INSTANT #1 NEW YORK TIMES BESTSELLER *INSTANT #1 INDIE BESTSELLER* *INSTANT USA TODAY BESTSELLER* *A REESE'S YA BOOK CLUB PICK* "Schwartz's magical novel is at once gripping and tender, and the intricate plot is engrossing as the reader tries to solve the mystery. She doesn't miss a beat in either the characterization or action, scattering clues with a delicate, precise hand. This is, in the end, the story of the anatomy of the human heart." - Booklist (starred review) Dana Schwartz's *Anatomy: A Love Story* is a gothic tale full of mystery and romance. Hazel Sinnett is a lady who wants to be a surgeon more than she wants to marry. Jack Currer is a resurrection man who's just trying to survive in a city where it's too easy to die. When the two of them have a chance encounter outside the Edinburgh Anatomist's Society, Hazel thinks nothing of it at first. But after she gets kicked out of renowned surgeon Dr. Beecham's lectures

for being the wrong gender, she realizes that her new acquaintance might be more helpful than she first thought. Because Hazel has made a deal with Dr. Beecham: if she can pass the medical examination on her own, Beecham will allow her to continue her medical career. Without official lessons, though, Hazel will need more than just her books—she'll need corpses to study. Lucky that she's made the acquaintance of someone who digs them up for a living. But Jack has his own problems: strange men have been seen skulking around cemeteries, his friends are disappearing off the streets, and the dreaded Roman Fever, which wiped out thousands a few years ago, is back with a vengeance. Nobody important cares—until Hazel. Now, Hazel and Jack must work together to uncover the secrets buried not just in unmarked graves, but in the very heart of Edinburgh society.

Offers an innovative plan to eliminate inequalities in American health care and save the lives they endanger Over 84,000 black and brown lives are needlessly lost each year due to health disparities: the unfair, unjust, and avoidable differences between

the quality and quantity of health care provided to Americans who are members of racial and ethnic minorities and care provided to whites. Health disparities have remained stubbornly entrenched in the American health care system—and in Just Medicine Dayna Bowen Matthew finds that they principally arise from unconscious racial and ethnic biases held by physicians, institutional providers, and their patients. Implicit bias is the single most important determinant of health and health care disparities. Because we have missed this fact, the money we spend on training providers to become culturally competent, expanding wellness education programs and community health centers, and even expanding access to health insurance will have only a modest effect on reducing health disparities. We will continue to utterly fail in the effort to eradicate health disparities unless we enact strong, evidence-based legal remedies that accurately address implicit and unintentional forms of discrimination, to replace the weak, tepid, and largely irrelevant legal remedies currently available. Our continued failure to fashion an effective response that purges the effects of implicit bias from American health care, Matthew argues, is unjust and morally untenable. In this book, she unites medical, neuroscience, psychology, and sociology research on implicit bias and health disparities with her own expertise in civil rights and constitutional law. In a time when the health of the entire nation is at risk, it is essential to confront the issues keeping the health care system from providing equal treatment to all.

[A Strong and Steady Pulse](#) Princeton University Press

In one form or another, health care now gets rationed. Not everything beneficial is done for every patient. For the individual

the consequences are sometimes tragic. Rationing decisions thus raise a classic dilemma: how can we treat with dignity and genuine respect the person who gets short-changed by an efficient policy that seems best overall? Strong Medicine argues that we can, if those policies represent the hard trade-off preferences of patients controlling resources for their larger lives. Rationing is still strong medicine to swallow, but then it becomes what patients as well as the doctor ordered. Menzel develops this central idea and applies it to major issues of health policy and economics: the notion of pricing life, the long-run cost of prevention, measuring quality of life, imperiled newborns, adequate care for the poor, containing costs by market competition, malpractice suits, procuring organs for transplant, and dying expensively in old age. He provides a hard-hitting, critical philosophical discussion of these issues, in non-technical language accessible to a wide range of readers interested in policy questions the book takes up. The issues are fascinating, the arguments are careful, and the results often surprising.

