Do you want to design your own beadwork for teaching or submitting to magazines for publication? If so, then you will need to draw clear, professional-looking beading diagrams to accompany your instructions. Gone are the days when hand-drawn diagrams are acceptable, but it can seem like a huge investment to look at buying professional drawing or design software. It is quite likely that you already have Microsoft Office installed on your computer, in which case, you may well have Powerpoint. This booklet will show you how to use Powerpoint - a tool that you already have - to draw professional-looking beading diagrams that you can easily add to your written instructions. You will be introduced to the Powerpoint commands that you need, shown how to draw beads, add thread paths and label diagrams. You will learn lots of editing tricks for speeding up the drawing process and making your diagrams as clear as possible. You will also be shown how to create representations of shaped seed beads and taken step-by-step through the process for drawing a Peyote stitch diagram. This booklet gives you the opportunity to see professional diagrams and consider the techniques they have used. It is also packed with handy tips and ideas to make your diagram-drawing experience as painless as possible. Katie Dean has been designing beading projects for over thirteen years. She was professionally trained in Powerpoint and is also a qualified adult teacher. She has also worked in the publishing industry and as a beading magazine editor, so she is well-versed in the needs of professional beadwork publishers. Katie brings all this experience together in this booklet, passing on her knowledge and personal tips to help you create your own professional beading diagrams. Whether you want to create professional hand-outs for teaching your projects or you are hoping to see your work published in a book or magazine, 'How to Draw Beading Diagrams in Powerpoint' will be an invaluable tool for you

Communicating raw data through diagrams and charts is an exciting alternative to communicating through words. In this book you'll learn how to design and draw a wide variety of easy-to-understand charts and diagrams that are visually appealing and fun to illustrate, including graphs, pie charts, maps, and bar charts. Robertson shows how to evaluate raw data, select the chart or diagram style that best communicates your data, then use a variety of mediums including colored pencil, markers, and airbrush to create your final artwork. Using hundreds of examples of charts and diagrams, he helps you understand what works, what doesn't, and why.

The Mind at Hand S. Chand Publishing

The Mind at Hand explores how artists, scientists, writers, and others - students and professionals alike - see their world, record it, revise it and come to know it. It is about the rough-drawn sketch, diagram, chart, or other graphic representation, and the focus these provide for creative work that follows from them. Such work could involve solving a problem, composing a musical score, proposing a hypothesis, creating a painting, and many other imaginative and inventive tasks. The book is for for visual learners of all kinds, for scientists as well as artists, and for anyone who keeps a journal, notebook, or lab book in order to think and create visually. It is also a book for teachers and educational administrators interested in learning about new active learning strategies involving drawing, and possible outcomes of these in classrooms. The formulas and symbols of chemistry, the diagrams and features of the landscape in geology, and the organisms and structures in biology, are all represented as images on pages or screens. Students create them when studying, problem-solving, and learning. Once in front of their eyes, they can be reconsidered, revised, and reconstructed into new images for further consideration and revision. It is how artists often create a painting or a sculpture, and how scientists come up with new hypotheses. This is how learning occurs, not only across disciplines, but in all kinds of creative endeavors, through a continuing process of creation, revision, and re-creation. It is drawing-to-learn.
