How to Make Repeat Patterns Tuttle

Publishing
Paper is readily available and inexpensive in comparison to other sculptural media, and can be manipulated with a set of simple tools. It is a tactile medium, which can be formed into three-

dimensional shapes quickly and immediately through folding and cutting. This hands-on element is something I feel is important -- it allows the artist to engage immediately with the material, resulting in something physical and tangible. It is, perhaps, these factors that make it so appealing, not only as a tool to apply in different fields, such as model making for architecture, but as an activity for its own sake. A section of this book is dedicated to a selection of the techniques I use in the creation of my work, and which I demonstrate in my workshops. My aim is to show the basic principles of form-making in paper, which can then be expanded

on and explored as the reader wishes. Also included are my sources of inspiration and details of my working practice, which shows the evolution of an initial idea into a final artwork. I hope this book offers an insight into my work, while offering inspiration to those who wish to explore the creative potential of paper.

MiniEco is the sensational craft blog of Kate Lilley. With over 250,000 followers it has taken on cult status in the international craft community, and that is purely down to Kates fresh, contemporary and beautifully explained and executed craft projects. With a book

for children already under her belt, this publication focuses more on adults with 33 pieces including paper gems, an origami lampshade, macrame hangings, pop-up pixel cards, hama bead candle holders, and tie-dyed furoshiki cloths. The ideas range in complexity from the simple to the advanced, but each one is totally unique and has never before been published. The look of the book will reflect the immaculate, Japanese-inflected minimalism of the MiniEco website, with some high-end production finishes including a die-cut, dust-jacketed paperback binding and boldly pared-back photography. This book will show you inspirational ways in which paper can be used to create textured and relief surfaces. These techniques are mostly intuitive and easy to make, requiring no origami or paper engineering knowledge. There are 12 different techniques: Twisting

narrow strips to make "paper string," Weaving strips, Layering, Coiling, Tearing, Bending, Incising and Lifting, Crumpling, Pleating, Cutting Pleats, Stippling, and using Translucent Surfaces. Each is beautifully illustrated with creative examples, first made in white paper and then in papers of different colors, weights, and textures. Finally, inspirational photographs show the techniques applied by designers to clothing, furniture, jewelry, and homewares, as well as artworks. These techniques could be used by professional designers, design students in disciplines from textiles to interior design, and anyone with an interest in paper craft.

Papermaking with Garden Plants & Common Weeds Storey Publishing, LLC
This origami art book features the work of 25 contemporary master folders who are among the most innovative origami artists working today. They are pushing the boundaries of origami vigorously in new directions in terms of style, scale, materials, subject and scope. This elite group includes: Joel Cooper Erik Demaine and Martin Demaine Paul Jackson Beth Johnson Michael G. LaFosse and Richard L. Alexander Robert J. Lang Linda Mihara Bernie Peyton Richard Sweeney And many more... The stunning photos and brilliant essays in this book demonstrate why origami is now an international art

movement—largely through the efforts and artistic genius of a few contemporary masters. The trailblazing efforts of Japanese artist Akira Yoshizawa elevated the paper folding to an art form by showing how subtle shapes and figures could be created from a single sheet of paper though a variety of non-traditional folding techniques. Artists in other parts of the world—including the United States, France, England, China and Scandinavia—took Yoshizawa's cue and pushed these techniques further and further. The result has been the emergence of many new and surprising sculptural forms created through techniques such as wet folding, curved creasing, tessellating

and the application of alternative materials besides paper.

From bestselling

author and expert in paper and art crafts,

Paul Jackson, comes this eagerly awaited new project,

Superstars. Create a galaxy of amazing 3D stars and other

geometric shapes with these pre-cut and scored sheets.

Superstars are simple and quick to fold;

based on geometrical solids, the forms are surprisingly sturdy. You

can make large and impressive decorations (bring on Christmas!)

as well as using the kit as a craft activity in itself - they can be

taken apart and used again as many times as you like! Featuring

simple instructional videos instead of complex written instructions, these superstars will absorb both experienced paper folders and enthusiastic amateurs. Superstars comes with an accompanying booklet that contains easy to follow steps, QR codes, illustrations and photos. The booklet explains the structure of 17 superstars, though there are countless others you can design for yourself as you become familiar with the techniques. The series of online videos that accompany the pack show in detail how to fold the units, how to assemble the basic pyramids and how to make superstars from 6, 12 and 30 units. Paul Jackson is the author of

more than 30 books on paper arts and crafts. He has taught the techniques of folding on more than 150 university-level design courses in the UK, Germany, Belgium, the US, Canada and Israel. These include courses of Architecture, Graphic Design, Fashion Design, Textile Design, Jewellery, Product Design, Packaging, Ceramics, Industrial Design, Fine Art, Basic Design and Interior Design. Other bestselling books of his include: Complete Pleats, Cut and Fold Paper Textures, Cut and Fold Techniques for Pop-Up Designs, Cut and Fold Techniques for Promotional Materials, Folding Techniques for Designers, How to Make Repeat Patterns and Structural

Packaging, all
