Mathematicians delight in finding surprising connections between seemingly disparate areas of mathematics. Whole domains of modern mathematics have arisen from exploration of such connections--consider analytic number theory or algebraic topology. Finding Ellipses is a delight-filled romp across a three-way unexpected connection between complex analysis, linear algebra, and projective geometry. The book begins with Blaschke products, complex-analytic functions that are generalizations of disk automorphisms. In the analysis of Blaschke products, we encounter, in a quite natural way, an ellipse inside the unit disk. The story continues by introducing the reader to Poncelet's theorem--a beautiful result in projective geometry that ties together two conics and, in particular, two ellipses, one circumscribed by a polygon that is inscribed in the second. The Blaschke ellipse and the Poncelet ellipse turn out to be the same ellipse, and the connection is illuminated by considering the numerical range of a 2×2 matrix. The numerical range is a convex subset of the complex plane that contains information about the geometry of the transformation represented by a matrix. Through the numerical range of $n \times n$ matrices, we learn more about the interplay between Poncelet's theorem and Blaschke products. The story ranges widely over analysis, algebra, and geometry, and the exposition of the deep and surprising connections is lucid and compelling. Written for advanced undergraduates or beginning graduate students, this book would be the perfect vehicle for an invigorating and enlightening capstone exploration. The exercises and collection of extensive projects could be used as an embarkation point for a satisfying and rich research project. Charles H. Long is one of the most influential and pioneering scholars in the study of religion from the past 50 years. This is the first comprehensive collection of his writings, edited by Long himself, and contains 38 pieces, including both published and previously unpublished articles, lectures, an interview, and two book reviews. The foreword is provided by Jennifer Reid, a former student of Long. The collection is divided into four thematic parts: America and the Study of Religion; Theory and Method in the Study of Religion; African American Religion in the United States; Kindling, Embers and Sparks. Long's introduction provides much-awaited insight into his reflections on his work, expanding on questions that remained unanswered in his classic and influential text, *Significations: Signs, Symbols and Images in the Interpretation of Images* (1986). In particular, the new introductory essay explores the significance of "ellipses", that which is omitted, the projected spaces of the Other in the study of religion. Considered the preeminent founder and advocate of the study of Black Religion, Long was exploring religion and colonialism and the importance of Afro-American religion as early as the 1960s and early 1970s, and this collection of his thinking - which moves across the formations of religious studies, African diasporic studies, and social and cultural theory - is a must-have addition for any institutional or personal library.

With increased compression, every word, every sentence matters more. A writer must learn how to form narratives around caesuras and crevices instead of strings of connections, to move a story through the symbolic weight of images, to master the power of suggestion. With elegant prose, deep readings of other writers, and scaffolded writing exercises, *The Art of Brevity* takes the reader on a lyrical

exploration of compact storytelling, guiding readers to heighten their awareness of not only what appears on the page but also what doesn't. *The Oxford Handbook of Information Structure* American Mathematical Soc. When your life is over, everything you did will be represented by a single dash between two dates--what will that dash mean for the people you have known and loved? As Joseph Epstein once said, "We do not choose to be born. We do not choose our parents, or the country of our birth. We do not, most of us, choose to die. . . . But within this realm of choicelessness, we do choose how we live." And that is what The Dash is all about. Beginning with an inspiring poem by Linda Ellis titled "The Dash," renowned author Mac Anderson then applies his own signature commentary on how the poem motivates us to make certain choices in our lives--choices to ignore the calls of selfishness and instead reach out to others, using our God-given abilities to brighten their days and lighten their loads. After all, at the end of life, how we will be remembered--whether our dash represents a full, joyous life of seeking God's glory, or merely the space between birth and death--will be entirely up to the people we've left behind, the lives we've changed.

