Set against a background of intense religious and cultural change and tensions over the meanings of nationalism and federalism in both Quebec and Canada, Michael Gauvreau's *The Hand of God* traces the emergence of Claude Ryan as a public intellectual. This is the first comprehensive biography of Ryan based on his personal papers and extensive writings as a social commentator, editorialist, and director of the newspaper *Le Devoir*. At a time of Catholic religious fervour and new currents of social analysis, Ryan spoke for a postwar generation of young Quebecers, assuring his surprising ascension as one of the most influential voices in Canadian liberalism and federalism in the 1960s. In rich detail,

Gauvreau describes Ryan's ideas on religion, politics, and society, which assured his importance both as a major figure seeking the transformation of Roman Catholicism in the 1950s and 1960s and as an advocate of a type of liberalism that was often at odds with Pierre Elliott Trudeau's. He presents compelling new material on the breakdown of social and cultural consensus, a detailed analysis of Ryan's personal and intellectual dealings with both Trudeau and René Lévesque, and a strikingly new interpretation of the motives of the key players in the October Crisis of 1970. A significant rethinking of the relationship between liberalism, nationalism, and federalism in Quebec in the twentieth century, *The Hand of God* uses biography as a lens to explore and shed new light on questions central to postwar Quebec and Canadian cultural, political, and intellectual history.

Déodat de Sédaine (1872-1921) is best known for his piano music but his compositions included orchestral and vocal works, including opera, cantata and incidental music. Claude Debussy described Sédaine's music as "exquisite and rich with ideas." The early works were influenced by Impressionist harmonies, church modes, cyclic techniques, folk-like melodies and Andalusian motives. Sédaine's style changed dramatically in 1907 when he left Paris and began to include Catalan elements in his compositions - a transition that has hitherto gone unrecognized. Robert Waters provides a much-needed study of the life and works of Sédaine, focusing on the composer's regionalist philosophy. Sédaine's engagement with folk music was not a patriotic gesture in the vein of nationalistic composers, but a way of expressing regional identity within France to counter the restrictive styles sanctioned by the Paris Conservatory. His musical philosophy mirrored larger social and political debates regarding anti-centralist positions on education, politics, art and culture in fin de siècle France. Such debates involved political and social leaders whom Sédaine knew and personally admired, including the writer Maurice Barrès and the poet Frédéric Mistral. The book will appeal to those specializing in French music, European ethnic musics, piano music and French music history.

Ecrasez l'infâme! Voltaire's rallying cry against fanaticism resonates with new force today. Nothing suggests the complex legacy of the Enlightenment more than the struggle of superstition, prejudice, and intolerance advocated by most of the Enlightenment philosophers,

regardless of their ideological differences. The aim of this book is to undertake a reconsideration of the controversies surrounding the questions of religion, toleration, and fanaticism in the eighteenth century through an examination of Rousseau's dialogue with Voltaire. What come to light from this confrontation are two leading and at times competing world views and conceptions of the place of the engaged writer in society.

In this groundbreaking new study, Kate van Orden examines noble education in the arts to show how music contributed to cultural and social transformation in early modern French society. She constructs a fresh account of music's importance in promoting the absolutism that the French monarchy would fully embrace under Louis XIV, uncovering many hitherto unpublished ballets and royal ceremonial performances. The great pressure on French noblemen to take up the life of the warrior gave rise

to bellicose art forms such as sword dances and equestrian ballets. Far from being construed as effeminizing, such combinations of music and the martial arts were at once refined and masculine—a perfect way to display military prowess. The incursion of music into riding schools and infantry drills contributed materially to disciplinary order, enabling the larger and more effective armies of the seventeenth century. This book is a history of the development of these musical spheres and how they brought forth new cultural priorities of civility, military discipline, and political harmony. *Music, Discipline, and Arms in Early Modern France* effectively illustrates the seminal role music played in mediating between the cultural spheres of letters and arms.

ESSAI SUR LE LEXIQUE DE GHAZALI

From the first half of the seventeenth century, missionaries of the Society of Jesus ministered to the free and enslaved populations of the French Caribbean colonies. Amongst their number were Jean Mongin (1637–1698) and Claude Breban (1695–1735), whose letters vividly depict the experience of the evolving colonial world. Writing from Martinique, and Saint Kitts (Saint-Christophe), Mongin describes his attempts to convert Protestants, his ministry to the populations of slaves and their mistreatment by colonists, as well as concerns with unorthodox spiritualities. Breban depicts the rhythms of life in the burgeoning slave colony of Saint-Domingue, with the distinctive cultural and linguistic practices – and cruelty – of its plantation environment. Mongin and Breban's letters reflect debates about the transatlantic slave trade, and the nature of human difference, and testify to the cultural and

social environment of early Creole societies. The letters in this volume are an unrivalled source of information about the lives of enslaved people in the early modern French Caribbean. Transcriptions of manuscripts in French are accompanied by facing-page translations into English and notes.

La Pensée Grecque Et Les Origines de L'esprit Scientifique BRILL

Scientific ideas inspired by religious, magical, and alchemical themes competed alongside traditional Aristotelian science and the emerging mechanical philosophy in the early modern era. At the center of this ferment was a quirky and creative German physician, Paracelsus, whose religious-alchemical worldview served as an inspiration for countless scientific

innovators. This collection is about Paracelsus and the wide range of issues he explored, and ones taken up by many who were directly or indirectly affected by the same mental universe that sustained his thought and writings. This volume includes strong contextual studies on Paracelsianism and the larger cultural history of early modern science, including groundbreaking studies on Robert Boyle, François Rabelais, Giovanni Pico della Mirandola, and Johannes Praetorius.
