*Gelato* by Jenna Evans Welch It's no one's fault that Hallie Jacob is alone. That her grandpa got sick half a world away and so her parents yanked her to Colorado the last semester of her senior year. That career-wise, she's specialized in fighting fire, and now she's surrounded by ice, snow, and a thousand cousins she's half-banned from hanging around with. But that's what's happened. That's what her December looks like. On one big family weekend in the freaking

tundra, Hallie sneaks off with those cousins to an abandoned ski slope. But they get caught in a random mudslide, and what started as a Secret Bonfire Party goes in a Potential Donner Party direction real fast. With some cousins in desperate need of medical attention, Hallie leaves their camp for help—and is surprised when Jonah Ramirez (her cousin's extremely off-limits—absurdly hot—best friend) joins her. Facing paralyzing temperatures, sharp-toothed animals

strong enough to survive a climate with hardly any water or air, and weather phenomena so wicked they'll wreck a mountain before you can blink, Jonah and Hallie have no choice but to trust each other as they search for the way to town to send help back to their stranded friends and family. And THAT may be more impossible, even, than making it out alive. [Good Night Stories for Rebel Girls - The Chapter Book Collection](#) Philip's Specifically designed for absolute beginners and

casual stargazers without a telescope, this guide highlights over 100 astronomical events in 2020 - all visible with only your eyes or binoculars. The guide showcases events visible in both the evening and morning sky and includes; \* Pairings of the Moon with planets, bright stars and star clusters \* The

best opportunities to see Mercury, Venus, Mars, Jupiter and Saturn \* Meteor showers \*Bright stars and constellations You don't need to be an expert. You don't need to know the jargon. You only need a calendar, clear skies and a willingness to explore the universe above and beyond you!

"Delightful and anti-reverential"—Sunday Times (London) With an encyclopedic knowledge of opera and a delightful dash of irreverence, Sir Denis Forman throws open the world of opera—its structure, composers, conductors, and artists—in this hugely informative guide. A Night at the Opera dissects the eighty-three most popular operas recorded on

compact disc, from Cilea's Adriana Lecouvreur to Mozart's Die Zauberflöte. For each opera, Sir Denis details the plot and cast of characters, awarding stars to parts that are “worth looking out for,” “really good,” or, occasionally, “stunning.” He goes on to tell the history of each opera and its early reception. Finally, each work is graded from alpha to gamma (although the Ring cycle gets an “X”), and Sir Denis has no qualms about voicing his opinion: the first act of Fidelio is “a bit of a

mess,” while the last scene of Don Giovanni “towers above the comic finales of Figaro and Così and whether or not [it] is Mozart's greatest opera, it is certainly his most powerful finale.” The guide also presents brief biographies of the great composers, conductors, and singers. A glossary of musical terms is included, as well as Operatica, or the essential elements of opera, from the proper place and style of the audience's applause (and boos) to the use of subtitles. A Night at the

Opera is for connoisseurs and neophytes alike. It will entertain and inform, delight and (perhaps) infuriate, providing a subject for lively debate and ready reference for years to come.
