RHODES SHANNON

Chemistry Leaving Certificate Ordinary
Level and Higher Level Guidelines for
Teachers Singapore Asia Publishers Pte Ltd

This is a chemistry textbook written in line with the 2013 GCE Ordinary level science (chemistry) syllabus from the Ministry of Education, Singapore.

Chemistry MacMillan UK

O-Level Chemistry Examination Notes is specially compiled to help pupils prepare

for their GCE O-Level Chemistry Examination. This book follows closely the current syllabus. Chemistry concepts are presented in point form for ease of understanding and systematic learning. Clearly illustrated diagrams and tables are also included to help students understand difficult concepts and principles. The author believes that students will find this book a good source of relevant and important notes and a useful revision guide and study aid.

Chemistry Workbook for 'O' Level
Prentice Hall

O-Level Science Chemistry Examination Notes is specially compiled to help pupils prepare for their GCE O-Level Chemistry Examination. This book follows closely the current syllabus. Chemistry concepts are presented in point form for ease of understanding and systematic learning. Clearly illustrated diagrams and tables are also included to help students understand difficult concepts and principles. The author believes that students will find this book a good source of relevant and important notes and a useful revision guide and study aid.

Ordinary Level Practical Chemistry

Heinemann Educational Publishers

This book presents an international perspective of the influence of educational context on science education. The focus is on the interactions between curriculum development and implementation, particularly in non-Western and non-English-speaking contexts (i.e., outside the UK, USA, Australia, NZ, etc.). An important and distinguishing feature of the book is that it draws upon the experiences and research from local experts from an extremely diverse cohort across the world (26 countries in total). The book addresses topics such as: curriculum development; research or evaluation of an implemented curriculum; discussion of pressures driving

curriculum reform or implementation of new curricula (e. g., technology or environmental education); the influence of political, cultural, societal or religious mores on education; governmental or ministerial drives for curriculum reform; economic or other pressures driving curriculum reform; the influence of external assessment regimes on curriculum; and so on.
