All people are equal but, as Human Diversity explores, all groups of people are not the same -- a fascinating investigation of the genetics and neuroscience of human differences. The thesis of Human Diversity is that advances in genetics and neuroscience are overthrowing an intellectual orthodoxy that has ruled the social sciences for decades. The core of the orthodoxy consists of three dogmas: - Gender is a social construct. - Race is a social construct. - Class is a function of privilege. The problem is that all three dogmas are half-truths. They have stifled progress in understanding the rich texture that biology adds to our understanding of the social, political, and economic worlds we live in. It is not a story to be feared. "There are no monsters in the closet," Murray writes, "no dread doors we must fear opening." But it is a story that needs telling. Human Diversity does so without sensationalism, drawing on the most authoritative scientific findings, celebrating both our many differences and our common humanity.

The Washington Redskins franchise remains one of the most valuable in professional sports, in part because of its easily recognizable, popular, and profitable brand. And yet “redskins” is a derogatory name for American Indians. The number of grassroots campaigns to change the name has risen in recent years despite the current team owner’s assertion that the team will never do so. Franchise owners counter criticism by arguing that the team name is positive and a term of respect and honor that many American Indians embrace. The NFL, for its part, actively defends the name and supports it in court. Prominent journalists, politicians, and former players have publicly spoken out against the use of “Redskins” as the name of the team. Sportscaster Bob Costas denounced the name as a racial slur during a halftime show in 2013. U.S. Representative Betty McCollum marched outside the stadium with other protesters--among them former Minnesota Vikings player Joey Browner--urging that the name be changed. *Redskins: Insult and Brand* examines how the ongoing struggle over the team name raises important questions about how white Americans perceive American Indians, about the cultural power of consumer brands, and about continuing obstacles to inclusion and equality. C. Richard King examines the history of the team’s name, the evolution of the term “redskin,” and the various ways in which people both support and oppose its use today. King’s hard-hitting approach to the team’s logo and mascot exposes the disturbing history of a moniker’s association with the NFL—a multibillion-dollar entity that accepts public funds—as well as popular attitudes toward Native Americans today.

*Gender, Race, and Class in Media* provides students a comprehensive and critical introduction to media studies by encouraging them to analyze their own media experiences and interests. Editors Bill Yousman, Lori Bindig Yousman, Gail Dines, and Jean McMahon Humez explore some of the most important forms of today’s popular culture—including the Internet, social media, television, films, music, and advertising—in three distinct but related areas of investigation: the political economy of production, textual analysis, and audience response. Multidisciplinary issues of power related to gender, race, and class are integrated into a wide range of articles examining the economic and cultural implications of mass media as institutions. Reflecting the rapid evolution of the field, the Sixth Edition includes 18 new readings that enhance the richness, sophistication, and diversity that characterizes contemporary media scholarship.

The story of gay rights has long been told as one of single-minded focus on the fight for sexual freedom. Yet its origins are much more complicated than this single-issue interpretation would have us believe, and to ignore gay liberation's multidimensional beginnings is to drastically underestimate its radical potential for social change. Ferguson shows how queer liberation emerged out of various insurgent struggles crossing the politics of race, gender, class, and sexuality, and deeply connected to issues of colonization, incarceration, and capitalism. Tracing the rise and fall of this intersectional politics, he argues that the one-dimensional mainstreaming of queerness falsely placed critiques of racism, capitalism, and the state outside the remit of gay liberation. As recent activism is increasingly making clear, this one-dimensional legacy has promoted forms of exclusion that marginalize queers of color, the poor, and transgender individuals. This forceful book joins the call to reimagine and reconnect the fight for social justice in all its varied forms.

From one of our most important scholars and civil rights activist icon, a powerful study of the women’s liberation movement and the tangled knot of oppression facing Black women. “Angela Davis is herself a woman of undeniable courage. She should be heard.”—The New York Times Angela Davis provides a powerful history of the social and political influence of whiteness and elitism in feminism, from abolitionist days to the present, and demonstrates how the racist and classist biases of its leaders inevitably hampered any collective ambitions. While Black women were aided by some activists like Sarah and Angelina Grimke and the suffrage cause found unwavering support in Frederick Douglass, many women played on the fears of white supremacists for political gain rather than take an intersectional approach to liberation. Here, Davis not only contextualizes the legacy and pitfalls of civil and women’s rights activists, but also discusses Communist women, the murder of Emmitt Till, and Margaret Sanger’s racism. Davis

shows readers how the inequalities between Black and white women influence the contemporary issues of rape, reproductive freedom, housework and child care in this bold and indispensable work.

