Wireless Sensor Networks Arkose Press

This work represents a guided tour to the integrated study of time. Through twenty-two connected essays, selected from the author's extensive writings, *Time and Time Again* advances new insights into our understanding of the nature of time seen through the sciences and the humanities.

Shahzia Sikander Wiley-Interscience

The secrets behind China's extraordinary educational system – good, bad, and ugly Chinese students' consistently stunning performance on the international PISA exams— where they outscore students of all other nations in math, reading, and science—have positioned China as a world education leader. American educators and pundits have declared this a "Sputnik Moment," saying that we must learn from China's education

system in order to maintain our status as an education leader and global superpower. Indeed, many of the reforms taking hold in United States schools, such as a greater emphasis on standardized testing and the increasing importance of core subjects like reading and math, echo the Chinese system. We're following in China's footsteps—but is this the direction we should take? *Who's Afraid of the Big Bad Dragon?* by award-winning writer Yong Zhao offers an entertaining, provocative insider's account of the Chinese school system, revealing the secrets that make it both "the best and worst" in the world. Born and raised in China's Sichuan province and a teacher in China for many years, Zhao has a unique perspective on Chinese culture and education. He explains in vivid detail how China turns out the world's highest-achieving students in reading, math, and science—yet by all accounts Chinese educators, parents, and political leaders hate the system and long to send their kids to western schools. Filled with fascinating stories and compelling data, *Who's Afraid of the Big Bad Dragon?* offers a nuanced and sobering tour of education in China. Learn how China is able to turn out the world's highest achieving students in math, science, and reading. Discover why, despite these amazing test scores, Chinese parents, teachers, and political leaders are desperate to leave behind their educational system. Discover how current reforms in the U.S. parallel the classic Chinese system, and how this could help (or hurt) our students' prospects.

Ugly Ways Distributed Art Pub Incorporated

New Vistas is a completely revised five-level integrated series for true beginning to high-intermediate students. The series develops basic life-skills and vocabulary through interesting and

realistic characters and dialogue.

A Short Introduction to Psychoanalysis World Scientific

In today's global world, where Asia is an increasing area of focus, it is vital to explore what it means to 'understand' Asian cultures through English and other languages. This volume presents new research on English in Asia, alongside Mandarin, Cantonese, Hindi-Urdu, Malay, Russian and other languages.

Confessions of a Public Speaker Routledge

Exploring computer applications in second language acquisition, this book addresses issues such as effective use of software in language teaching, values and limitations of computer-assisted testing.

Challenging Islamic Orthodoxy John Wiley & Sons

Learn the fundamental concepts, major challenges, and effective solutions in wireless sensor networking. This book provides a comprehensive and systematic introduction to the fundamental concepts, major challenges, and effective solutions in wireless sensor networking (WSN). Distinguished from other books, it focuses on the networking aspects of WSNs and covers the most important networking issues, including network architecture design, medium access control, routing and data dissemination, node clustering, node localization, query processing, data aggregation, transport and quality of service, time synchronization, network security, and sensor network standards. With contributions from internationally renowned researchers, *Wireless Sensor Networks* expertly strikes a balance between fundamental concepts and state-of-the-art technologies, providing readers with unprecedented insights into WSNs from a networking perspective. It is essential reading for a broad

audience, including academic researchers, research engineers, and practitioners in industry. It is also suitable as a textbook or supplementary reading for electrical engineering, computer engineering, and computer science courses at the graduate level. Teaching Korean as a Foreign Language Cambridge University Press

The English artist Eric Hebborn (1934-1996) explains the secrets of his forging techniques in this illustrated work compiled shortly before his death. Drawings previously attributed to artists such as Picasso and Corot were in fact the work of Hebborn and this work provides an insight through explanations of his work. Inks, papers, pigments, monograms and signatures are all explained as well as Hebborn's own often outrageous speculations about the nature of art and value.