Wild Spirits, Strong Medicine Simon and Schuster

Master storyteller Arthur Hailey's New York Times–bestselling novel takes readers behind the scenes of the billion-dollar pharmaceutical drug industry. It starts as a routine case: Mary Rowe contracts hepatitis from unclean drinking water, and the infection should work its way out of her system in a few days. But when the illness worsens and she slips into a coma, Dr. Andrew Jordan is forced to tell Rowe's husband that his wife is dying. It's 1957 and there simply isn't a drug that can save her.

Pharmaceutical saleswoman Celia de Grey then offers Dr. Jordan

a sample of an experimental drug that cures the dying woman overnight. This marks the beginning of an epic journey—and a great romance—for a dedicated internist and an idealistic, ambitious woman. The miracle cure establishes de Grey as a rising star within the industry. But as the years pass, she and her husband, Dr. Jordan, begin to realize that her bosses are driven not by the desire to eradicate disease, but by greed. Millions can be made in matters of life and death—for those who don't mind getting blood on their hands.

The Moneychangers Feiwel & Friends

FIRST, DO NO HARM Dr. Calista St. James had been bound to that oath in her work for the Global Crisis Alliance. In the world's most dangerous countries, she had healed the needy and defied the ruthless mercenaries who'd tried to stop her. Then she'd been dishonorably dismissed after a tragedy that haunted her still. Now the Alliance wanted her back—and they had information to ensure her cooperation. The lover she'd believed dead was alive, a prisoner in a militant-controlled territory in Russia. But secrets lay deep in the Russian wilderness. And Calista had to expose the truth at the risk of losing everything—again.

The Evening News NYU Press

"Wild Spirits, Strong Medicine: African Art and the Wilderness explores African concepts of the nature/culture, wilderness/village dichotomy as it is expressed through works of art. The opposition between nature and culture, one of the fundamental organizing principles of African cosmologies, is an old topic in anthropological discourse. It has, however, never been closely examined in African art. African ideas about the qualities of the wilderness and the village give us insights into

African concepts of civilization. These ideas are explored through a sifting of past research and current studies on the subject, and the inclusion of related works of art"--Jacket.

Love Medicine Penguin

This satirical novel by the Nobel Prize-winning author of *It Can't Happen Here* examines medicine in the modern world through the eyes of an idealistic man. The assistant of a small-town midwestern doctor, young Martin Arrowsmith is fascinated with the contents of *Gray's Anatomy*. Eager to pursue an adventurous career in medicine and science, he eventually sets off for medical school, where he hopes to dedicate himself to research. But as Martin progresses through life, he encounters qualities in humans more troublesome than any of the specimens he examines under a microscope. Happiness almost eludes him until his mentor offers him a post at a prestigious institute—which soon sends Martin to a plague ravaged Caribbean island. There he must show what he is truly made of . . . A perennial favorite of medical students to this day, Arrowsmith won author Sinclair Lewis the Pulitzer Prize in 1926, which he declined. "Beyond doubt the best of Mr. Lewis's novels . . . Absorbing and illuminating." —The Spectator

Strong Medicine Milkweed Editions

"Wonderful... Physicians would do well to learn this most important lesson about caring for patients." —The New York Times Book Review Over the years that Victoria Sweet has been a physician, "healthcare" has replaced medicine, "providers" look at their laptops more than at their patients, and costs keep soaring, all in the ruthless pursuit of efficiency. Yet the remedy that economists and policy makers continue to miss is also

miraculously simple. Good medicine takes more than amazing technology; it takes time—time to respond to bodies as well as data, time to arrive at the right diagnosis and the right treatment. Sweet knows this because she has learned and lived it over the course of her remarkable career. Here she relates unforgettable stories of the teachers, doctors, nurses, and patients through whom she discovered the practice of Slow Medicine, in which she has been both pioneer and inspiration. Medicine, she helps us to see, is a craft and an art as well as a science. It is relational, personal, even spiritual. To do it well requires a hard-won wisdom that no algorithm can replace—that brings together “fast” and “slow” in a truly effective, efficient, sustainable, and humane way of healing.

