From the complex city-planning game SimCity to the virtual therapist Eliza: how computational processes open possibilities for understanding and creating digital media. What matters in understanding digital media? Is looking at the external appearance and audience experience of software enough—or should we look further? In *Expressive Processing*, Noah Wardrip-Fruin argues that understanding what goes on beneath the surface, the computational processes that make digital media function, is essential. Wardrip-Fruin looks at “expressive processing” by examining specific works of digital media ranging from the simulated therapist Eliza to the complex city-planning game SimCity. Digital media, he contends, offer particularly intelligible examples of things we need to understand about software in general; if we understand, for instance, the capabilities and histories of artificial intelligence techniques in the context of a computer game, we can use that understanding to judge the use of similar techniques in such higher-stakes social contexts as surveillance.

In the slums of Beggartown outside of Riverton, people frequently go missing, never to be heard from again. However, this time, a halfling family has been kidnapped and someone powerful wants them rescued. Thanks to your connections, you have been tasked with locating the kidnapper's hideout, infiltrating it, and rescuing the missing family. Problem is, everyone is pretty sure that gnolls are to blame... Against the Slavers is the second part of the Shadows of Riverton adventure path and is designed to be played during the course of two or three four-hour sessions. The scenario can also be run as a standalone adventure in your sandbox campaign as it can easily be adapted for use with any campaign setting. BDKR1: the Unofficial Living Greyhawk Bandit Kingdoms Summary High fantasy, Epic adventure, the power of a simple choice.

Kialessa is different. She has horns. She has a tail. She doesn't burn. With all this difference how will she find a way to fit in a world that doesn't seem to want her? On the other hand, perhaps being different is just what the world desperately needs? The book is already receiving great feedback from its young readers. Karlie, a young fan of fantasy and superheroes stories, called it "just as good as Harry Potter." Emily, an avid reader said, "it was un-put-downable." The Tae'anaryn is intended to be a 'thinking' book that discusses challenging issues children face daily, set at the safe distance of a fantasy setting. "This book is not only entertaining, it is helpful," says Dr Joe. "How do you deal with the challenges of facing a new school, especially if you looked or believed very differently from everyone else there? How do you find the purpose of your life in particular? How can you promote the changes in your life that you need? This book deals with these kinds of big questions so often brushed over in our busy lives, but we can learn a lot from fantasy literature, and have a great time doing it!" Dr Joe has a lifelong passion for philosophy, science, and fantasy, having written academic papers for the international journal of science education as well as award winning fantasy for the Dungeons & Dragons Living Greyhawk fantasy campaign setting. "I took your book home and read it and I think it is fabulous. In the beginning it looked like a regular young person's story about school bullies and then the story really took off when the space ship took off. I love the creatures and worlds you created. I think you have managed to combine the science into it in a really good way. It does not slow the story down but adds an extra dimension to the story for those that want it. I think it would make an exciting movie too." - Nikki, Self published author. SoR2: Against the Slavers

As with most adventure modules, this one is packed with action...confrontation and combat. There is more, though. The players must think, as must their game personas. There is sufficient problem solving herein to suit most, even hardened veterans. The same is true for being "in character," and role-playing with proper dialog-comedic, dramatic, and the rest are all possible here. As for the other elements of the game form, well, only unless you, the Game Master, wish to work them in will they be found. The adventure doesn't include much in the way of

extensive exploration, as you'll see, although there are many unique and wonderful places to visit. Business, intrigue, politics, and so forth are not likely given the setting, save for innovative addition to the work. As for story, other than the backstory that opens the adventure, that must await the conclusion of the action, can then be told as a tale of what occurred. This is for gaming, not stage presentation, after all. This adventure is suitable for a party of six d20 adventurers of 8th or greater level. If the party is to be given a free hand in deciding the order in which the panes are accessed then a few of the characters should

be of the 9th or 10th level. With just a little work of the GM's part characters of 11th-14th level could adventure here-simply increase the number of monsters encountered, add extra levels to the NPCs, or place horrific guardian creatures here and there as pickets for the areas already detailed.
