This book gathers a

collection of extended papers based on presentations given during the SimHydro 2017 conference, held in Sophia Antipolis, Nice, France on June 14-16, 2017. It focuses on how to choose the right model in applied hydraulics and considers various aspects, including the modeling and simulation of fast hydraulic transients, 3D modeling, uncertainties and multiphase flows. The book explores both limitations and performance of current models and presents the latest developments in new numerical schemes, high-performance computing, multiphysics and multiscale methods, and better interaction with field or scale

model data. It gathers the latest theoretical and innovative developments in the modeling field and presents some of the most advanced applications on various water related topics like uncertainties, flood simulation and complex hydraulic applications. Given its breadth of coverage, it addresses the needs and interests of practitioners, stakeholders, researchers and engineers alike.

Radio provided a new and powerful medium in 1930s France.

Devoted audiences responded avidly to their stations' programming and relied on radio as a source of daily entertainment, news,

and other information. Within the comfortable, secure space of the home, audio culture reigned supreme. In *Programming National Identity*, Joelle Neulander examines the rise of radio as a principal form of mass culture in interwar France, exploring the intricate relationship between radio, gender, and consumer culture. She shows that, while entertaining in nature and narrative in structure, French radio programm.

Cities are the world's future. Today, more than half of the global population--3.7 billion people--are urban dwellers, and that number is expected to double by 2050. There is no question that

cities are growing; the only debate is over how they will grow. Will we invest in the physical and social infrastructure necessary for livable, equitable, and sustainable cities? In the latest edition of *State of the World*, the flagship publication of the Worldwatch Institute, experts from around the globe examine the core principles of sustainable urbanism and profile cities that are putting them into practice. From Ahmedabad, India to Freiburg, Germany, local people are acting to improve their cities, even when national efforts are stalled. Issues examined range from the nitty-gritty of handling waste and developing public transportation to civic

participation and navigating dysfunctional government. The result is a snapshot of cities today and a vision for global urban sustainability tomorrow.

Citizenship is always in dispute – in practice as well as in theory – but conventional perspectives do not address why the concept of citizenship is so contentious. This unique book presents a new perspective on citizenship by treating it as a continuing focus of dispute. The authors dispute the way citizenship is normally conceived and analysed within the social sciences,

developing a view of citizenship as always emerging from struggle. This view is advanced through an exploration of the entanglements of politics, culture and power that are both embodied and contested in forms and practices of citizenship. This compelling view of citizenship emerges from the international and interdisciplinary collaboration of the four authors, drawing on the diverse disputes over citizenship in their countries of origin (Brazil, France, the UK and the US). The book is essential reading for anyone interested in the field of citizenship, no matter what their geographical, political or academic location.

During the Second World War the Bodleian Library in Oxford acquired a set of Aramaic letters, eight sealings, and the two leather bags in which the sealed letters were once stored. The letters concern the affairs of Aršāma, satrap of Egypt in the later fifth century. Taken with other material associated with him (mostly in Aramaic, Demotic Egyptian, and Akkadian), they illuminate the Achaemenid world of which Aršāma was a privileged member and evoke a wide range of social, economic, cultural, organizational, and political perspectives, from multi-lingual communication, storage and disbursement of

resources, and satrapal remuneration, to cross-regional ethnic movement, long-distance travel, religious practice, and iconographic projection of ideological messages. Particular highlights include a travel authorization (the only example of something implicit in numerous Persepolis documents), texts about the religious life of the Judean garrison at Elephantine, Aršāma's magnificent seal (a masterpiece of Achaemenid glyptic, inherited from a son of Darius I), and echoes of temporary disturbances to Persian management of Egypt. But what is also impressive is the underlying sense of systematic coherence founded on and expressed in the use of

formal, even formalized, written communication as a means of control. The Aršāma dossier is not alone in evoking that sense, but its size, variety, and focus upon a single individual give it a unique quality. Though this material has not been hidden from view, it has been insufficiently explored: it is the purpose of the three volumes of Aršāma and his World: The Bodleian Letters in Context to provide the fullest presentation and historical contextualization of this extraordinary cache yet attempted. Volume I presents and translates the letters alongside a detailed line-by-line commentary, while Volume II reconstructs the two seals that made the clay bullae

that sealed the letters, with special attention to Aršāma's magnificent heirloom seal. Volume III comprises a series of thematic essays which further explore the administrative, economic, military, ideological, religious, and artistic environment to which Aršāma and the letters belonged.

