Not With a Bang But a Whimper Rowman & Littlefield

The first-ever poetry book set on a llama farm, Daniel Lassell's debut collection, *Spit*, examines the roles we play in the act of belonging. It is a portrait of a boy living on a farm populated with chickens sung to sleep by lullaby, captive wolves next door that attack a child, and a herd of llamas learning to survive despite coyotes and a chaotic family. The collection in part explores the role of the body in health and illness and one's treatment of the earth and others. A theme of spirituality also weaves throughout the collection as the speaker treks into adulthood, yearning for peace amid the decline of his parents' marriage. Driven by a "wish to visit / some landless landscape," the speaker eventually leaves his family's farm, only to

find that return is impossible. After losing the farm and the llama herd to his parents' divorce, the speaker wrestles with the role of presence as it relates to healing, remarking, "I wish enough, / to have only // these memories I have." Unflinching at every turn, the collection pushes the boundaries of "home" to arrive upon new meaning, definition, and purpose.

"Is terrorism crime or war? Can there be a 'war against terrorism'? In this fully updated edition, Charles Townshend unravels the questions at the heart of the problem of terrorism - its causes, methods, effects, and limitations - suggesting that it must be understood as a political strategy whose threat can be rationally grasped and answered"--

Life at the Bottom Pantheon
Winner of the Pulitzer prize in 1974 and the culmination of a life's work, *The Denial of Death* is Ernest Becker's brilliant and impassioned answer to the 'why' of human existence. In bold contrast to the predominant Freudian school of thought,

Becker tackles the problem of the vital lie - man's refusal to acknowledge his own mortality. The book argues that human civilisation is a defence against the knowledge that we are mortal beings. Becker states that humans live in both the physical world and a symbolic world of meaning, which is where our 'immortality project' resides. We create in order to become immortal - to become part of something we believe will last forever. In this way we hope to give our lives meaning. In *The Denial of Death*, Becker sheds new light on the nature of humanity and issues a call to life and its living that still resonates decades after it was written.

Presidential Power, Rhetoric, and the Terror Wars: The Sovereign Presidency argues that the War on Terror provided an opportunity to fundamentally change the presidency. Alexander Hiland analyzes the documents used to exercise presidential powers, including executive orders, signing statements, and presidential policy directives. Treating these documents as genres of speech-act that are ideologically motivated, Hiland provides a rhetorical criticism that illuminates the values and

political convictions at play in these documents. This book reveals how both President George W. Bush and President Barack Obama wielded the personal power of the office to dramatically expand the power of the executive branch. During the War on Terror, the presidency shifted from an imperial form that avoided checks and balances, to a sovereign presidency where the executive branch had the ability to decide whether those checks and balances existed. As a result, Hiland argues that this shift to the sovereign presidency enabled the violation of human rights, myriad policy mistakes, and the degradation of democracy within the United States.

Farewell Fear Princeton University Press
David Hufford's work exploring the experiential basis for belief in the supernatural, focusing here on the so-called Old Hag experience, a psychologically disturbing event in which a victim claims to have encountered some form of malign entity while dreaming (or awake). Sufferers report feeling suffocated, held down by some "force," paralyzed, and extremely afraid. The experience is surprisingly common: the author estimates that approximately 15

percent of people undergo this event at some point in their lives. Various cultures have their own name for the phenomenon and have constructed their own mythology around it; the supernatural tenor of many Old Hag stories is unavoidable. Hufford, as a folklorist, is well-placed to investigate this puzzling occurrence.

In Spite of All Terror Liveright Publishing
A short story ushering the reader into the violent and horrifying events that took place during the Reign of Terror following the French Revolution. The tale follows an old ex-Carmelite nun who is hiding from Robespierre with abject fear of what tomorrow may bring. Oozing with mystery and suspense, Balzac's allegorical prose is at its very finest here. The French author who, along with Flaubert, is widely regarded to be one of the founding fathers of realism in European fiction. Honoré de Balzac (1799-1850) was a French novelist and playwright, most famous for his collection of novels and plays, collectively called 'The Human Comedy'. His detailed observation of humanity and realistic depiction of society makes him one of the earliest representatives of realism in Europe. He was a master-creator of

complex characters that often found themselves in ambiguous moral dilemmas.

Ghost story, murder mystery, love letter to American music--White Tears is all of this and more, a thrilling investigation of race and appropriation in society today. Seth is a shy, awkward twentysomething. Carter is more glamorous, the heir to a great American fortune. But they share an obsession with music--especially the blues. One day, Seth discovers that he's accidentally recorded an unknown blues singer in a park. Carter puts the file online,

claiming it's a 1920s recording by a made-up musician named Charlie Shaw. But when a music collector tells them that their recording is genuine--that there really was a singer named Charlie Shaw--the two white boys, along with Carter's sister, find themselves in over their heads, delving deeper and deeper into America's dark, vengeful heart. *White Tears* is a literary thriller and a meditation on art--who owns it, who can consume it, and who profits from it.

