An internationally respected Roman Catholic leader on the mystery-sacrament of marriageMarriage and the family are at the forefront of the burning questions being debated by civil society and the church today. Cultural changes in our increasingly secularized society have dire consequences in the family sphere, requiring a Christian response that is faithful to the Church's tradition, says Marc Cardinal Ouellet.In Mystery and Sacrament of Love Ouellet clearly expounds a theology of marriage and the Catholic Church's understanding of the sacrament celebrated between spouses and God. Developed with influences from Pope Francis, the theological intuitions of Vatican II, the contributions of Saint John Paul II (the "pope of the family"), and the innovative thought of Hans Urs von Balthasar, Ouellet's study lays the foundations for a faithful resurgence of well-being for families in our contemporary day and age.

Philosophical Considerations on Contemporary Music Walter de Gruyter

Fascism, Architecture, and the Claiming of Modern Milan, 1922–1943 chronicles the dramatic architectural and urban transformation of Milan during the nearly twenty years of fascist rule. The commercial and financial centre of Italy and the birthplace of fascism, Milan played a central role in constructing fascism’s national image and identity as it advanced from a revolutionary movement to an established state power. Using a wide range of archival sources, Lucy M. Maulsby analyses the public buildings, from the relatively modest party headquarters to the grandiose Palace of Justice and the Palazzo del Popolo d’Italia, through which Mussolini intended to enhance the city’s image and solidify fascism’s presence in Milan. Maulsby establishes the extent to which Milan’s economic structure, social composition, and cultural orientation affected Il Duce’s plans for the city, demonstrating the influences on urban development that were beyond the control of the fascist regime. By placing Milan’s urban change in its historic context, this book expands our understanding of the relationship between fascism and the modern city.

Il costume antico e moderno, o: Storia del governo, della milizia, della religione, delle arti, scienze ed usanze di tutti i popoli antichi e moderni Guida Editori

The musical universe of the 20th and 21st centuries is a force-field in which styles, instruments, personalities and stories can be found that are ascribable to conceptual frameworks that may differ greatly one from another. Such complexity cannot be traced back to single theories or all-encompassing interpretations, but may be tackled, philosophically, starting from certain characteristics. This book identifies nine such characteristics: namely, Extremes, Noise, Silence, Technology, Audience, Listening, Freedom, Disintegration, and New Media. Each of these permits us to open up unforeseen philosophical-cultural paths and interpret, in its multifarious variety, the developments of contemporary music, profoundly interwoven with the history of thought, culture and society.

This is the third volume of Models of the History of Philosophy, a collaborative work on the history of the history of philosophy dating from the Renaissance to the end of the nineteenth century. The volume covers a decisive period in the history of modern thought, from Voltaire and the great “Encyclopédie” of Diderot and d’Alembert to the age of Kant, i.e. from the histoire de l’esprit humain animated by the idea of progress to the a priori history of human thought. The interest of the philosophes and the Kantians (Buhle and Tennemann) in the study and the reconstruction of the

philosophies of the past was characterized by a spirit that was highly critical, but at the same time systematic. The material is divided into four large linguistic and cultural areas: the French, Italian, British and German. The detailed analysis of the 35 works which can be considered to be “general” histories of philosophy is preceded and accompanied by lengthy introductions on the historical background and references to numerous other works bordering on philosophical historiography.

“Modern Italy” may sound like an oxymoron. For Western civilization,Italian culture represents the classical past and the continuity of canonical tradition,while modernity is understood in contrary terms of rupture and rapid innovation. Charting the evolution of a culture renowned for its historical past into the 10 modern era challenges our understanding of both the resilience of tradition and the elasticity of modernity. We have a tendency when imagining Italy to look to a rather distant and definitely premodern setting. The ancient forum, medieval cloisters,baroque piazzas,and papal palaces constitute our ideal itinerary of Italian civilization. The Campo of Siena,Saint Peter’s,all of Venice and San Gimignano satisfy us with their seemingly unbroken panoramas onto historical moments untouched by time;but elsewhere modern intrusions alter and obstruct the view to the landscapes of our expectations. As seasonal tourist or seasoned historian,we edit the encroachments time and change have wrought on our image of Italy. The learning of history is always a complex task,one that in the Italian environment is complicated by the changes wrought everywhere over the past 250 years. Culture on the peninsula continues to evolve with characteristic vibrancy. Italy is not a museum. To think of it as such—as a disorganized yet phenomenally rich museum unchanging in its exhibits—is to misunderstand the nature of the Italian cultural condition and the writing of history itself.

The first comprehensive study on the role of Italian fashion and Italian literature, this book analyzes clothing and fashion as described and represented in literary texts and costume books in the Italy of the 16th and 17th centuries. Writing Fashion in Early Modern Italy emphasizes the centrality of Italian literature and culture for understanding modern theories of fashion and gauging its impact in the shaping of codes of civility and taste in Europe and the West. Using literature to uncover what has been called the ‘animatedness of clothing,’ author Eugenia Paulicelli explores the political meanings that clothing produces in public space. At the core of the book is the idea that the texts examined here act as maps that, first, pinpoint the establishment of fashion as a social institution of modernity; and, second, gauge the meaning of clothing at a personal and a political level. As well as Castiglione’s The Book of the Courtier and Cesare Vecellio’s The Clothing of the Renaissance World, the author looks at works by Italian writers whose books are not yet available in English translation, such as those by Giacomo Franco, Arcangela Tarabotti, and Agostino Lampugnani. Paying particular attention to literature and the relevance of clothing in the shaping of codes of civility and style, this volume complements the existing and important works on Italian fashion and material culture in the Renaissance. It makes the case for the centrality of Italian literature and the interconnectedness of texts from a variety of genres for an understanding of the history of Italian style, and serves to contextualize the debate on dress in other European literatures.