The Moneychangers Ernst Klett Sprachen

Master storyteller Arthur Hailey’s #1 New York Times bestseller is a turbocharged thriller about America’s automobile industry, from the bottom up Ford. Chrysler. General Motors. They were the Big Three, accused by critics of greed, monopoly, and abusing the public trust. In the shadows of these towering giants is American Motors, blazing its own path to greatness. Adam Trenton, the fiercely ambitious executive in charge of project development, wants to take the company into the future with the new, cutting-edge car he’s developing, but his single-minded dedication has his neglected wife seeking dangerous thrills, making Adam vulnerable to a growing web of deceit, blackmail, and organized crime. From Detroit’s inner city to its affluent suburbs, from the executive suites and secret design studios to the assembly line jungle and the maximum security testing grounds, *Wheels* is a breakneck ride full of human drama through one of America’s

most complex and competitive industries.

Overload W. W. Norton & Company

Argues that doctors are deliberately misinformed by profit-seeking pharmaceutical companies that casually withhold information about drug efficacy and side effects, explaining the process of pharmaceutical data manipulation and its global consequences. By the best-selling author of *Bad Science*.

Cancer Ward Macmillan

The #1 bestselling author of the blockbuster thrillers *Airport* and *Hotel* takes on the world of high finance: “Cliched, lurid and utterly absorbing” (Philip Hensher, *The Guardian*). Ben Roselli, president of First Mercantile American Bank and grandson of the founder, makes the shocking announcement that he’s dying. With no offspring to inherit the company, Roselli knows that executive VPs Roscoe Heyward and Alex Vandervoort are the obvious candidates to succeed him. Heyward, who has been with First Mercantile for two decades, will do whatever it takes to bring in new clients and win the coveted presidency. Vandervoort, a newcomer from the Federal Reserve with a left-wing girlfriend, advocates for a socially responsible plan of growth. And now the discovery of counterfeit cash and credit card fraud threatens the future of the bank itself. From the day-to-day business dealings to the inner sanctums of the money trading center and the boardroom, Hailey’s novel is a riveting tale of ambition, greed, and the US banking system.

Anatomy: A Love Story Odyssey Editions

New York Times Bestseller Finalist for the 2022 Pulitzer Prize in Biography “Janice P. Nimura has resurrected Elizabeth and Emily Blackwell in all their feisty, thrilling, trailblazing splendor.”

—Stacy Schiff Elizabeth Blackwell believed from an early age that she was destined for a mission beyond the scope of "ordinary" womanhood. Though the world at first recoiled at the notion of a woman studying medicine, her intelligence and intensity ultimately won her the acceptance of the male medical establishment. In 1849, she became the first woman in America to receive an M.D. She was soon joined in her iconic achievement by her younger sister, Emily, who was actually the more brilliant physician. Exploring the sisters' allies, enemies, and enduring partnership, Janice P. Nimura presents a story of trial and triumph. Together, the Blackwells founded the New York Infirmary for Indigent Women and Children, the first hospital staffed entirely by women. Both sisters were tenacious and visionary, but their convictions did not always align with the emergence of women's rights—or with each other. From Bristol, Paris, and Edinburgh to the rising cities of antebellum America, this richly researched new biography celebrates two complicated pioneers who exploded the limits of possibility for women in medicine. As Elizabeth herself predicted, "a hundred years hence, women will not be what they are now."