Wilson Literary Science Writing Award A Library Journal Best Science & Technology Book of 2020 A Publishers Weekly Best Nonfiction Book of 2020 2020 Goodreads Choice Award Semifinalist in Science & Technology A prize-winning journalist upends our centuries-long assumptions about migration through science, history, and reporting--predicting its lifesaving power in the face of climate change. The news today is full of stories of dislocated people on the move. Wild species, too, are escaping warming seas and desiccated lands, creeping, swimming, and flying in a mass exodus from their past habitats. News media presents this scrambling of the planet's migration patterns as unprecedented, provoking fears of the spread of disease and conflict and waves of anxiety across the Western world. On both sides of the Atlantic, experts issue alarmed predictions of millions of invading aliens, unstoppable as an advancing tsunami, and countries respond by electing anti-immigration leaders who

slam closed borders that were historically porous. But the science and history of migration in animals, plants, and humans tell a different story. Far from being a disruptive behavior to be quelled at any cost, migration is an ancient and lifesaving response to environmental change, a biological imperative as necessary as breathing. Climate changes triggered the first human migrations out of Africa. Falling sea levels allowed our passage across the Bering Sea. Unhampered by barbed wire, migration allowed our ancestors to people the planet, catapulting us into the highest reaches of the Himalayan mountains and the most remote islands of the Pacific, creating and disseminating the biological, cultural, and social diversity that ecosystems and societies depend upon. In other words, migration is not the crisis--it is the solution. Conclusively tracking the history of misinformation from the 18th century through today's anti-immigration policies, *The Next Great Migration* makes the case for a future in which migration is not a source of fear, but of hope.

Al-Qaeda's Armies Lexington Books
A reflection on the diverse ways Western

humanity has attempted to escape its frightening history. This book reflects on Western humanity's efforts to escape from history and its terrors—from the existential condition and natural disasters to the endless succession of wars and other man-made catastrophes. Drawing on historical episodes ranging from antiquity to the recent past, and combining them with literary examples and personal reflections, Teofilo Ruiz explores the embrace of religious experiences, the pursuit of worldly success and pleasures, and the quest for beauty and knowledge as three primary responses to the individual and collective nightmares of history. The result is a profound meditation on how men and women in Western society sought (and still seek) to make meaning of the world and its disturbing history. In chapters that range widely across Western history and culture, *The Terror of History* takes up religion, the material world, and the world of art and knowledge. "Religion and the World to Come" examines orthodox and heterodox forms of spirituality, apocalyptic movements, mysticism, supernatural beliefs, and many forms of esotericism, including magic, alchemy, astrology, and

witchcraft. "The World of Matter and the Senses" considers material riches, festivals and carnivals, sports, sex, and utopian communities. Finally, "The Lure of Beauty and Knowledge" looks at cultural productions of all sorts, from art to scholarship. Combining astonishing historical breadth with a personal and accessible narrative style, *The Terror of History* is a moving testimony to the incredibly diverse ways humans have sought to cope with their frightening history.

"A novelistic mosaic that simultaneously reads like a thriller and like a strange, dreamlike excursion into the subconscious." —The New York Times
Years ago, when *House of Leaves* was first being passed around, it was nothing more than a badly bundled heap of paper, parts of which would occasionally surface on the Internet. No one could have anticipated the small but devoted following this terrifying story would soon command. Starting with an odd assortment of marginalized youth -- musicians, tattoo artists, programmers, strippers,

environmentalists, and adrenaline junkies -- the book eventually made its way into the hands of older generations, who not only found themselves in those strangely arranged pages but also discovered a way back into the lives of their estranged children. Now this astonishing novel is made available in book form, complete with the original colored words, vertical footnotes, and second and third appendices. The story remains unchanged, focusing on a young family that moves into a small home on Ash Tree Lane where they discover something is terribly wrong: their house is bigger on the inside than it is on the outside. Of course, neither Pulitzer Prize-winning photojournalist Will Navidson nor his companion Karen Green was prepared to face the consequences of that impossibility, until the day their two little children wandered off and their voices eerily began to return another story -- of creature darkness, of an ever-growing abyss behind a closet door, and of that unholy growl which soon enough would tear through their walls and consume all their dreams.

Nietzsche believed in the horror of existence: a world filled with meaningless suffering for no reason at all. He also believed in eternal recurrence, the view that our lives will repeat infinitely, and that in each life every detail will be exactly the same. Furthermore, it was not enough for Nietzsche that eternal recurrence simply be accepted; he demanded that it be loved. Thus the philosopher who introduces eternal recurrence is the very same philosopher who also believes in the horror of existence. In this groundbreaking study, Philip Kain develops an insightful account of Nietzsche's strange and paradoxical view that a life of pain and suffering is perhaps the only life it really makes sense to want to live again.