Proteomics Barrons Educational Series

This book is the first work that comprehensively presents the accounts of Lia Eden, a former flower arranger who claims to have received divine messages from the Archangel Gabriel and founded the divine Eden Kingdom in her house in Jakarta. This book places Lia Eden's prophetic trajectory in the context of diverse Indonesian spiritual and religious traditions, by which hundreds of others also claimed to have been commanded by God to lead people and to establish religious groups. This book offers a fresh approach towards the rich Indonesian religious and spiritual traditions with particular attention to the accounts of the emergence of indigenous prophets who founded some popular religions. It presents the history of prophetic tradition which remains alive in Indonesian society from the colonial to reform period. It also explores the ways in which these prophets rebelled

against two hegemonies: colonial power in the past and Islamic orthodoxy in the present. The discussion of this book focuses on Lia Eden including her biography, claims to prophethood and divinity, the development of her group Eden Kingdom, her challenge to Islamic orthodoxy under the banner of the MUI (Indonesian Ulama Council), her persecution by radical groups, her experiences in court trials and imprisonment, and public responses to her emergence. The discussion also covers other themes currently drawing public attention in Indonesia, such as pluralism, religious freedom, tolerance, discrimination against minorities, and secularisation.

From Calculus to Cohomology SAGE Publications

Medical education ? the art and science behind medical teaching and learning ? has progressed remarkably. Teaching and learning have become more scientific and rigorous, curricula are based on sound pedagogical principles, and problem-based and other forms of active and self-directed learning have become the mainstream. We have progressed from the role of problem-identifier to that of solution-provider. This book provides a balanced overview of the "why" of medical education, emphasizing the need for change and adaptation, and the "how", by demonstrating the way concepts and theories of medical education can be of immediate benefit to the medical teacher. In this improved second edition, student assessment, curriculum, outcome-based education, clinical teaching, and problem-based learning receive more emphasis with the addition of new chapters, essential updates, and consolidation. The tone is more pragmatic, with implementable examples and incorporation of newer evidence and better practices. However, one thing has not

changed: the book still targets medical teachers without a formal background in education. Contents: Historical Overview of Medical Education; Global and Regional Perspectives in Medical Education; Change Process and Role of Leadership; Learning Concepts and Philosophies; Curricular Design and Planning; Educational Outcomes; Teaching and Learning Methodology: General, Clinical, PBL; Assessment of Students; Program Evaluation; Research in Medical Education; Glossary and Further Resources.

Basics in Medical Education Weidenfeld & Nicolson

This book is a complete guide for people who want to learn the Korean language, starting from the very beginning, and learn the alphabet and the correct sounds of vowels, consonants, and diphthongs. It was written for people who want an easy but systematic approach to the language. The writer is a non-native speaker who started learning the language from ZERO, just like you and spent years in Korea trying to reach a better level of proficiency in Korean. After a few weeks of study, you will study to recognize words, make sentences, and have simple (but miraculous) conversations with other Korean speakers!

Rapidex English Speaking Course in Urdu McGraw-Hill

Humanities, Social Sciences & World Languages

Teaching Korean as a Foreign Language: Theories and Practices is designed for prospective or in-service Korean as a Foreign Language (KFL) teachers. With contributions from leading experts in the field, readers will gain an understanding of the theoretical framework and practical applications of KFL education in the context of Second Language Acquisition (SLA). The eight chapters explore the history of and current issues in language education,

the practicalities of being a classroom teacher, and teaching and evaluation techniques for developing language and cultural proficiency. This comprehensive volume also includes an annotated bibliography which lists over 500 of the most recent and pertinent research articles and doctoral dissertations in the area. This bibliography will be of great service to students, teachers, and any researchers in applied linguistics and second language acquisition interested in Korean language education.