K. G. Saur Empires of Vision brings together pieces by some of the most influential scholars working at the intersection of visual culture studies and the history of European imperialism. The essays and excerpts focus on the paintings, maps, geographical surveys, postcards, photographs, and other media that comprise

the visual milieu of colonization, struggles for decolonization, and the lingering effects of empire. Taken together, they demonstrate that an appreciation of the role of visual experience is necessary for understanding the functioning of hegemonic imperial power and the ways that the colonized subjects spoke, and looked, back at their imperial rulers. Empires of Vision also makes a vital point about the complexity of image culture in the modern world: We must comprehend how regimes of visibility emerged globally, not only in the metropole but also in relation to the putative margins of a world that increasingly came to question the very

distinction between center and periphery. Contributors. Jordanna Bailkin, Roger Benjamin, Daniela Bleichmar, Zeynep Çelik, David Ciarlo, Natasha Eaton, Simon Gikandi, Serge Gruzinski, James L. This book presents multi-sector practical cases based on the author's own research. It also includes the best practice, which could serve as a benchmark for the creation of smart cities. The global urbanisation

index, i.e., the ratio of city dwellers to the total population, has been steadily increasing in recent years. It is highest in the Americas, followed by Europe, Asia and Africa. The city of the future will combine the intelligent use of IT systems with the potential of institutions, companies and committed, creative inhabitants. The administrative boundaries of today's cities put certain constraints on their further growth, but in the future these boundaries will no longer be as relevant. Cities in Europe face the challenge of reconciling sustainable urban development and competitiveness - a challenge that will likely influence issues of urban quality such

as the economy, culture, social and environmental conditions, changing a given city's profile as well as urban quality in terms of its composition and characteristics.

NEW YORK TIMES
BESTSELLER • From the author of *On Tyranny* comes a stunning new chronicle of the rise of authoritarianism from Russia to Europe and America. "A brilliant analysis of our time."—Karl Ove Knausgaard, *The New Yorker* With the end of the Cold War, the victory of liberal democracy seemed final. Observers declared the end of history, confident in a peaceful, globalized future. This faith was

misplaced.
Authoritarianism returned to Russia, as Vladimir Putin found fascist ideas that could be used to justify rule by the wealthy. In the 2010s, it has spread from east to west, aided by Russian warfare in Ukraine and cyberwar in Europe and the United States. Russia found allies among nationalists, oligarchs, and radicals everywhere, and its drive to dissolve Western institutions, states, and values found resonance within the West itself. The rise of populism, the British vote against the EU, and the election of Donald Trump were all Russian goals, but their achievement reveals the vulnerability of Western societies. In this forceful and unsparing work of

contemporary history, based on vast research as well as personal reporting, Snyder goes beyond the headlines to expose the true nature of the threat to democracy and law. To understand the challenge is to see, and perhaps renew, the fundamental political virtues offered by tradition and demanded by the future. By revealing the stark choices before us--between equality or oligarchy, individuality or totality, truth and falsehood--Snyder restores our understanding of the basis of our way of life, offering a way forward in a time of terrible uncertainty.

Guerrilla Girls: The Art

of Behaving Badly is the first book to catalog the entire career of the Guerrilla Girls from 1985 to present. The Guerrilla girls are a collective of political feminist artists who expose discrimination and corruption in art, film, politics, and pop culture all around the world. This book explores all their provocative street campaigns, unforgettable media appearances, and large-scale exhibitions.

- Captions by the Guerrilla Girls themselves contextualize the visuals.
- Explores their well-researched, intersectional takedown of the patriarchy

In 1985, a group of masked feminist avengers—known as

the Guerrilla Girls—papered downtown Manhattan with posters calling out the Museum of Modern Art for its lack of representation of female artists. They quickly became a global phenomenon, and the fearless activists have produced hundreds of posters, stickers, and billboards ever since.

- More than a monograph, this book is a call to arms.
- This career-spanning volume is published to coincide with their 35th anniversary.
- Perfect for artists, art lovers, feminists, fans of the Guerrilla Girls, students, and activists

underwent urbanization and industrialization with considerable delay. Nevertheless beginning in the second half of the 19th century, the towns in the Romanov and Habsburg empires, as well as in the Balkans grew into cities and metropolitan areas. They changed at an astonishing pace. This transformation has long been interpreted as an attempt to overcome the economic and cultural backwardness of the region and to catch up to Western Europe.

An exciting new monograph from Cuban-American artist Jorge Pardo documenting over 20 public projects from the artist's oeuvre in

one volume for the first time. Includes texts by Emma Enderby, Maja Hoffman, Ian Volner, and an interview with Hans Ulrich Obrist.

