This Student Edition of

Brecht's classic

dramatisation of the

conflict over possession of

a child features an

extensive introduction

and commentary that

includes a plot summary,

discussion of the context,

themes, characters, style

and language as well as

questions for further

study and notes on words

and phrases in the text. It

is the perfect edition for

students of theatre and

literature. Brecht projects

an ancient Chinese story

onto a realistic setting in

Soviet Georgia. In a

theme that echoes the  
Judgment of Solomon, two  
women argue over the

possession of a child;

thanks to the unruly

judge, Azdak (one of

Brecht's most vivid

creations) natural justice

is done and the peasant

Grusha keeps the child

she loves, even though

she is not its mother.

A researcher's decision

about the sample to draw

in a study may have an

enormous impact on the

results, and it rests on

numerous statistical and

practical considerations

that can be difficult to

juggle. Computer

programs help, but no

single software package

exists that allows

researchers to determine

sample size across all

statistical procedures.

This pocket guide shows

social work students,

educators, and

researchers how to

prevent some of the

mistakes that would result from a wrong sample size decision by describing and critiquing four main approaches to determining sample size. In concise, example-rich chapters, Dattalo covers sample-size determination using power analysis, confidence intervals, computer-intensive strategies, and ethical or cost considerations, as well as techniques for advanced and emerging statistical strategies such as structural equation modeling, multilevel analysis, repeated measures MANOVA and repeated measures ANOVA. He also offers strategies for mitigating pressures to increase sample size when doing so may not be feasible. Whether as an introduction to the process for students or as a refresher for experienced researchers, this practical guide is a perfect overview of a crucial but often overlooked step in empirical social work research.

The major reason of mass exile being mal-governance, this book vividly shows the yawning

gap between African people and their leaders. It exposes most African leaders who bear more allegiance to their bank balances than to their country, the constitution, the flag, and their peoples future. Using my experience as a journalist for over 48 years, covering major events in Ethiopia/Africa, I have tried to bring a close-up portrait of the problems in Ethiopia, and more broadly the horn of Africa and the continent as a whole. This book illuminates the root causes of mass exile, the major problems in Ethiopia, and how that links back to the lack of freedom of expression. I have tried to situate current events in a larger historical backdrop by paraphrasing, summarizing, and quoting from historians excerpts, using description and analysis, part political travelogue, part contemporary history to bring the region to life, and answer one key question. Why so many Ethiopians are going in mass exile? The purpose of this book is to demonstrate the economic, political, social and environmental causes of human migration out of Ethiopia/Africa. It is an

invitation for discourse, to explain, engage and encourage all those concerned in the fate of Africa to wrestle with the challenges facing the continent today, without being burdened by a troubled past or daunted by a challenging future.

"The second edition of the Global Education Monitoring Report (GEM Report) presents the latest evidence on global progress towards the education targets of the UN Sustainable Development Goals. With hundreds of millions of people still not going to school, and many not achieving minimum skills at school, it is clear education systems are off track to achieve global goals. The marginalized currently bear the most consequences but also stand to benefit the most if policy-makers pay sufficient attention to their needs. Faced with these challenges, along with tight budgets and increased emphasis on results-oriented value for money, countries are searching for solutions. Increased accountability often tops the list. The 2017/8 GEM Report shows the entire array of approaches to accountability in education. It ranges from countries unused to the

concept, where violations of the right to education go unchallenged, to countries where accountability has become an end in itself instead of a means to inclusive, equitable and high-quality education and lifelong learning for all. The report emphasizes that education is a shared responsibility. While governments have primary responsibility, all actors - schools, teachers, parents, students, international organizations, private sector providers, civil society and the media ó3 have a role in improving education systems. The report emphasized the importance of transparency and availability of information but urges caution in how data are used. It makes the case for avoiding accountability systems with a disproportionate focus on narrowly defined results and punitive sanctions. In an era of multiple accountability tools, the report provides clear evidence on those that are working and those that are not."--Back cover.

