Described by Thomas Mann as "e;brothers in spirit, but tragically grotesque companions in misfortune,"e; Nietzsche and Dostoevsky remain towering figures in the intellectual development of European modernity. Maia Johnson-Stepenberg's accessible new introduction to these philosophers compares their writings on key topics such as criminality, Christianity, and the figure of the "e;outsider"e; to reveal the urgency and contemporary resonance of their shared struggle against nihilism. *Against Nihilism* also considers nihilism in the context of current political and social struggles, placing Nietzsche and Dostoevsky's contributions at the heart of important contemporary debates regarding community, identity, and meaning. Inspired by class discussions with her students and aimed at first-team readers of

Nietzsche and Dostoevsky, *Against Nihilism* provides an accessible, unique comparative study of these two key thinkers. *The Enemy Within* Createspace Independent Publishing Platform The Melancholy Science is Gillian Rose's investigation into Theodor Adorno's work and legacy. Rose uncovers the unity discernable among the many fragments of Adorno's oeuvre, and argues that his influence has been to turn Marxism into a search for style. The attempts of Adorno, Lukács and Benjamin to develop a Marxist theory of culture centred on the concept of reification are contrasted, and the ways in which the concept of reification has come to be misused are exposed. Adorno's continuation for his own time of the Marxist critique of philosophy is traced through his writings on Hegel, Kierkegaard, Husserl and Heidegger. His opposition to the separation of philosophy and sociology is shown by examination of his critique of Durkheim and Weber, and of his contributions to the dispute over positivism, his critique of empirical social research and his own empirical sociology. Gillian Rose shows Adorno's most important

contribution to be his founding of a Marxist aesthetic that offers a sociology of culture, as demonstrated in his essays on Kafka, Mann, Beckett, Brecht and Schönberg. Finally, Adorno's 'Melancholy Science' is revealed to offer a 'sociology of illusion' that rivals both structural Marxism and phenomenological sociology as well as the subsequent work of the Frankfurt School.

Winner of the 2018 National Book Critics Circle Award for Criticism A New York Times Notable Book From Zadie Smith, one of the most beloved authors of her generation, a new collection of essays Since she burst spectacularly into view with her debut novel almost two decades ago, Zadie Smith has established herself not just as one of the world's preeminent fiction writers, but also a brilliant and singular essayist. She contributes regularly to The New Yorker and the New York Review of Books on a range of subjects, and each piece of hers is a literary event

in its own right. Arranged into five sections--In the World, In the Audience, In the Gallery, On the Bookshelf, and Feel Free--this new collection poses questions we immediately recognize. What is The Social Network--and Facebook itself--really about? "It's a cruel portrait of us: 500 million sentient people entrapped in the recent careless thoughts of a Harvard sophomore." Why do we love libraries? "Well-run libraries are filled with people because what a good library offers cannot be easily found elsewhere: an indoor public space in which you do not have to buy anything in order to stay." What will we tell our granddaughters about our collective failure to address global warming? "So I might say to her, look: the thing you have to appreciate is that we'd just been through a century of relativism and deconstruction, in which we were informed that most of our fondest-held principles were either uncertain or simple wishful thinking, and in many areas of our lives we had already been asked to accept that nothing is essential and everything changes--and this had taken the fight out of us somewhat." Gathering in one place for the first time previously unpublished work, as well as already classic essays, such as, "Joy," and, "Find Your Beach," Feel Free offers a survey of important recent events in culture and politics, as well as Smith's own life. Equally at home in the world of good books and bad politics, Brooklyn-born rappers and the work of Swiss novelists, she is by turns wry, heartfelt, indignant, and incisive--and never any less than perfect company. This is literary journalism at its zenith. Zadie Smith's new book, *Grand Union*, is on sale 10/8/2019.

