How to Write an Impressive CV and Cover Letter PREP Publishing

Civil engineers, mechanical engineers, structural engineers, marine engineers, chemical engineers, systems engineers, and engineering support personnel have a lot in common when they want to create a resume, and this book shows resumes and cover letters of individuals who want to work in the field. For those who seek

federal employment, there's a special section showing how to create federal resumes and government applications. Since many technical types aren't writers, this comes as a special gift: select a winning format, plug in your background specs, and away you go. It's that easy-- with REAL RESUMES in hand. - The Midwest Book Review1-885288-42-5 Aviso PREP Publishing  
This book is about writing in the professional mathematical environment. There are few people equal to this task, yet Steven Krantz is one who qualifies.

While the book is nominally about writing, it's also about how to function in the mathematical profession. Those who are familiar with Krantz's writing will recognize his lively, inimitable style. In this volume, he addresses these nuts-and-bolts issues: syntax, grammar, structure, and style; mathematical exposition; use of the computer and T(subscript E)X; E-mail etiquette; and all aspects of publishing a journal article. Krantz's frank and straightforward approach makes this particularly suitable as a textbook. He does not avoid difficult topics. His intent is

to demonstrate to the reader how to successfully operate within the profession. He outlines how to write grant proposals that are persuasive and compelling, how to write a letter of recommendation describing the research abilities of a candidate for promotion or tenure, and what a dean is looking for in a letter of recommendation. He further addresses some basic issues such as writing a book proposal to a publisher or applying for a job.

'[This book] is readable, engaging, informative and provoking' - Tony Rae, ESCalate 'The book is encompassing all my own passions as a holistic practitioner; I feel it is multi-cultural, offering powerfully diverse and inclusive ideas of pedagogy. In particular, the concepts of this book are like a breath of fresh air for the 'disabled' student, talking about alternative assessment etc.' - Helene McArthur, ESCalate `Every now and again you come across a really important book that shifts and clarifies your thinking. The Power of Pedagogy is one of those books. Here you'll find a fascinating analysis of the myriad of issues and ideas surrounding teaching and learning today. Drawing on history, theory and vignettes from today's classrooms, these two experienced and active thinkers and practitioners have managed to provide new perspectives on the pedagogic mission. A remarkable piece of scholarship, it's a 'must' for all those setting out to teach and for those already teaching with the sort of intellectual curiosity that is the hallmark of the outstanding teacher' - Tim Brighouse,

formerly Adviser for London Schools, is Visiting Professor at the Institute of Education 'This important book manages to combine an illuminating breadth of global reference with real insight into the practice of teaching and learning. Its highly readable investigative narrative integrates theory and practice with a quality of analysis that is both rare and entirely convincing' - Sir David Winkley, former Headteacher Grove School, Handsworth and government education advisor The concept of 'pedagogy' has become increasingly important as a frame of reference for debate about teaching and learning. In this book the authors analyse and explore contemporary ideas of pedagogy through the work of key figures including Freire, Montessori and Vygotsky, and explain how a new conception of pedagogy could transform educational institutions, particularly schools. In locating pedagogy as central to the process of education the authors: - explore the historical and cultural antecedents of our understanding of pedagogy - analyse the way understanding of the working of the human mind influences teaching and

learning - review and critique ideas about learning and the construction of knowledge - examine the way new forms of communication are impacting on the processes and purposes of pedagogic activity. Highly relevant for masters and doctoral students of education, this book will also be of interest to educational practitioners undertaking research on issues related to pedagogy, both in the UK and internationally. Bob Moon and the late Jenny Leach have written extensively on pedagogy, teacher education and international developments in the field, including *Learners and Pedagogies* (1999). They lead the Research Group on Teacher Education across Societies and Cultures (RITES) at the Open University, UK. Bob Moon is Professor of Education at the Open University and Director of the Teacher Education in Sub-Saharan Africa (TESSA) Programme. Jenny Leach was Professor of Teacher Learning and Development at the Open University.

'The NHS is a wonderful institution. It largely provides what its founders

intended: medical care for all from cradle to grave, free at the point of use and funded by general taxation. Nevertheless, it's not perfect. Scandals at the Bristol Children's Heart Unit and, more recently, at Stafford General Hospital, Furness General Hospital and Heart of England Foundation Trust, have shaken public confidence. Abysmal care and, worse, the cover-up of patient harm and avoidable death, have come to light. It is against this background that I offer my own story. I was one of those doctors who spoke up for patients and suffered the consequences...' The scandals of poor care and repeated cover-ups in the NHS in recent years have raised serious questions about the mistreatment of NHS whistleblowers. This book is autobiographical and offers the first detailed account of the ruin of a highly competent senior doctor who blew the whistle. Dr David Drew was a NHS consultant at Walsall Manor Hospital for over 19 years, including 7 spent as head of the paediatric department, before ongoing concerns over the state of poor care led him to become a whistleblower. This put him on a collision course with senior NHS hospital managers. Removed

as head of department, he was suspended on trumped up charges, faced allegations of mental illness and disciplinary action and was dismissed for Gross Misconduct and Insubordination. David's eye-opening account gives a unique insight into the NHS procedures that are used to dispose of senior management's critics - at the cost of patient care.