'Jorge Pardo: Public Projects and Commissions, 1996-2018', is the first monograph focusing strictly on the public works and commissions of artist Jorge Pardo. The volume documents, in extensive detail, twenty-four seminal public projects and installations from Pardo's oeuvre, in over 200 richly illustrated pages. From private residences and boutique hotels to museum installations, city squares, and cafés the book takes a close look at an artist who has toed the line between designer, architect, and

craftsman for over thirty years. The publication also presents twelve never-before-seen "unrealized projects" from the artist's career, discussed in conversation with curator and art historian Hans Ulrich Obrist. Includes texts by curator Emma Enderby, patron Maja Hoffman, and writer Ian Volner. Beautifully designed by Los Angeles based designer Garrick Gott, with over 150 full-color reproductions. Truth Springer Published to accompany the 1994 exhibition at The Museum of Modern Art, New York, this book constitutes the most extensive survey of modern illustrated books to be offered in many years. Work by

artists from Pierre Bonnard to Barbara Kruger and writers from Guillaume Apollinaire to Susan Sontag. An important reference for collectors and connoisseurs. Includes notable works by Marc Chagall, Henri Matisse, and Pablo Picasso. Boston's Massacre Harvard University Press Research on visual perception in schizophrenia has a long history. However, it is only recently that it has been included in mainstream efforts to understand the cognitive neuroscience of the disorder and to assist with biomarker and treatment development (e.g., the NIMH CNTRICS and RDoC initiatives). Advances in our understanding of visual

disturbances in schizophrenia can tell us about both specific computational and neurobiological abnormalities, and about the widespread computational and neurobiological abnormalities in the illness, of which visual disturbances constitute well-studied, replicable, low-level examples. Importantly, far from being a passive sensory registration process, visual perception is active, inferential, and hypothesis-generating, and therefore can provide excellent examples of breakdowns in general brain functions in schizophrenia. Despite progress made in understanding visual processing disturbances in schizophrenia, many

challenges exist and many unexplored areas are in need of examination. For example, the directional relationships between perceptual and cognitive disturbances (e.g., in attention, memory, executive function, predictive coding) remain unclear in many cases, as do links with symptoms, including visual hallucinations. The effect of specific visual disturbances on multisensory integration in schizophrenia has also not been explored. In addition, few studies of vision in schizophrenia have used naturalistic stimuli, including real-world objects, and almost no studies have examined processing during interaction with objects or visual

exploration, which can provide important data on functioning of the perception for action pathway. Relatedly, studies of visual processing in schizophrenia have also not been conducted within contexts that include emotional stimulation and the presence of reinforcers - characteristics of many real-world situations - and the consequences of this are likely to be an incomplete view of how and when perception is abnormal in the condition. An additional important area involves treatment of visual disturbances in schizophrenia. Two major questions regarding this are: 1) can visual processing be improved in cases where it is impaired

(and by what types of interventions affecting which cognitive and neurobiological mechanisms)? and 2) what are the clinical and functional benefits of improving specific visual functions in people with schizophrenia? Other important and understudied questions concern: 1) the extent to which indices of visual functioning can serve as biomarkers such as predictors of relapse, treatment response, and/or recovery; 2) the potential role of visual functioning in diagnosing and predicting illness; 3) the extent to which some visual perception disturbances are diagnostically specific to schizophrenia; and 4) the extent to which visual disturbances are

truly manifestations of disease, as opposed to aspects of normal variation that, in combination with disease, serves to modify the clinical presentation. This *Frontiers Research Topic* explores some of these, and other issues facing this exciting interface between vision science and schizophrenia research. We include papers that span the entire range of different *Frontiers* paper types, including those that are data driven (using psychophysics, electroencephalography, neuroimaging, computational and animal models, and other methods), reviews, hypotheses, theories, opinion, methods, areas of impact, and historical

perspectives.

 "Fascinating... Hinderaker's meticulous research shows that the Boston Massacre was contested from the beginning... [Its] meanings have plenty to tell us about America's identity, past and present."
 —Wall Street Journal
 On the night of March 5, 1770, British soldiers fired into a crowd gathered in front of Boston's Custom House, killing five people. Denounced as an act of unprovoked violence and villainy, the event that came to be known as the Boston Massacre is one of the most famous

and least understood incidents in American history. Eric Hinderaker revisits this dramatic confrontation, examining in forensic detail the facts of that fateful night, the competing narratives that molded public perceptions at the time, and the long campaign to transform the tragedy into a touchstone of American identity. "Hinderaker brilliantly unpacks the creation of competing narratives around a traumatic and confusing episode of violence. With deft insight, careful research, and lucid writing, he shows how the bloodshed in one Boston street became pivotal to making and remembering a revolution that created a nation." —Alan Taylor, author of

American Revolutions