The Cat - E-Book Penguin

A seasoned cardiologist shares his experiences, opinions, and recommendations about heart disease and other cardiac problems A Strong and Steady Pulse: Stories from a Cardiologist provides an insider's perspective on the field of cardiovascular medicine told through vignettes and insights drawn from Gregory D. Chapman's three decades as a cardiologist and professor of medicine. In twenty-six bite-sized chapters based on real-life patients and experiences, Chapman provides an overview of

contemporary cardiovascular diseases and treatments, illuminating the art and science of medical practice for lay audiences and professionals alike. With A Strong and Steady Pulse, Chapman provides medical students and general readers with a better understanding of cardiac disease and its contributing factors in modern life, and he also provides insights on the diagnostic process, medical decision making, and patient care. Each chapter presents a patient and their initial appearance, described in clear detail as Chapman gently walks us through his evaluation and the steps he and his associates take to determine the underlying problem. Chapman's stories are about real people dealing with life and death situations—including the physicians, nurses, medical students, and other team members who try to save lives in emergent, confusing conditions. The sometimes hard-won solutions to these medical challenges combine new technology and cutting-edge research together with insights drawn from Chapman's past experiences as an intern and resident in Manhattan during the AIDS epidemic, as a postdoctoral fellow at Duke University in the 1990s, and in practice in Nashville, Tennessee, and Birmingham, Alabama. Conditions addressed include the recognition and management of heart attack, heart failure, arrhythmia, valvular heart disease, cardiac transplantation, broken heart syndrome, hypertension, and the depression some people experience after a heart attack, as well as related topics like statin drugs, the Apple Watch ECG feature, and oral anticoagulants. Finally, the emergence of the COVID-19 virus and its disruption of normal hospital routines as the pandemic unfolded is addressed in an epilogue.

The Only EKG Book You'll Ever Need John Wiley & Sons
 From the bestselling author of *Having Our Say: The Delany Sisters' First 100 Years* comes the inspiring true story of Marion "Strong Medicine" Gould, a Native American matriarch, and the Indian way of life that must never be forgotten. Amy Hill Hearth's first book, *Having Our Say*, told the true story of two century-old African-American sisters and went on to become an enduring bestseller and the subject of a three-time Tony Award-nominated play. In "Strong Medicine" *Speaks*, Hearth turns her talent for storytelling to a Native American matriarch presenting a powerful account of Indian life. Born and raised in a nearly secret part of New Jersey that remains Native ancestral land, Marion "Strong Medicine" Gould is an eighty-five-year-old Elder in her Lenni-Lenape tribe and community. Taking turns with the author as the two women alternate voices throughout this moving book, *Strong Medicine* tells of her ancestry, tracing it back to the first Native peoples to encounter the Europeans in 1524, through the strife and bloodshed of America's early years, up to the twentieth century and her own lifetime, decades colored by oppression and terror yet still lifted up by the strength of an enduring collective spirit. This genuine and delightful telling gives voice to a powerful female Elder whose dry wit and charming humor will provide wisdom and inspiration to readers from every background.

Bad Pharma Open Road Media

A First Nations man helps his estranged father find a place to die in this novel by the award-winning author of *One Drum and Indian Horse*. "Richard Wagamese is a born storyteller."—Louise Erdrich
 When Franklin Starlight is called to visit his father, he has mixed emotions. Raised by the old man he was entrusted to soon

after his birth, Frank is haunted by the brief and troubling moments he has shared with his father, Eldon. When he finally travels by horseback to town, he finds Eldon on the edge of death, decimated from years of drinking. The two undertake a difficult journey into the mountainous backcountry, in search of a place for Eldon to die and be buried in the warrior way. As they travel, Eldon tells his son the story of his own life—from an impoverished childhood to combat in the Korean War and his shell-shocked return. Through the fog of pain, Eldon relates to his son these desolate moments, as well as his life's fleeting but nonetheless crucial moments of happiness and hope, the sacrifices made in the name of love. And in telling his story, Eldon offers his son a world the boy has never seen, a history he has never known. "Deeply felt and profoundly moving...written in the kind of sure, clear prose that brings to mind the work of the great North American masters; Steinbeck among them."—Jane Urquhart, award-winning author of *The Night Stages*
 "A novel about the role of stories in our lives, those we tell ourselves about ourselves and those we agree to live by."—Globe and Mail
Textbook of Rabbit Medicine E-Book Elsevier Health Sciences
 Americans spend \$900 billion a year on health care. That's more than enough dollars to ensure high-quality care for every citizen. Why aren't we getting it? And what can we do about it? In this plainspoken book, George Halvorson cuts to the heart of our health system's failure: the incentives we offer doctors, hospitals, and insurers. We pay for procedures, not outcomes; we reward providers for what they do -- whether it is effective or not -- instead of for improving patient health. The result is the most wasteful, complex, redundant health care system in the world,

