From the perspective of Positive Youth Development (PYD), young people are understood to embody potential, awaiting development. Involvement with sport provides a developmental context that has been associated with PYD, but negative outcomes can also arise from sport participation and school PE. Sport itself does not lead to PYD; rather, it is the manner in which sport is structured and delivered to children that influences their development. *Positive Youth Development Through Sport* fills a void in the literature by bringing together experts from diverse disciplines to critically examine the ways in which sport can be and has been used to promote youth development.