Tissue Engineering John Wiley & Sons

Tissue Engineering is a comprehensive introduction to the engineering and biological aspects of this critical subject. With contributions from internationally renowned authors, it provides a broad perspective on tissue engineering for students coming to the subject for the first time. In addition to the key topics covered in the previous edition, this update also includes new material on the regulatory authorities, commercial considerations as well as new chapters on microfabrication, materiomics and cell/biomaterial interface. Effectively reviews major foundational topics in tissue engineering in a clear and accessible fashion Includes state of the art experiments presented in break-out boxes, chapter objectives, chapter summaries, and multiple choice questions to aid learning New edition contains material on regulatory authorities and commercial considerations in tissue engineering

Spencertown Academic Press

In this lively book, Benedict R. O'G. Anderson explores the cultural and political contradictions that have arisen from two critical facts in Indonesian history: that while the Indonesian nation is young, the Indonesian nation is ancient originating in

the early seventeenth-century Dutch conquests; and that contemporary politics are conducted in a new language. Bahasa Indonesia, by peoples (especially the Javanese) whose cultures are rooted in medieval times. Analyzing a spectrum of examples from classical poetry to public monuments and cartoons, Anderson deepens our understanding of the interaction between modern and traditional notions of power, the mediation of power by language, and the development of national consciousness. *Language and Power*, now republished as part of Equinox Publishing's Classic Indonesia series, brings together eight of Anderson's most influential essays over the past two decades and is essential reading for anyone studying the Indonesian country, people or language. Benedict Anderson is one of the world's leading authorities on Southeast Asian nationalism and particularly on Indonesia. He is Professor of International Studies and Director of the Modern Indonesia Project at Cornell University, New York. His other works include *Imagined Communities: Reflections on the Origin and Spread of Nationalism* and *The Spectre of Comparisons: Nationalism, Southeast Asia, and the World*.

Korean Language for Beginners TattooFinder.com

Electronic Inspection Copy available here "The best simply got better. The first edition of this book was already quite simply the best introduction to psychoanalysis ever written and has been appropriately extremely popular with teachers and students alike. The thoroughly updated second edition retains all the powerful features of the first including its remarkable clarity and accessibility. The field will be greatly indebted to these authors for many years." - Professor Peter Fonagy, University College

London *A Short Introduction to Psychoanalysis* offers a user-friendly introduction to arguably the most misunderstood of all the psychological therapies. This fully updated and revised second edition explains what psychoanalysis really is and provides the reader with an overview of its basic concepts, historical development, critiques and research base. Demonstrating the far reaching influence of psychoanalysis, the authors - all practicing psychoanalysts - describe how its concepts have been applied beyond the consulting room and examine its place within the spectrum of other psychological theories. The text is enlivened by numerous clinical examples. New to this edition, the book discusses parent infant psychotherapy and mentalization-based therapy (MBT) and further investigates psychotherapy in the NHS and the IAPT programme, with more on the debate between CBT and analytic approaches and includes more on dreaming and attachment theory, with added examples and includes new research studies and addresses the new field of psychosocial studies. This down-to-earth guide provides the ideal 'way-in' to the subject for new trainees. For anyone thinking of becoming a psychoanalyst, the book also provides information on the training process and the structure of the profession.

Islam and the Environment Turtleback Books

Based on a popular course at Cold Spring Harbor Laboratory, this new manual assembles cutting-edge protocols, helpful hints, and lecture notes to teach researchers from a wide variety of disciplines the essential methods of proteomics using state-of-the-art instrumentation. Detailed protocols involving protein microarrays, liquid chromatography, high-throughput cloning of

expression constructs, IMAC, mass spectrometry, MALDI-TOF, and MudPIT are provided, along with well-illustrated descriptions of experimental procedures and lists of recommended Web sites and reading material. *Proteomics: A Cold Spring Harbor Laboratory Course Manual* can be used both as the basis for a course and as a detailed bench manual for those performing indispensable proteomic experiments. It is authored by Andrew J. Link and Joshua LaBaer, both leaders in their fields, who bring complementary expertise to the manual.
