We are inclined to see terrorist attacks as an aberration, a violent incursion into our lives that bears no intrinsic relation to the fundamental features of modern societies. But does this view misconstrue the relationship between terror and modernity? In this book, philosopher Donatella Di Cesare takes a historical approach and argues that terror is not a new phenomenon, but rather one that has always been a key part of modernity. At its most basic level, terrorism is about the struggle for power and sovereignty. The growing concentration of power in the hands of the state, which is a constitutive feature of modern societies, sows the seeds of terrorism, which is deployed as a weapon by those who are exposed to the violence of the state and feel that they have no other recourse. As Di Cesare illustrates her argument with examples ranging from the Red Brigades and 9/11 to jihadism and ISIS, her sophisticated analysis will appeal to anyone who wishes to understand contemporary terrorism more deeply, as well as to students and scholars of philosophy and political theory.

Most studies of immigration to the New World have focused on the United States. Samuel L. Baily's eagerly awaited book broadens that perspective through a comparative analysis of Italian immigrants to Buenos Aires and New York City before World War I. It is one of the few works to trace Italians from their villages of origin to different destinations abroad. Baily examines the adjustment of Italians in the two cities, comparing such factors as employment opportunities, skill levels, pace of migration, degree of prejudice, and development of the Italian community. Of the two destinations, Buenos Aires offered Italians more extensive opportunities, and those who elected to move there tended to have the appropriate education or training to succeed. These immigrants, who adjusted more rapidly than their North American counterparts, adopted a long-term strategy of investing savings in their New World home. In New York, in contrast, the immigrants found fewer skilled and white-collar jobs, more competition from previous immigrant groups, greater discrimination, and a less supportive Italian enclave. As a result, rather than put down roots, many sought to earn money as rapidly as possible and send their earnings back to family in Italy.

Baily views the migration process as a global phenomenon.

Building on his richly documented case studies, the author briefly examines Italian communities in San Francisco, Toronto, and Sao Paulo. He establishes a continuum of immigrant adjustment in urban settings, creating a landmark study in both immigration and comparative history.

Edgework brings together seven of Wendy Brown's most provocative recent essays in political and cultural theory. They range from explorations of politics post-9/11 to critical reflections on the academic norms governing feminist studies and political theory. Edgework is also concerned with the intellectual and political value of critique itself. It renders contemporary the ancient jurisprudential meaning of critique as *krisis*, in which a tear in the fabric of justice becomes the occasion of a public sifting or thoughtfulness, the development of criteria for judgment, and the inauguration of political renewal or restoration. Each essay probes a contemporary problem--the charge of being unpatriotic for dissenting from U.S. foreign policy, the erosion of liberal democracy by neoliberal political rationality, feminism's loss of a revolutionary horizon--and seeks to grasp the intellectual impasse the problem signals as well as the political incitement it may harbor.

How successful was Mussolini in creating a force of loyal and committed policemen to defend his regime and assist in the creation of a new fascist civilization? How far were the Italian police transformed under Mussolini, and how did policemen experience the dictatorship? This book examines Italy's regular police in the context of fascism's efforts to modernise and establish ideological control over the state. Contrasting the regime's idealised representations with the more humdrum realities of everyday practice, the book considers the impact of the dictatorship on the Italian police and their personnel. Presenting an inside perspective on fascist repression, it focuses particularly on recruitment, training and professionalism in the Interior Ministry Police, as well as officers' ideological orientation, working conditions and quality of life. This book will appeal to students and researchers in police history, Italian fascism and, more generally, conflict and oppression in the twentieth century. In this book the author moves beyond the time of clocks and calendars in order to study time as embedded in social interactions, structures, practices and knowledge, in artefacts, in the body, and in the environment. Adam suggests ways not merely to deconstruct but to reconstruct both common-sense and social science understanding.

This book examines one region of north-eastern Gaul around Metz in the period between the end of the Roman Empire and the accession of Charlemagne. It adopts a new, multi-disciplinary approach using all available evidence, both documentary and archaeological. It deals with a broad range of historical themes, and, by looking at the reasons behind the creation of different forms of evidence, it examines how the different facets of social organisation (ethnicity, gender, age and social hierarchy) were related intimately to each other and to contemporary settlement patterns of the region. As a result, it is argued that the Merovingian period was not one of slow 'transformation' from 'Roman' to 'medieval' but was one of constant, dynamic social change and diversity even between the recognised periods of dramatic upheaval.

This volume is the first of four that will provide some of the most significant, English-language articles on the historical development of the police institution. The articles included in this volume are broadly of two kinds. The first introduce some of the theoretical outlines that have been suggested for the origins and development of modern police institutions across Europe. The second explore the systems of enforcement, and the criticisms of them, that had emerged on the eve of the revolutionary upheavals which convulsed Europe and inflicted a terminal blow to the ancien rme at the close of the eighteenth century.

First published in 1899, "The School and Society "describes John Dewey's experiences with his own famous Laboratory School, started in 1896. Dewey's experiments at the Labora-tory School reflected his original social and educational philosophy based on American experience and concepts of democracy, not on European education models then in vogue. This forerunner of the major works shows Dewey's per-vasive concern with the need for a rich, dynamic, and viable society. In his introduction to this volume, Joe R. Burnett states Dewey's theme. Industrialization, urbanization, science, and technology have created a revolution the schools cannot ignore. Dewey carries this theme through eight chapters: The School and Social Progress; The School and the Life of the Child; Waste in Education; Three Years of the University Elementary School; The Psychology of Elementary Education; Froebel's Educa-tional Principles; The Psychology of Occupations; and the Development of Attention.
