Drawing on extensive research in the archives of Russia and Uzbekistan, Douglas Northrop here reconstructs the turbulent history of a Soviet campaign that sought to end the seclusion of Muslim women. In Uzbekistan it focused above all on a massive effort to eliminate the heavy horsehair-and-cotton veils worn by many women and girls. This campaign against the veil was, in Northrop's view, emblematic of the larger Soviet attempt to bring the proletarian revolution to Muslim Central Asia, a region Bolsheviks saw as primitive and backward. The Soviets focused on women and the family in an effort to forge a new, "liberated" social order. This unveiling campaign, however, took place in the context of a half-century of Russian colonization and the long-standing suspicion of rural Muslim peasants toward an urban, colonial state. Widespread resistance to the idea of unveiling quickly appeared and developed into a broader anti-Soviet animosity among Uzbeks of both sexes. Over the next quarter-century a bitter and often violent confrontation ensued, with battles being waged over indigenous practices of veiling and seclusion. New local and national identities coalesced around these very practices that had been placed under attack. Veils became powerful anticolonial symbols for the Uzbek nation as well as important markers of Muslim propriety. Bolshevik leaders, who had seen this campaign as an excellent way to enlist allies while proving their own European credentials as enlightened reformers, thus inadvertently strengthened the seclusion of Uzbek women—precisely the reverse of what they set out to do. Northrop's fascinating and evocative book shows both the fluidity of Central Asian cultural practices and the real limits that existed on Stalinist authority, even during the ostensibly totalitarian 1930s.

An elegant new edition of Bernd and Hilla Becher's classic black-and-white photographic study of industrial buildings. During their 40-year career, Bernd and Hilla Becher created their own architectural typology as they photographed buildings in a unique style. Basic Forms represents the culmination of their career. Although the subject matter is unglamorous—mine shafts, blast furnaces, cooling towers, water towers, silos, and gas tanks—the Bechers' passion for their work imbues these photographs with beauty and solemnity. The Bechers restricted the conditions of each photograph—taking them early in the morning, on overcast days, so as to eliminate shadow and distribute light evenly. Each image is centered and frontally framed, its parallel lines set on an even plane. There are no human figures, nor are there birds in the sky. The result is a treasury of precisely functional architectural forms, a sublime example of conceptual artistic practices, and a series of "perfect sculptures of a bygone industrial age."

In the twentieth century paradigms of linguistics have largely left language change to one side. Rudi Keller's book is an exciting contribution to linguistic philosophy because it puts language change back on the linguistics agenda and demonstrates that, far from being a remote mystery, it can and should be explained.

Renowned German social historian Heide Wunder refers to the cosmic image contained in the 1578 Book of Marital Discipline that characterizes the relationship between husband and wife. Today, "He is the sun, she is the moon" might be interpreted as a hierarchy of dominance and subordination. At the time it was used, however, sun and moon reflected the different but equal status of husband and wife. Wunder shows how the history of women and the history of gender relations can provide crucial insights into how societies organize themselves and provide resources for political action. She observes actual circumstances as well as the normative rules that were supposed to guide women's lives. We learn what skills were necessary to take charge of households, what people ate, how they furnished their homes, what birth control measures were available, what role women played in peasant protest. Wunder finds that, in addition to the history of losses and setbacks for women observed by so many current interpreters, there is a history of gains as well. The regency of noble women was normal, as was the shared responsibility of wife and husband in a peasant household, an artisan's workshop, or a merchant's business. Using sources as diverse as memoirs, wedding and funeral sermons, novels, and chronicles, and including a wealth of demographic information, Wunder reveals a surprising new image of early modern women and provides a richer interpretation of early modern Europe.

Despite widespread persecution, Orthodox churches not only survived the Cold War period but levels of religiosity in Orthodox countries remained significant. This book examines the often surprising relations between Orthodox churches and political regimes. It provides a comprehensive overview of the dynamics between Eastern Christianity and politics from the end of the Second World War to the fall of communism, covering 40 Orthodox churches including diasporic churches in Africa, Asia, America and Australia. Based on research from recently-opened archives and publications in a wide range of European languages, it analyses church-state relations on both sides of the Iron Curtain. It discusses the following key themes: the relationship between Orthodox churches and political power; religious resistance to communism; the political control of churches; religion and propaganda; monasticism and theological publications; religious diplomacy within the Orthodox commonwealth; and religious contacts between East and West.

