"If you love a good enemies-to-lovers trope, run—don't walk—to the nearest bookstore or library near you."

—BuzzFeed "I couldn't put it down!" —New York Times bestselling author Simone Elkeles When Tyson Trice finds himself tossed into the wealthy community of Pacific Hills, he expects not to belong. Not that he cares. After recovering from being shot and surviving the rough streets of Lindenwood, he doesn't care about anyone or anything. Golden girl Nandy Smith has spent most of her life building the pristine image it takes to make it in Pacific Hills. After learning that her parents are taking in a troubled teen boy, Nandy

fears her summer plans and her reputation will go up in flames. The wall between their bedrooms feels as thin as the line between love and hate. But their growing attraction won't be denied. Soon Trice is bringing Nandy out of her shell and Nandy's trying to melt the ice around Trice's heart. But with the ever-present pull back to Lindenwood, it'll be a wonder if Trice makes it through this summer at all. Also by Whitney D. Manual of Phonology

This book describes the entire process of designing guitars, including the theory and guidelines for implementing it in practice. It discusses areas from acoustics and resonators to new tools and how they assist traditional construction techniques. The book

begins by discussing the fundamentals of the sounds of a guitar, strings, and oscillating systems. It then moves on to resonators and acoustics within the guitar, explaining the analysis systems and evaluation methods, and comparing classic and modern techniques. Each area of the guitar is covered, from the soundboard and the back, to the process of closing the instrument. The book concludes with an analysis of historic and modern guitars. This book is of interest to luthiers wanting to advance their practice, guitar players wishing to learn more about their instruments, and academics in engineering and physics curious about the principles of acoustics when applied to musical instruments.