The Spectre Bride Wizards of the Coast

We live in catastrophic times. The world is reeling from the

deepest economic crisis since the Great Depression, with the threat of further meltdowns ever-looming. Global warming and myriad dire ecological disasters worsen—with little if any action to halt them—their effects rippling across the planet in the shape of almost biblical floods, fires, droughts, and hurricanes. Governments warn that there is no alternative to the bitter medicine they prescribe—or risk devastating financial or social collapse. The right, whether religious or secular, views the present as catastrophic and wants to turn the clock back. The left fears for the worst, but hopes some good will emerge from the rubble. Visions of the apocalypse and predictions of impending doom abound. Across the political spectrum, a culture of fear reigns. Catastrophism explores the politics of apocalypse—on the left and right, in the environmental movement—and examines why the lens of catastrophe can distort our understanding of the dynamics at the heart of these numerous disasters—and fatally impede our ability to transform the world. Lilley, McNally, Yuen, and Davis probe the reasons why catastrophic thinking is so prevalent, and challenge the belief that it is only out of the ashes that a better society may be born. The authors argue that those who care about social justice and the environment should jettison doomsaying—even as it relates to indisputably apocalyptic climate change. Far from calling people to arms, they suggest, catastrophic fear often results in passivity and paralysis—and, at worst, reactionary politics.?

From the author of the masterpiece *All Quiet on the Western Front*, *The Black Obelisk* is a classic novel of the troubling aftermath of World War I in Germany. A hardened young veteran

from the First World War, Ludwig now works for a monument company, selling stone markers to the survivors of deceased loved ones. Though ambivalent about his job, he suspects there's more to life than earning a living off other people's misfortunes. A self-professed poet, Ludwig soon senses a growing change in his fatherland, a brutality brought upon it by inflation. When he falls in love with the beautiful but troubled Isabelle, Ludwig hopes he has found a soul who will offer him salvation—who will free him from his obsession to find meaning in a war-torn world. But there comes a time in every man's life when he must choose to live—despite the prevailing thread of history horrifically repeating itself. "The world has a great writer in Erich Maria Remarque. He is a craftsman of unquestionably first rank, a man who can bend language to his will. Whether he writes of men or of inanimate nature, his touch is sensitive, firm, and sure."—The New York Times Book Review

Love and death walk hand in hand... Dr. Sebastian Robarts is a man paralyzed by the fate of his adored wife, dead in childbirth, their only child with her. He searches for a way to build angels from women, a pastime known to Scotland Yard as murder. Robarts meets the Vistani seer named Trueblood, who becomes his assistant and leads him to the Antebellum-era domain of Riverbend, controlled by the sadistic Dr. Weldon, to create angels, unfettered by conventional morality, or even rules. When the murderer returns to earth, it is the task of a Vistani policeman and a woman with a strange connection to Robarts to stop him. If he can be stopped. *Heaven's Bones* skillfully blends horror and steampunk and classic Victorian literary style into something

exotic and fascinating.

Rising temperatures and the rise of the far right. What disasters happen when they meet? In the first study of the far right's role in the climate crisis, *White Skin, Black Fuel* presents an eye-opening sweep of a novel political constellation, revealing its deep historical roots. Fossil-fuelled technologies were born steeped in racism. No one loved them more passionately than the classical fascists. Now right-wing forces have risen to the surface, some professing to have the solution—closing borders to save the nation as the climate breaks down. Epic and riveting, *White Skin, Black Fuel* traces a future of political fronts that can only heat up. [Diamonds are Forever](#) HMH

"After a combat incident in Iraq, Cal "Spectre" Martin was grounded and told he would never fly an F-16 again. Years later, he started a new civilian life with his F-16 pilot fiancée while being haunted by the nightmares of his last deployment. But when she goes missing on a routine training mission off the South Florida coast, Spectre unwillingly finds himself thrust back onto the frontlines of the war on terror - this time, not in the skies over Iraq, but on the streets of Miami. While searching for answers, Spectre uncovers a deadly international conspiracy that shakes his beliefs to the core and threatens national security. The stakes have never been higher as Spectre rises to overcome his inner demons, challenge his friendships, and take to the skies once again in a daring final mission"--Back cover.