Max has been married to Tina for twenty-five years. She is the love of his life, but now he must come to terms with the fact that she is to spend a year away on a work assignment—away, for the first time, from their home, their children and their life together. Her absence leaves him feeling like an Odysseus in reverse: he stays put while his Penelope goes out into the world. Max, alone with his three teenage sons for the first time, is left contemplating life and the daily routine of the little bar of which he is the proprietor. As he spends more time with the regulars their problems begin to become his own. This new novel by Alex Capus is a hymn to trust, friendship and life's small pleasures. Told with his trademark humor, *Life is Good* is a novel about finding contentment in rootedness as the world speeds up.

The 21st century will most likely see even more revolutionary changes than the 20th, due to advances in science, technology and medicine. Particular areas where extraordinary and perhaps disruptive advances can be expected include biotechnology, nanotechnology, and machine intelligence. We may also expect various ways to enhance human cognitive and other abilities using, e.g., pharmaceuticals, genetic engineering or machine-brain interfaces - perhaps to the extent of changing human nature beyond what we currently think of as human. The potential benefits of all these technologies are enormous, but so are the risks, including the possibility of human extinction.

Industrie 4.0 and the Internet of Things have been positioned on the international stage as important initiatives of a promising future: Who is dealing in data from the digital factory? Germany has its "Plattform Industrie 4.0", China "Made in China 2025" and the USA the "Industrial Internet Consortium". Who is leading the fourth industrial revolution? The digitalization of industry is changing the global economy and society. Technology is supplying the opportunities to do so. Humans must decide just how far artificial intelligence should go, and what machines should learn - to create new and improved work instead of fewer jobs. In addition to Ulrich Sendler and eight German industry and research experts, the CEO of Xinhuanet in Beijing has also contributed to this book.

Religious organizations in many countries of the communist world have served as agents for the preservation, defense, and reinforcement of nationalist feelings, and in playing this role have frequently been a source of frustration to the Communist Party elites. Although the relationship between governments and religious groups varies according to the particular country and group in question, the mosaic of these relationships constitutes a revealing picture of the political reform shaping the lives of Soviet and East European citizens.

The first full-length study of same-sex love in any period of Russian or Soviet history, *Homosexual Desire in Revolutionary Russia* investigates the private worlds of sexual dissidents during the pivotal decades before and after the 1917 Bolshevik Revolution. Using records and archives available to researchers only since the fall of Communism, Dan Healey revisits the rich homosexual subcultures of St. Petersburg and Moscow, illustrating the ambiguous attitude of the late Tsarist regime and revolutionary rulers toward gay men and lesbians. *Homosexual Desire in Revolutionary Russia* reveals a world of ordinary Russians who lived extraordinary lives and records the voices of a long-silenced minority.

In *How to Be a Marxist in Philosophy* one of the most famous Marxist philosophers of the 20th century shares his concept of what it means to function fruitfully as a political thinker within the discipline and environs of philosophy. This is the first English translation to Althusser's provocative and, often, controversial guide to being a true Marxist philosopher. Althusser argues that philosophy needs Marxism. It can't exist fully without it. Similarly, Marxism requires the rigour and structures of philosophy to give it form and focus. He calls all thinking people to, 'Remember: a philosopher is a man who fights in theory, and when he understands the reasons for this fight, he joined the ranks of the struggle of workers and popular classes.' In short, this book comprises Althusser's elucidation of what praxis means and why it continues to matter. With a superb introduction from translator and Althusser archivist G.M. Goshgarian, this is a book that will re-inspire contemporary Marxist thought and reinvigorate our notions of what political activism can be.

It is widely accepted that English is the first truly global language and lingua franca. Anna Wierzbicka, the distinguished linguist known for her theories of semantics, has written the first book that connects the English language with what she terms "Anglo" culture. Wierzbicka points out that language and culture are not just interconnected, but inseparable. She uses original research to investigate the "universe of meaning" within the English language (both grammar and vocabulary) and places it in historical and geographical perspective. This engrossing and fascinating work of scholarship should appeal not only to linguists and others concerned with language and culture, but the large group of scholars studying English and English as a second language.

"[Van de Wetering] is doing what Simenon might have done if Albert Camus had sublet his skull."

—John Leonard On a quiet street in downtown Amsterdam, a man is found hanging from the ceiling

beam of his bedroom, upstairs from the new religious society he founded: a group that calls itself "Hindist" and supposedly mixes elements of various Eastern traditions. Detective-Adjutant Gripstra and Sergeant de Gier of the Amsterdam police are sent to investigate what looks like a simple suicide, but they are immediately suspicious of the circumstances. This now-classic novel, first published in 1975, introduces Janwillem van de Wetering's lovable Amsterdam cop duo of portly, wise Gripstra and handsome, contemplative de Gier. With its unvarnished depiction of the legacy of

Dutch colonialism and the darker facets of Amsterdam's free drug culture, this excellent procedural asks the question of whether a murder may ever be justly committed.