*Intersectionality and Relational Psychoanalysis: New Perspectives on Race, Gender, and Sexuality* examines the links between race, gender, and sexuality through the dual perspectives of relational psychoanalysis and the theory of intersectionality. This anthology discusses the ways in which clinicians and patients inadvertently reproduce experiences of privilege and marginalization in the consulting room. Focusing particularly on the experiences of immigrants, women of color, sex workers, and LGBTQ individuals, the contributing authors explore how similarities and differences between the patient's and analyst's gender, race, and sexual orientation can be acknowledged, challenged, and negotiated. Combining intersectional theory with relational psychoanalytic thought, the authors introduce a number of thought-provoking clinical vignettes to suggest how adopting an intersectional approach can help us navigate the space between pathology and difference in psychotherapy. By bringing together these new psychoanalytically-informed perspectives on clinical work with minority and marginalized individuals, *Intersectionality and Relational Psychoanalysis* makes an important contribution to psychoanalysis, psychology, and social work.

For bell hooks, the best cultural criticism sees no need to separate politics from the pleasure of reading. Yearning collects together some of hooks's classic and early pieces of cultural criticism from the '80s. Addressing topics like pedagogy, postmodernism, and politics, hooks examines a variety of cultural artifacts, from Spike Lee's film Do the Right Thing and Wim Wenders's film Wings of Desire to the writings of Zora Neale Hurston and Toni Morrison. The result is a poignant collection of essays which, like all of hooks's work, is above all else concerned with transforming oppressive structures of domination.

**Race, Gender, and the Origins of American Gynecology** University of Georgia Press

The accomplishments of pioneering doctors such as John Peter Mettauer, James Marion Sims, and Nathan Bozeman are well documented. It is also no secret that these nineteenth-century gynecologists performed experimental caesarean sections, ovariectomies, and obstetric fistula repairs primarily on poor and powerless women. Medical Bondage breaks new ground by exploring how and why physicians denied these women their full humanity yet valued them as "medical superbodies" highly suited for medical experimentation. In Medical Bondage, Cooper Owens examines a wide range of scientific literature and less formal communications in which gynecologists created and disseminated medical fictions about their patients, such as their belief that black enslaved women could withstand pain better than white "ladies." Even as they were advancing medicine, these doctors were legitimizing, for decades to come, groundless theories related to whiteness and blackness, men and women, and the inferiority of other races or nationalities. Medical Bondage moves between southern plantations and northern urban centers to reveal how nineteenth-century American ideas about race, health, and status influenced doctor-patient relationships in sites of healing like slave cabins, medical colleges, and hospitals. It also retells the story of black enslaved women and of Irish immigrant women from the perspective of these exploited groups and thus restores for us a picture of their lives.

An eye-opening exploration of how social statuses intersect to shape our identities and produce inequalities. In this fully edited and streamlined Race, Gender, Sexuality, and Social Class: Dimensions of Inequality and Identity, Second Edition, Susan Ferguson has carefully selected readings that open readers' eyes to the ways that social statuses shape our experiences and impact our life chances. The anthology represents many of the leading voices in the field and reflects the many approaches used by scholars and researchers to understand this important and evolving subject. The anthology is organized around broad topics (Identity, Power and Privilege, Social Institutions, etc.), rather than categories of difference (Race, Gender, Class, Sexuality) to underscore this fundamental insight: race, class, gender, and sexuality do not exist in isolation; they often intersect with one another to produce social inequalities and form the bases of our identities in society. Nine readings are new to this edition: Michael Polgar—on Jewish assimilation and culture in the U.S. Katherine Franke—on the 1940 Supreme Court case, *Suneri v. Cassagne*, concerning racial identity Carla Pfeffer—on transgender identity Michelle Alexander—on the New Jim Crow Richard Lachmann—on the decline of the U.S. as an economic and political power Abby Ferber—on privilege and "oppression blindness" Amada Hess—Why Women Aren't Welcome on the Internet Iris Marion Young—Five Faces of Oppression Ellis Cose—Rage of the Privileged "The choice of readings in Race, Gender, Sexuality, and Social Class: Dimensions of Inequality and Identity is better than my current text in terms of inequality and steps of closing the gaps." – Dr. Deden Rukmana, Savannah State University "I really like how Race, Gender, Sexuality, and Social Class: Dimensions of Inequality and Identity deals with underlying concepts rather than difference by x, y, or z." – Ana Villalobos, Brandeis University

This volume investigates how four socially constructed identities (race, gender, class and caste) can be rethought as matrices designed to accumulate various kinds of socio-economic values and to translate and transfer these values from one group to another. Essays in the anthology also attempt to compare the mechanisms deployed by various groups to consolidate identificatory investments. Drawn mainly for the fields of literary and cultural studies, the essays are grouped in four categories. Essays collected under 'Theoretical Approaches' scrutinize the relative value of various approaches; those collected under 'Considerations of Race, Gender, and Sexual Orientation' examine the interaction between these three categories in formation of identities; those grouped under 'Comparative Analysis of African-American and Dalit Writing' provide comparative analyses of the literary productions of these two oppressed groups; and, finally, those under 'The Persistence of Racialized Perceptions' focus on the role of ideologically inflected perception of European colonizers and the persistence of such perception in the categorization and treatment of colonial migrants to the metropolis.