White Skin, Black Fuel Wizards of the Coast

Extending the human life-span past 120 years. The "green" revolution. Evolution and human psychology. These subjects

make today's newspaper headlines. Yet much of the science underlying these topics stems from a book published nearly 140 years ago--Charles Darwin's *On the Origin of Species*. Far from an antique idea restricted to the nineteenth century, the theory of evolution is one of the most potent concepts in all of modern science. In Darwin's *Spectre*, Michael Rose provides the general reader with an introduction to the theory of evolution: its beginning with Darwin, its key concepts, and how it may affect us in the future. First comes a brief biographical sketch of Darwin. Next, Rose gives a primer on the three most important concepts in evolutionary theory--variation, selection, and adaptation. With a firm grasp of these concepts, the reader is ready to look at modern applications of evolutionary theory. Discussing agriculture, Rose shows how even before Darwin farmers and ranchers unknowingly experimented with evolution. Medical research, however, has ignored Darwin's lessons until recently, with potentially grave consequences. Finally, evolution supplies important new vantage points on human nature. If humans weren't created by deities, then our nature may be determined more by evolution than we have understood. Or it may not be. In this question, as in many others, the Darwinian perspective is one of the most important for understanding human affairs in the modern world. Darwin's *Spectre* explains how evolutionary biology has been used to support both valuable applied research, particularly in agriculture, and truly frightening objectives, such as Nazi eugenics. Darwin's legacy has been a comfort and a scourge. But it has never been irrelevant.

The castle of Hernswolf, at the close of the year 1655, was the resort of fashion and gaiety. The baron of that name was the most powerful nobleman in Germany, and equally celebrated for the patriotic achievements of his sons, and the beauty of his only daughter. The estate of Hernswolf, which was situated in the centre of the Black Forest, had been given to one of his ancestors by the gratitude of the nation, and descended with other hereditary possessions to the family of the present owner. It was a castellated, gothic mansion, built according to the fashion of the times, in the grandest style of architecture, and consisted principally of dark winding corridors, and vaulted tapestry rooms, magnificent indeed in their size, but ill-suited to private comfort, from the very circumstance of their dreary magnitude. A dark grove of pine and mountain ash encompassed the castle on every side, and threw an aspect of gloom around the scene, which was seldom enlivened by the cheering sunshine of heaven. A teenage girl goes to work for a chaotic family of Jewish immigrants, in a New York Times bestseller that's "a cause for celebration" (Ann Patchett). In the 1930s, New York is swarming with Europe's ousted dreamers, alien families adapting to a new world. Rose Meadows unknowingly enters the lives of one such family when she answers an ad for an "assistant" to a Herr Mitwisser, the patriarch of a large household living in an obscure little neighborhood, in a remote corner of the sparse and weedy northeast Bronx. With an uncertain future, and no clear idea of her duties, Rose— orphaned at eighteen and recently turned out by lover—has become a refugee among refugees. Expelled from Berlin's elite, Professor Mitwisser—a researcher obsessed with an arcane religious doctrine—lives with his wife, a prominent

physicist now quietly going mad, and Anneliese, their willful sixteen-year-old daughter. When Anneliese's fierce longing draws a new outcast into the fold—a vagrant actor running from fame—it's up to Rose to quell the emotional, sexual, spiritual, and societal tempests brewing within the Mitwissers unsettled home. Hailed by the New York Times as “the most accomplished and graceful literary stylist of our time,” Cynthia Ozick is a recipient of the National Book Critics Circle Award, the PEN/Nabokov Award and PEN/Malamud Award, and *Heir to the Glimmering World* is yet another triumph from the author of the National Book Award finalist *The Puttermesser Papers* and *Foreign Bodies*. “A heroine to love, a story we can't let go of, gorgeous sentences, and ideas to wrestle with. I didn't just read the book, I devoured.” —Ann Patchett

In the 1930s and '40s, the Ballets Russes de Monte Carlo toured the United States and the world, introducing many to ballet as an art form, while spreading the enduring image of the ballerina as

