Women experience sexual and domestic violence at alarmingly high rates. Recovery from this type of trauma can be a complex and extensive process, that in best cases, involves a broad network for support. This dissertation examined the experiences of women over the age of 21 who have received massage therapy during their healing process from sexual or domestic violence. For the purposes of this study, the women who participated were often referred to as survivors of abuse. Current research examined in the literature review indicates that the effects of this type of trauma are multifaceted and that one of the interventions sought for diminishing the effects of this trauma is massage. The importance of this study, completed with the use of descriptive research methodology, included the opportunity to gain information from abuse survivors about their personal experiences with massage and how they can best be served by the massage therapist. The results of a self report survey and interview process provide valuable information to raise awareness

of these societal issues among massage professionals. While the subjects were not interviewed about their specific experiences of abuse, they provided important information about the effects that these experiences have had on their lives. Further, the women interviewed shared information about the concerns that they had with regard to massage therapy and some of the specific experiences that they have had during massage sessions.

Although the sample size was small, with 10 women interviewed, the information provided has clear implications for the practice of massage therapy. Some of the implications found involve therapist gender, trust building between client and practitioner, and communication with the client during massage therapy sessions. Recommendations for massage professionals have been made based on these findings. Further research opportunities exist in several areas and include screening massage clients for abuse during the intake process, examining the challenges for male massage therapists and female massage therapists, and evaluating the massage educational institutions for training in issues of trauma particular to sexual and domestic violence.

What if you can't afford nine-dollar tomatoes? That was the

question award-winning journalist Tracie McMillan couldn't escape as she watched the debate about America's meals unfold, one that urges us to pay food's true cost—which is to say, pay more. So in 2009 McMillan embarked on a groundbreaking undercover journey to see what it takes to eat well in America. For nearly a year, she worked, ate, and lived alongside the working poor to examine how Americans eat when price matters. From the fields of California, a Walmart produce aisle outside of Detroit, and the kitchen of a New York City Applebee's, McMillan takes us into the heart of America's meals. With startling intimacy she portrays the lives and food of Mexican garlic crews, Midwestern produce managers, and Caribbean line cooks, while also chronicling her own attempts to live and eat on meager wages. Along the way, she asked the questions still facing America a decade after the declaration of an obesity epidemic: Why do we eat the way we do? And how can we change it? To find out, McMillan goes beyond the food on her plate to examine the national priorities that put it there. With her absorbing blend of riveting narrative and formidable investigative reporting, McMillan takes us from dusty fields to clanging restaurant kitchens, linking her work to the quality of our meals—and always placing her observations in the context of America's approach not just to farms and kitchens but to wages and work. The surprising answers that McMillan found on her journey have profound implications for our food and agriculture, and also for how we see ourselves as a nation. Through stunning reportage, Tracie McMillan makes the simple case that—city or country, rich or poor—everyone wants good food. Fearlessly reported and beautifully written, *The American Way of Eating* goes beyond statistics and culture wars to deliver a book that is fiercely intelligent and compulsively readable. Talking about dinner will never be the same again.