Washback refers to the influence of language testing on teaching and learning. This volume, at the important intersection of language testing and teaching practices, presents theoretical, methodological, and practical guidance for current and future washback studies. In the field of language testing, researchers' major interest has traditionally been focused on issues and solving problems inherent in tests in order to increase their reliability

and validity. However, the washback effect goes well beyond the test itself to include factors, such as curriculum, teacher and learner behaviors inside and outside the classroom, their perceptions of the test, and how test scores are used. Only recently have researchers started to empirically investigate the phenomenon of washback. This volume of such research serves two essential purposes by:

- \*providing an overview of the complexity of washback and the various contextual factors entangled within testing, teaching, and learning;
- and \*presenting empirical studies from around the world that offer insights into the effects of washback in specific educational contexts and models of research on which future studies can be based.

The extensive use of test scores for various educational and social purposes in society nowadays makes the washback effect a high-interest phenomenon in the day-to-day educational activities of teachers, researchers, program coordinators/directors, policymakers, and others in the field of education.

Washback in Language

Testing: Research Contexts and Methods is a valuable resource for those who are interested in the application of findings to actual teaching and learning situations or conduct washback research in their own contexts, including educational and psychological testing experts, as well as alternative assessment people in all fields, and for policy- and decision-makers in educational and testing organizations.

The Sold Nation is a fictional story based on the ongoing reality in the contemporary Ethiopia. The novel begins with the students at Addis Ababa university at their Social Science Compass and ends in the great hall of the national palace of the country. The Sold Nation exhibits the trying struggle of the students of the said university and some of their professors to help the country get rid of the "so-called" identity politics, which has messed up the texture of the country as a united sovereign nation. The characters along with their respective settings

are well constructed. They represent the various colors and odors of the nation and the aspiration of its citizens for the period the identity-based politics have been ruling the nation. The various conflicts between and among the characters are very well constructed. The plot is so strong and tense. It is very involving. It could simply capture the attention of the readers and drive them all the way to the end at one sitting. The language is attractive and enchanting to the mind. It is full of figurative speeches, well written expressions. This novel is a must to read novel, if you would like to apprehend the suffrage that the said politics has wedged on the citizens of Ethiopia. It is a worth reading.

 This book discusses reforms that should be undertaken in secondary education to support Ethiopia's transition from a low- to middle-income economy. The most

critical reform identified is the introduction of a flexible curriculum that serves the needs of all students, including those who may not pursue higher education. Drum Heinemann Erstmals wird hier die Fülle der englischsprachigen Athiopienliteratur geordnet dargeboten. In 100 Sections führt der Autor alle für die wissenschaftliche Beschäftigung mit Athiopien wichtigen Buch- und Zeitschriftenbeiträge zum Beispiel zur "History of Research", "Archaeology", "Religion", aber auch Fragen der "Sociology", "Agriculture", "Zoology" und "Medical Sciences" auf. Wie im Falle der deutschsprachigen Literatur ("Bibliographia Aethiopica: Die athiopienkundliche Literatur des

deutschsprachigen Raumes" = Aethiopistische Forschungen 9 [1982]) berücksichtigt der Autor auch alle ihm zugänglichen Besprechungen, womit bei einer Aufnahme von mehr als 24.000 Titeln eine Art "Bibliographic Encyclopedia" entstanden ist. Continuity and Change Peterson's A critical and accessible text, this book provides a foundation for translanguaging theory and practice with educating emergent bilingual students. The product of the internationally renowned and trailblazing City University of New York-New York State Initiative on Emergent Bilinguals (CUNY-NYSIEB), this book draws on a common vision of translanguaging to present different

perspectives of its practice and outcomes in real schools. It tells the story of the collaborative project's positive impact on instruction and assessment in different contexts, and explores the potential for transformation in teacher education. Acknowledging oppressive traditions and obstacles facing language minoritized students, this book provides a pathway for combatting racism, monolingualism, classism and colonialism in the classroom and offers narratives, strategies and pedagogical practices to liberate and engage emergent bilingual students. This book is an essential text for all teacher educators, researchers, scholars, and students in TESOL and bilingual education, as well as educators working with language minoritized students.