an embodiment of feminine grace and sophistication. This sumptuous, illustrated history tells the story of the rise of modern ballet and its popularity through the life story of one of ballet's most glamorous stars, Irina Baronova (1919–2008), prima ballerina for the Ballets Russes de Monte Carlo and later for Ballet Theatre in New York. Drawing on letters, correspondence, oral histories, and interviews, Baronova's daughter, the actress Victoria Tennant, warmly recounts Baronova's dramatic life, from her earliest aspirations to her grueling time on tour to her later years in Australia as a pioneer of the art. She begins with the Baronov family's flight from Russia during the Revolution, which led them to Romania and later Paris, where at the age of thirteen, Baronova became a star, chosen by the legendary George Balanchine to join the Ballets Russes, where she danced the lead in *Swan Lake*. Tennant provides an intimate account of Baronova's life as a dancer and rare behind-the-scenes stories of life on the road with the stars of the company. Spectacular photographs, a mix of archival images and family snapshots, offer many rare views of rehearsals, costumes, set designs, and the dancers themselves both at their most dazzling and in their most everyday. The story of Irina Baronova is also the story of the rise of ballet in America thanks to the Ballets Russes, who brought the magisterial beauty and star power of dance to big cities and small towns alike. Irina Baronova and the Ballet Russes de Monte Carlo offers a unique perspective on this history, sure to be treasured by dance patrons and aspiring stars.

Stuffocation is a movement manifesto for "experiential" living, a call to arms to stop accumulating stuff and start accumulating

experiences, and a road map for a new way forward with the potential to transform our lives. Reject materialism. Embrace experientialism. Live more with less. Stuffocation is one of the most pressing problems of the twenty-first century. We have more stuff than we could ever need, and it isn't making us happier. It's bad for the planet. It's cluttering up our homes. It's making us stressed—and it might even be killing us. A rising number of us are already turning our backs on all-you-can-get consumption. We are choosing access over ownership, and taking our business to companies like Zipcar, Spotify, and Netflix. Fed up with materialism, we are ready for a new way forward. Trend forecaster James Wallman traces our obsession with stuff back to the original *Mad Men*, who first created desire through advertising. He interviews anthropologists studying the clutter crisis, economists searching for new ways of measuring progress, and psychologists who link stuffocation to declining well-being. And he introduces us to the innovators who are already living more consciously and with more meaning by choosing experience over stuff. Experientialism does not mean giving up all of our possessions. It is a solution that is less extreme but equally fundamental. It's about transforming what we value. Stuffocation is a paradigm-shifting look at our habits and an inspiring call for living more with less. It's the one important book you won't be able to live without. Praise for *Stuffocation* "The revelations come fast and furious as he asserts that acquiring 'stuff' is often just an easy way to ignore the tougher questions of life, dodging 'why am I here?' and 'how should I live?' for 'will that go with the top I bought last week?' Tart and often funny . . . [*Stuffocation*] will be an eye-opener for those long ago persuaded that more is better.

A scintillating read that will provoke conversation (or at least closet cleaning).”—Booklist “James Wallman deftly hits upon a major insight for our times: that acquiring ‘stuff’ and ‘things’ is not nearly as meaningful as collecting experiences. Some of the happiest days of my life were when I had nothing and lived on a houseboat. Without stuff to tie me down, I felt completely free.”—Blake Mycoskie, founder of TOMS and author of the New York Times bestseller *Start Something That Matters* “A must-read . . . We think that more stuff will make us happier, but as the book nicely shows, we’re just plain wrong. A great mix of stories and science, *Stuffocation* reveals the downside of more, and what we can do about it.”—Jonah Berger, author of the New York Times bestseller *Contagious* “Wallman offers a deeply important message by weaving contemporary social science into very engaging stories. Reading the book is such a pleasure that you hardly recognize you’re being told that you should change how

you live your life.”—Barry Schwartz, author of *The Paradox of Choice* “With a sociologist’s eye and a storyteller’s ear, Wallman takes us on a tour of today’s experience economy from the perspective not of businesses, nor even of consumers per se, but of everyday people.”—B. Joseph Pine II and James H. Gilmore, authors of *The Experience Economy*
Catastrophism University of Chicago Press
 Of all my memories, of all my life's innumerable sensations, the most onerous was that of the single murder I had committed.' A man comes across a short story which recounts in minute detail his killing of a soldier, long ago - from the victim's point of view. It's a story that should not exist, and whose author can only be a dead man. So begins the strange quest for the elusive writer 'Alexander Wolf'. A singular classic, *The Spectre of Alexander Wolf* is a psychological thriller and existential inquiry into guilt and redemption, coincidence and fate, love and death.
