter One consists of a study of the country's historical experience of migration and, in particular, analyses the changes in official attitudes throughout the twentieth century, indicating the roots of contemporary ideas and policy dilemmas. Chapters Two, Three, Four and Five complement this analysis of the South African State's capacity to reform and manage the South African migration situation by looking at often neglected dimensions: the first explores the question of skilled labour, a crucial question given the unbalanced structure of the South African labour market; the second examines the impact of migration on local government in South African cities and specifically implications for urban planning, service delivery, health, security, and political accountability; the third analyses the nature of undocumented migration to South Africa and the challenges it raises to both State and non-State actors; The book concludes with an examination of health as a critical issue when examining the relationship between migration and development in South Africa, in light of recent empirical data.

Crossing the Line: When Cops Become Criminals Gale Cengage

Enhancing Urban Safety and Security addresses three major threats to the safety and security of cities: crime and violence; insecurity of tenure and forced evictions; and natural and human-made disasters. It analyses worldwide trends with respect to each of these threats, paying particular attention to their underlying causes and impacts, as well

as to the good policies and best practices that have been adopted at the city, national and international levels in order to address these threats. The report adopts a human security perspective, concerned with the safety and security of people rather than of states, and highlights issues that can be addressed through appropriate urban policy, planning, design and governance. *Many Roads to Justice* John Wiley & Sons South African Survey 2001/2002 / South African Institute of Race Relations.

The Phone Book Lulu.com

This book attempts to convey some of the challenges that those wielding the law for social change purposes have faced and the successes they have achieved. By intention, it is more a studied appreciation than a critical analysis of their efforts. We asked an international team of consultants to help us document and describe how various law-based strategies have worked in very different settings, to draw out connections between those efforts, and to highlight some of the insights that emerge from grantees' experiences in law-related work. We also asked them to help us learn more about the ways the Foundation has played a role in these efforts. Known as the Global Law Programs Learning Initiative (GLPLI), this effort is not definitive, but rather suggestive. Our goal is to contribute to more serious future reflection and, ultimately, more effective programs in this field.

Contemporary Studies in Discrete Mathematics Simon and Schuster

While sharing some characteristics with other middle-income countries, South Africa is a country with a unique economic history and distinctive economic features. It is a regional economic powerhouse that plays a

significant role, not only in southern Africa and in the continent, but also as a member of BRICS. However, there has been a lack of structural transformation and weak economic growth, and South Africa faces the profound triple challenges of poverty, inequality, and unemployment. Any meaningful debate about economic policies to address these challenges needs to be informed by a deep understanding of historical developments, robust empirical evidence, and rigorous analysis of South Africa's complex economic landscape. This volume seeks to provide a wide-ranging set of original, detailed, and state-of-the-art analytical perspectives that contribute to scientific knowledge as well as to well-informed and productive discourse on the South African economy. While concentrating on the more recent economic issues facing South Africa, the handbook also provides historical and political context. It offers an in-depth examination of strategic issues in the country's key economic sectors, and brings together diverse analytical perspectives.

Contemporary Migration to South Africa

World Bank Publications
Urban regeneration is currently taking place in inner-city Johannesburg. This book presents an alternative, multi-layered account for reading the process of urban change and renewal. The provision of social and affordable housing and the spread of private security are explored through the lenses of neoliberal urbanism, gentrification, the privatisation of public space and revanchist policing. This book interrogates these concepts and challenges their assumptions based on new qualitative and ethnographic evidence emerging out of Johannesburg. Dated concepts in Critical Urban Studies

are re-evaluated and the book calls for an alternative, adaptable approach, focusing on how we develop a vocabulary and creative understanding of urban regeneration. This book is an outstanding contribution to theoretical and comparative approaches to understanding cities and processes of urban change. It offers practical insights and experiences which will be of considerable use to practitioners, policy-makers and urban planning students. Servamus National Academies Press
"What corporations fear most are consumers who ask questions. Naomi Klein offers us the arguments with which to take on the superbrands." Billy Bragg from the bookjacket.

The Police Academy Verso

The contributors to *Affective Trajectories* examine the mutual and highly complex entwinements between religion and affect in urban Africa in the early twenty-first century. Drawing on ethnographic research throughout the continent and in African diasporic communities abroad, they trace the myriad ways religious ideas, practices, and materialities interact with affect to configure life in urban spaces. Whether examining the affective force of the built urban environment or how religious practices contribute to new forms of attachment, identification, and place-making, they illustrate the force of affect as it is shaped by temporality and spatiality in the religious lives of individuals and communities. Among other topics, they explore Masowe Apostolic Christianity in relation to experiences of displacement in Harare, Zimbabwe; Muslim identity, belonging, and the global ummah in Ghana; crime, emotions, and conversion to neo-Pentecostalism in Cape Town; and spiritual cleansing in a Congolese branch of a Japanese religious

movement. In so doing, the contributors demonstrate how the social and material living conditions of African cities generate diverse affective forms of religious experiences in ways that foster both localized and transnational paths of emotional knowledge.
