This is an English translation of Tutor for

Playing the Flute (1791) by Johann George Tromlitz. The most explicit of the eighteenth-century tutors for flute-playing, it now serves as a record of instrumental practice as well as a useful guide to the performance of German

classical music. The Tutor covers all aspects of flute playing, including intonation, articulation, flute maintenance, posture and breathing, dynamics, ornaments, musical style, cadenzas, and the construction of the flute. This edition will be an indispensable manual for players of baroque and modern flutes, and the information it contains will be invaluable for all musicians, students, and specialists interested in the historically informed performance of German classical music. The text is annotated with critical notes and all of the original music examples are newly printed in modern notation. The volume also contains a fingering chart and a historical introduction.

This book aims to help beginners play the piccolo simply and easily. The book includes 36 piccolo diagrams with fingering positions, along with pitch names and staff notations and 36 illustrations of the fingering location on the piccolo itself. The piccolo is about half the size of a flute, and it sounds one octave higher. It plays the highest notes of the woodwind family. The piccolo also is a transposing instrument, and the

piccolo's sheet music is never written at the pitch it actually sounds. Instead, the piccolo sounds one octave higher than its written pitch. The musical notes in this book cover almost 3 octaves from D4 to C7 (written). The resulting sound on the piccolo is from D5 to C8. Here are the primary fingerings (basic charts). Note that the book does not include Trill or Tremolo fingerings. You can print and cut out the charts to use them as flash cards or mount them on a wall as posters. Each note here has its own piece of paper. One side of the page shows the connection between the dots and their fingering on a diagram, and the reverse side depicts the same fingering illustration on the piccolo itself. Under the piccolo pictures, you will also find the fingering combinations depicted with

the names of the keys. You may choose a style that is more understandable and comfortable for you. I hope these fingering charts will be a valuable visual aid for you and your kids or students. The size of the cut-out is 6.5x10 inches (16x25 cm).

Beginner's Book for the Flute Alfred Music

Teachers and flutists at all levels have praised Nancy Toff's *The Flute Book*, a unique one-stop guide to the flute and its music. Organized into four main parts--The Instrument, Performance, The Music, and Repertoire Catalog--the book begins with a description of the instrument and its making, offers information on choosing and caring for a flute, sketches a history of the flute, and discusses differences between members of the flute family. In the Performance section, readers learn about breathing, tone, vibrato, articulation, technique, style, performing, and recording. In the extensive analysis of flute literature that follows, Toff places individual pieces in historical context. The book ends with a comprehensive catalog of solo and chamber repertoire, and includes

appendices with fingering charts as well as lists of current flute manufacturers, repair shops, sources for flute music and books, and flute clubs and related organizations worldwide. In this Third Edition, Toff has updated the book to reflect technology's advancements--like new digital recording technology and recordings' more prevalent online availability--over the last decade. She has also accounted for new scholarship on baroque literature; recent developments such as the contrabass flute, quarter-tone flute, and various manufacturing refinements and experiments; consumers' purchase prices for flutes; and a thoroughly updated repertoire catalog and appendices.
