Nursing in a New Era
AOSIS

A guide to using the
Internet for job-

hunting. It demonstrates how to get your details ready, covering online applications, scannable CVs, email and e-form CVs, email attachments and posting online. It shows how to find jobs on the Net, including how to use search engines and directories, trade and specialist sites, job sites and recruitment companies, newspaper classifieds and company sites. The readers should learn how to apply online by marketing themselves, and there are self-tests and careers advice.

Nursing Research

ABRAMS

Higher Education in South Africa should be of considerable interest to higher education researchers outside of South Africa, as well as within, for the general

and comparative assessments it makes. The South African higher education researchers included within its covers have clearly engaged with research and writing from many parts of the world, which they have then applied to make sense of their own condition. - Malcolm Tight Lancaster University, UK
Horizon UNESCO Publishing
 This book focuses on how to improve the quality of jobs and meet the aspirations of youth in Sub-Saharan Africa. It finds that a strong foundation for human capital development can be key to boosting earnings, arguing for a balanced approach that builds skills and demand for labor.

The contribution that this book makes to scholarship is regarded as ground-breaking, as it is based on recent research conducted with teachers on the ground-level, as well as on research and experiences of practitioners, gained over many years. In this volume, Understanding education for the visually impaired, the focus falls on understanding visual impairment within the South African context, more specifically on what the education of these learners entails. In addition to the contribution to existing literature in the fields of inclusive education and visual impairment,

the publication has practical application value for teachers and practitioners who work with and support such learners.

SAMJ World Bank Publications
Skills shortages in South Africa are widely seen as a major obstacle to the achievement of targeted economic growth rates. Yet there is some dispute as to the nature and extent of these shortages, given the large number of unemployed graduates. The case studies presented here explore the question of shortage in nine key professions and artisanal trades, and find evidence of skills scarcity in most fields. The case studies provide insight into the reasons for shortages and surpluses in

relation to South Africa's own context and history. They also consider the international market for knowledge and skills, in which South African qualifications are highly prized. The monograph emanates from a study on sector specific research and related skills requirements commissioned by the South African Department of Labour in 2006. It formed part of a wider research project on scarce and critical skills related to the National Skills Development Strategy and the National Industrial Policy Framework of 2007, for which the Human Sciences Research Council led a research consortium comprising the Development Policy Research Unit at

the University of Cape Town and the Sociology of Work Unit at the University of the Witwatersrand.

Restructuring for Sustainability How To Books

Insurgent citizenships have arisen in cities around the world. This book examines the insurgence of democratic citizenship in the urban peripheries of São Paulo, Brazil, its entanglement with entrenched systems of inequality, and its contradiction in violence. James Holston argues that for two centuries Brazilians have practiced a type of citizenship all too common among nation-states--one that is universally inclusive in national membership and

massively inegalitarian in distributing rights and in its legalization of social differences. But since the 1970s, he shows, residents of Brazil's urban peripheries have formulated a new citizenship that is destabilizing the old. Their mobilizations have developed not primarily through struggles of labor but through those of the city--particularly illegal residence, house building, and land conflict. Yet precisely as Brazilians democratized urban space and achieved political democracy, violence, injustice, and impunity increased dramatically. Based on comparative, ethnographic, and historical research, *Insurgent Citizenship* reveals why the

insurgent and the entrenched remain dangerously conjoined as new kinds of citizens expand democracy even as new forms of violence and exclusion erode it. Rather than view this paradox as evidence of democratic failure and urban chaos, *Insurgent Citizenship* argues that contradictory realizations of citizenship characterize all democracies--emerging and established. Focusing on processes of city- and citizen-making now prevalent globally, it develops new approaches for understanding the contemporary course of democratic citizenship in societies of vastly different cultures and histories. "UNESCO has recently published the third volume of its Education on the Move series, a series dedicated to the analysis of key trends in education with the hope of inspiring dialogue among policy makers, educators and other key stakeholders on the challenges of education for tomorrow. The latest publication, entitled Unleashing the Potential: Transforming Technical and Vocational Education and Training is focused entirely on issues related to technical

and vocational education and training (TVET). It takes stock of the steadily increasing demands and expectations on TVET systems around the globe and presents recent policy trends in the field of TVET. In their analysis, the authors provide insights into what it takes to unleash the potential of TVET systems around the world. They propose an integrated analytical approach that takes into consideration such factors as economic growth, social equity and issues related to sustainability so that TVET can contribute more effectively to contemporary policy issues such as youth unemployment, gender disparities and climate change. Overall, the book calls for a

transformation of TVET systems to enable them to respond to the demands of their contexts. This transformation should enable TVET systems to acquire agility to stay current and responsive to the rapidly changing demands of the twenty-first century."-- Publisher's website.