where as much as 25 percent of all procedures performed are unnecessary. George Halvorson argues convincingly that if we want to change our system we don't need more government regulation, greater expenditure, or health care rationing. Instead, we need the right incentives. If we reward quality and efficiency, the health care system in this country will turn itself around to provide them. George Halvorson has spent twenty-five years on the front lines of health care. He has been president of an insurance company and a senior officer at Blue Cross & Blue Shield. Today, he manages one of the country's largest and most successful managed care organizations. This lively, readable book combines the truths and eye-opening examples he has gathered on the job with the best research and thinking on health care today. It offers proposals for reform that are readily achievable and that will ensure better-quality care for all Americans.

The Textbook of Pharmaceutical Medicine Zondervan
The #1 New York Times–bestselling author of *Airport* reveals the inner workings of a New Orleans hotel—and the human drama unfolding behind its closed doors. During five sultry days, the lives of the guests, the management, and the workers at New Orleans' largest and most elite hotel converge. The owner has four days to raise the money to save his financially ailing property. The general manager, once blacklisted from the hospitality business, struggles with one crisis after another. A rebellious heiress will do anything to attain her secret desires. The duke and the duchess in the lavish presidential suite are covering up a crime. And within one of the many guest rooms hides a professional thief. Filled with memorable characters and authentic detail about the inner machinery and secrets of a five-

star hotel, this gripping New York Times bestseller sold millions of copies and was adapted for both film and TV. Set in a time when travel was still glamorous and grand independent hotels set the standard for luxury, it's a read like a vacation in itself, from the author of such behind-the-scenes blockbusters as *The Moneychangers* and *Wheels*.

"Strong Medicine" Speaks Elsevier Health Sciences
Inspired by a chance exchange with great-great-granddaughter of Nettie Bolles, the first woman to graduate from an osteopathic medical school, Janice Blumer DO, FAAO committed to writing the book exploring the life and work of Bolles and other women pioneers in the field of osteopathic medicine. In "Strong Medicine", Blumer explores the experiences and achievements of six women who persevered in a predominantly male profession at a time defined by Puritan values. She describes their historical importance as osteopathic students, physicians, researchers, educators, and authors, as well as the personal and professional challenges they overcame as they paved the way for today's students and practitioners of osteopathic medicine.

Airport Cambridge University Press
Terrorists target a TV anchorman and his family in the #1 New York Times–bestselling author's novel set in the high-pressure network news industry. Anchorman Crawford Sloane, a respected reporter who made his name as a Vietnam War correspondent, thrives on the unpredictability of life in the newsroom. Whether he's covering the imminent crash of an airliner in distress, terror in South America, or riots in Eastern Europe, or dealing with the cold-blooded politics of one of America's premier news organizations, he never loses his cool. With terrorism dominating

the evening news, Sloane takes precautions because he knows that as the face of American democracy, he's a prime target for radicals. But when terrorists kidnap his family, he's no longer reporting the news; he's living it. Unwilling to rely on the help of ruthless network executives or the intrepid reporter who was once a rival for the affections of his wife, Sloane sets out to track down the kidnappers himself—and he soon learns that pure terror can lie behind the headlines.

Strong Medicine Macmillan

The Textbook of Rabbit Medicine second edition is the completely revised and updated new edition of Frances Harcourt Brown's acclaimed text covering all aspects of rabbit medicine. While the authoritative and evidence-based approach that made the original book so successful has been retained, in this new second edition well-known rabbit expert Molly Varga adds a stronger clinical focus that makes the Textbook invaluable as a point-of-

care resource as well as a respected reference.
