Monster studies, dystopian literature and film studies have become central to research on the now-proliferating works that give voice to culture-specific anxieties. This new development in scholarship reinforces the notion that the genres of fantasy and science fiction call for interpretations that see their spaces of imagination as reflections of reality, not as spaces invented merely to escape the real world. In this vein, *Displacing the Anxieties of Our World* discusses fictive spaces of literature, film, and video gaming. The eleven essays that follow the Introduction are grouped into four parts: I. "Imagined Journeys through History, Gaming and Travel"; II. "Political Anxieties and Fear of Dominance"; III. "The Space of Fantastic Science and Scholarship"; and IV. "Spaces Natural and Spaces Artificial". The studies produce a dialogue among disciplinary fields that bridges the imagined space between sixteenth-century utopia and twenty-first century dystopia with analyses penetrating fictitious spaces beyond utopian and dystopian spheres. This volume argues, consequently, that the space of imagination that conjures up versions of the world's frustrations also offers a virtual battleground - and the possibility of triumph coming from a valuable gain of cognizance, once we perceive the correspondence between spaces of the fantastic and those of the mundane.

Prior to the mid-sixties, Grayville, TN was one of twenty-four "sundown towns." A "sundown town" was a town that had a sign on the outskirts of town that said, "Negros are not allowed in the city limits after sundown." Very few blacks lived in Grayville. Grayville High School seldom had black students. In August of 2020, a black doctor moved to Grayville. He moved from Weston, Ohio to be near his adopting white parents who lived in the Homeland Retirement Center in Pleasant Hill. Grayville never had a black basketball player, now it has three. The doctor has three sons. Joseph is a 6' 9" senior and his twin brothers, Samuel and David both 6' 6" juniors. The three brothers took Weston to the Ohio State basketball championship. It's the second half of the twenty-first century. The advent of the next industrial revolution has brought forth a new series of automation - machines that can perform any task safer, faster, better, and cheaper than any human ever could. With their introduction, unemployment levels soar, trade collapses, and the world falls into ruin. China becomes a closed state, Germany remains the only nation in Europe to retain stability, and the role of the United States government shifts primarily into a position of humanitarian aid for its own citizens. With this vast computational ability, however, comes a new possibility: artificial emulation of human consciousness, and with it, the creation of

IEBs. These non-human citizens roam the streets, interact with the people that came before them, and work to determine their meaning. Their existence alone is enough to change the face of mankind forever.