This open access book studies breath and breathing in literature and culture and provides crucial insights into the history of medicine, health and the emotions, the foundations of beliefs concerning body, spirit and world, the connections between breath and creativity and the phenomenology of breath and breathlessness. Contributions span the classical, medieval, early modern, Romantic, Victorian, modern and contemporary periods, drawing on medical writings, philosophy, theology and the visual arts as well as on literary, historical and cultural studies. The collection illustrates the complex significance and symbolic power of breath and breathlessness across time: breath is

written deeply into ideas of nature, spirituality, emotion, creativity and being, and is inextricable from notions of consciousness, spirit, inspiration, voice, feeling, freedom and movement. The volume also demonstrates the long-standing connections between breath and place, politics and aesthetics, illuminating both contrasts and continuities.

This monograph presents a theory of ellipsis licensing in terms of Agree and applies it to several elliptical phenomena in both English and Dutch. The author makes two main claims: The head selecting the ellipsis site is checked against the head licensing ellipsis in order for ellipsis to occur, and ellipsis i.e., sending part of the structure to PF for non-pronunciation occurs as soon as this checking relation is established. At that point, the ellipsis site becomes inaccessible for further syntactic operations. Consequently, this theory explains the limited extraction data displayed by Dutch modals complement ellipsis as well as British English "do" These ellipses allow subject extraction out of the ellipsis site, but not object extraction. The analysis also extends to phenomena that do not display such a restricted extraction, such as sluicing, VP ellipsis, and pseudogapping. Hence, this work is a step towards a unified analysis of ellipsis."

Two Lives is Janet Malcolm's stunning portrait of a legendary couple: Gertrude Stein, the modernist master, and Alice B Toklas, the 'worker bee' who ministered to Stein's needs throughout their forty-year expatriate 'marriage'. As Malcolm pursues the truth of the couple's charmed life in a village in Vichy France her subject becomes the larger question of biographical truth. 'The instability of human knowledge is one of our few certainties,' she writes. The portrait of their relationship that emerges is unexpectedly charged. The two world wars Stein and Toklas lived through together are paralleled by the private war that went on between them. This war, as Malcolm learned, sometimes flared into bitter combat. Janet Malcolm is at her finest in this extraordinary work of literary biography and investigative journalism.

This volume, a sequel to *Form Miming Meaning* (1999), offers a selection of papers given at the second international symposium on iconicity (Amsterdam 1999). In the light of semiotic, linguistic and literary theory the studies gathered here investigate how iconicity works on all levels of language, in literary texts and other forms of verbal discourse. They investigate, among other subjects, the

semiotic foundations of iconicity, the role played by iconicity in language evolution and in the way words are positioned syntactically. Special consideration is given to the iconic nature of metaphor and the 'mise en abyme', to iconically motivated punctuation and other typographic matters such as the manipulation of colour, fonts and spacing in advertising and in poetry. Other studies show how iconicity influences Shakespeare's rhetoric, the structural design of Margaret Atwood's writings and the changing fashions in fictional landscape description. Thus, these analyses of 'the motivated sign' represent yet another strong challenge to [Saussure's dogma of arbitrariness] (Jakobson).

Originally written as a manual for intelligence field operations... -You'll stop believing in free will.- -LISA SCHMIDT, HUFFINGTON POST One look at the table of contents will give you an 'oh my God' moment. -The Ellipsis Manual is the kind of book that used to be locked away...deep in a vault underground...far away from the prying eyes of those who could misuse its power. With chapter titles like 'Methods of physically hacking the brain' and 'Shutting off human willpower, ' what you're about to learn could make even the most well-trained CIA operative blush... And that's what leads me to say that if you're going to pick up your copy of *The Ellipsis Manual* today, you've got to make a firm commitment not to go to the dark side with this material. Because once you go through these pages, you'll be able to: - See through the masks people wear - exposing fears and insecurities no one else can see -Instantly detect when a partner, boss, or even a friend is lying to you -Covertly influence anyone, any time (with NO chance of being caught) -Hijack peoples' deepest thoughts, feelings, and favorite gestures...and leverage them to your advantage Implant whatever ideas and beliefs you want into the minds of people you want to persuade, control, or seduce ...and a WHOLE lot more. And once you have these powers, trust me-the temptation to misuse them will certainly be strong. Fight the urge. Stay true to your
