The Taliban remain one of the most elusive forces in modern history. A ragtag collection of clerics and madrasa students, this obscure movement emerged out of the rubble of the Cold War to shock the world with their draconian Islamic order. The Taliban refused to surrender their vision even when confronted by the United States after September 11, 2001. Reinventing themselves as part of a broad insurgency that destabilized Afghanistan, they pledged to drive out the Americans, NATO, and their allies and restore their "Islamic Emirate." The Taliban and the Crisis of Afghanistan explores the paradox at the center of this challenging phenomenon: how has a seemingly anachronistic band of religious zealots managed to retain a tenacious foothold in the struggle for Afghanistan's future? Grounding their analysis in a deep understanding of the country's past, leading scholars of Afghan history, politics, society, and culture show how the Taliban was less an attempt to revive a medieval theocracy than a dynamic, complex, and adaptive force rooted in the history of Afghanistan and shaped by modern international politics. Shunning journalistic accounts of its conspiratorial origins, the essays investigate broader questions relating to the character of the Taliban, its evolution over time, and its capacity to affect the future of the region. Offering an invaluable guide to "what went wrong" with the American reconstruction project in Afghanistan, this book accounts for the persistence of a powerful and enigmatic movement while simultaneously mapping Afghanistan's enduring political crisis.

"One literary ride you don't want to miss!" - Huffington Post. Can an epic adventure succeed without a hero? Andra Watkins needed a wingman to help her become the first living person to walk the historic 444-mile Natchez Trace as the pioneers did. She planned to walk fifteen miles a day. For thirty-four days. After striking-out with everyone in her life, she was left with her disinterested eighty-year-old father. And his gas. The sleep apnea machine and self-scratching. Sharing a bathroom with a man whose gut obliterated his aim. As Watkins trudged America's forgotten highway, she lost herself in despair and pain. Nothing happened according to plan, and her tenuous connection to her father started to unravel. Through arguments and laughter, tears and fried chicken, they fought to rebuild their relationship before it was too late. In *Not Without My Father: One Woman's 444-Mile Walk of the Natchez Trace*, Watkins invites readers to join her dysfunctional family adventure in a humorous and heartbreaking memoir that asks if one can really turn 'I wish I had' into 'I'm glad I did.'

Basic Marketing 16e builds on the foundation pillars of previous editions - the four Ps framework, managerial orientation, and strategy planning focus. 16e builds upon its pioneering beginnings that introduced the "four Ps" to the introductory marketing course. The unifying focus of Basic Marketing has always been on how to make the marketing decisions that a manager must make in deciding what customers to focus on and how best to meet their needs. Over many editions there has been constant change in marketing management and the marketing environment. Some of the changes have been dramatic, and others have been subtle. As a result, the authors have made ongoing changes to the text to reflect marketing's best practices and ideas. Throughout all of these changes, Basic Marketing and the supporting materials that accompany it have been more widely used than any other teaching materials for introductory marketing. Consistent with our belief in continuous quality improvement, this edition has been critically revised, updated, and rewritten to reflect new concepts, new examples, and recent "best practices." This edition extends the strategy planning approach, integrating concepts tightly with the marketing strategy planning model.