"An extraordinary profile of immense courage and daring."—Chanel Cleeton, New York Times bestselling author of *Before We Left Cuba* "If you only read one WWII book this year, make it this one."—Natasha Lester, New York Times bestselling author of *The Paris Orphans* In the depths of war, she would defy the odds to

help liberate a nation...a gripping historical novel based on the remarkable true story of World War II heroine Virginia Hall, from the bestselling author of Hemingway's *Girl in the Sun* (1944). Virginia Hall wasn't like the other young society women back home in Baltimore—she never wanted the debutante ball or silk gloves. Instead, she traded a safe life for adventure in Europe, and when her beloved second home is thrust into the dark days of war, she leaps in headfirst. Once she's recruited as an Allied spy, subverting the Nazis becomes her calling. But even the most cunning agent can be bested, and in wartime trusting the wrong person can prove fatal. Virginia is

haunted every day by the betrayal that ravaged her first operation, and will do everything in her power to avenge the brave people she lost. While her future is anything but certain, this time more than ever Virginia knows that failure is not an option. Especially when she discovers what—and whom—she's truly protecting.

Our Future Edward Elgar Publishing
The Ontario Round Table on Environment and Economy was established with members from government, business, the native community, industry, academia and environmental groups. This paper gives recommendations for greening Ontario's economy, improving

decision-making, allowing citizens to take a full and active part in restructuring for sustainability, ensuring accountability, and dealing with global warming.

Annual Report

RainbowSA

This powerful volume represents the broadest engagement with disability issues in South Africa yet. Themes include theoretical approaches to, and representations of, disability; governmental and civil society responses to disability issues; aspects of education as these pertain to the oppression/liberation of disabled people; social security for disabled people; the complex politics permeating service provision relationships; and a consideration of

disability in relation to human spaces - physical, economic and philosophical. Firmly located within the social model of disability, this collection resonates powerfully with contemporary thinking and research in the disability field and sets a new benchmark for cutting-edge debates in a transforming South Africa.

This joint OECD-ILO publication provides guidance on how local and regional governments can foster business-education partnerships in apprenticeship programmes and other types of work-based

learning, drawing on case studies across nine countries. There has been increasing interest in apprenticeships which combine on the job training with classroom-based study, providing a smooth transition from school to work. There are benefits to both individuals and employers from participating in apprenticeships, including increased productivity and job quality. Successful implementation is contingent on having a high level of employer engagement at the local level, notably in the design, development and delivery of programmes.

Nurses are often said to be the backbone of health services, but in South Africa their

profession itself is in need of care. This monograph considers the profile, image and status of nursing today and the nature and role of nursing education. A major concern is that, although nursing still attracts many more students than there are places available, the gap between the large numbers who complete their training and the relatively small growth in the professional registers, indicates high attrition rates. The decline in the role of the public sector in the training of nurses is another worrying trend.

Finding Voice Penguin

A beautifully illustrated picture book biography of Mary Anning that will enlighten children about the discovery of the dinosaurs and the

importance of female scientists, perfect for fans of *The Girl Who Thought in Pictures* Mary Anning loved scouring the beach near her home in England for shells and fossils. She fearlessly climbed over crumbling cliffs and rocky peaks, searching for new specimens. One day, something caught Mary's eye. *Bones. Dinosaur Bones.* Mary's discoveries rocked the world of science and helped create a brand-new field of study: paleontology. But many people believed women couldn't be scientists, so Mary wasn't given the credit she deserved. Nevertheless, Mary kept looking and

learning more, making discoveries that reshaped scientific beliefs about the natural world. Educational backmatter includes a timeline of Mary Anning's life and lots of fantastic fossil facts! The perfect choice for parents and teachers looking for: Dinosaur books for kids 5-7 and kids books about fossils Feminist picture books about historical women, and daring books for girls Kids STEM books *Defence Technology Made Easy* Sourcebooks, Inc. **Engaging Employers in Apprenticeship Opportunities** **Drum** *Higher Education in South Africa*
