50TH ANNIVERSARY EDITION—WITH A NEW INTRODUCTION BY DAVID MITCHELL AND A NEW AFTERWORD BY CHARLIE JANE ANDERS Ursula K. Le Guin’s groundbreaking work of science fiction—winner of the Hugo and Nebula Awards. A lone human ambassador is sent to the icebound planet of Winter, a world without sexual prejudice, where the inhabitants’ gender is fluid. His goal is to facilitate Winter’s inclusion in a growing intergalactic civilization. But to do so he must bridge the gulf between his own views and those of the strange, intriguing culture he encounters... Embracing the aspects of psychology, society, and human emotion on an alien world, *The Left Hand of Darkness* stands as a landmark achievement in the annals of

intellectual science fiction.

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is

needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Belief in the coming of a Messiah poses a genuine dilemma. From a Jewish perspective, the historical record is overwhelmingly against it. If, despite all the tragedies that have befallen the Jewish people, no legitimate Messiah has come forward, has the belief not been shown to be groundless? Yet for all the problems associated with messianism, the historical record also shows it is an idea with enormous staying power. The prayer book mentions it on page after page. The great Jewish philosophers all wrote about it. Secular thinkers in the twentieth century returned to it and reformulated it. And victims of the Holocaust invoked it in the last few minutes of their life. This book examines the staying power of messianism and formulates it in a way that retains its redemptive force without succumbing to mythology.

Emphasizing the understanding of images and their influences on

how they affect our attitudes, beliefs, and actions, this fully updated sixth edition offers consequential ways of looking at images from the perspectives of photographers, critics, theoreticians, historians, curators, and editors. It invites informed conversations about meanings and implications of images, providing multiple and sometimes conflicting answers to questions such as: What are photographs? Should they be called art? Are they ethical? What are their implications for self, society, and the world? From showing how critics verbalize what they see in images and how they persuade us to see similarly, to dealing with what different photographs might mean, the book posits that some interpretations are better than others and explains how to deliberate among competing interpretations. It looks at how the worth of photographs is judged aesthetically and socially, offering samples and practical considerations for both studio critiques for artists and professional criticism for public audiences. This book is a clear and accessible guide for students of art history, photography and criticism, as well as anyone interested in carefully looking at and talking about photographs and their effects on the world in which we live.

This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of

associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

Many know her as the reclusive Chicago nanny who wandered the city for decades, constantly snapping photographs, which were unseen until they were discovered in a seemingly abandoned storage locker. When the news broke that Maier had recently died and had no surviving relatives, Maier shot to stardom almost overnight. Bannos contrasts Maier's life has been created, mostly by the men who have profited from her work. Maier was extremely conscientious about how her work was developed, printed, and cropped, even though she also made a clear choice never to display it.

La photographe documentaire américaine Mary Ellen Mark réalisa ses premières photographies emblématiques au cours des années 1960, alors qu'elle vivait en Turquie grâce à une bourse d'étudiant accordée par la fondation Fulbright. Ses photographies des maisons closes de Bombay, prises à la fin des années 1970, furent publiées en 1981 dans *Falkland Road*, ouvrage consacré qui établit Mary Ellen Mark comme l'une des photographes documentaires les plus importantes et les plus provocatrices de notre temps. Les images de Mary Ellen Mark célèbrent l'humanité sous ses formes les plus diverses et les plus inattendues. Cirques, campements de gens du voyage, enfants aspirant à l'âge adulte, pauvres et indigents constituent quelques-uns de ses thèmes récurrents. Mary Ellen Mark possède un don unique pour saisir les gestes et expressions qui laissent percer les émotions intenses de ses sujets. Pleines de compassion mais jamais prosaïques, ses photographies peuvent être tout à la fois humoristiques, tragiques, énigmatiques ou choquantes. Cet ouvrage présente pour la première fois une sélection des images les plus fortes des quarante années de carrière de Mary Ellen Mark, certaines

extraites de séries aussi emblématiques que " Falkland Road ", " Indian Circus " et " Twins " (" Jumeaux "), et d'autres inédites à ce jour. Les photographies sont accompagnées d'une introduction de Weston Naef et d'un texte écrit par la photographe elle-même, dans lequel elle évoque le contexte et les anecdotes propres à certaines prises de vue. Ensemble, images et mots constituent une vision personnelle de la vie des sujets de Mary Ellen Mark, et racontent à travers des histoires saisissantes, la force et la souffrance humaine.

According to Roger Caillois, play is an occasion of pure waste. In spite of this - or because of it - play constitutes an essential element of human social and spiritual development. In this study, the author defines play as a free and voluntary activity that occurs in a pure space, isolated and protected from the rest of life.

"Following the publication of *Chromes* in 2011 and *Los Alamos Revisited* in 2012, the reassessment of Eggleston's career continues with the publication of *The Democratic Forest*, his most ambitious project. This ten-volume set containing more than a thousand photographs is drawn from a body of twelve thousand pictures made by Eggleston in the 1980s. Following an opening volume of work in Louisiana, which serves as a visual preface, the remaining books cover Eggleston's travels from his familiar ground in Memphis and Tennessee to Dallas, Pittsburgh, Miami, Boston, the pastures of Kentucky, and as far as the Berlin Wall. The final volume leads the viewer back to the South of small towns, cotton fields, the Civil War battlefield of Shiloh and the home of Andrew Jackson, the President from Tennessee. The democracy of Eggleston's title refers to his democracy of vision, through which he represents the most mundane subjects with the same complexity and significance as the most elevated. The exhaustive editing process of *The Democratic Forest*--a rarely shown body of work of which only a fraction has been published to date--has taken over three years, and was guided by the belief that only on this large scale can the magnitude of Eggleston's achievement be represented. With no precedent in American art, Eggleston's photography seen as a whole has all the grandeur of an epic piece of fiction.--Publisher's Web site.

Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The

symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

MARY ELLEN MARK, 25 YEARS. Lucia Marquand

This beautiful and informative photographic history includes images from 1900 to 1999. Many are often seen (bullet piercing the apple, splashing crown of milk, Sophia Loren looking askance

at Jayne Mansfield's plunging decollete, and Dorothea Lange's Migrant Mother); but most are probably unknown, because the photos were selected not only for their visual and cognitive qualities but also for their importance to the history and development of photographic technique and usage. The century is divided into thirds for explanation's sake, and there is at least one photograph for every year. While this is a picture book, the accompanying text provides informative introductions to the uses and abuses of perhaps the century's most important medium. The book is companion to the PBS series. Oversize: 12.5x9.5".
