This multi- and interdisciplinary nature is reflected on the broad scientific background of the team. Withrow and MacEwen's Small Animal Clinical Oncology - Text and VETERINARY CONSULT Package Elsevier Health Sciences This is the first

edited collection on veterinary applications of electroporation. Written by an international team of experts, this book presents worldwide emerging therapy options for cancer treatments in veterinary oncology practice. Electroporation offers a precision tool to target cancer cells without destroying surrounding tissue structures. The opening of tumor cell

membranes facilitates local control of solid tumors either through the delivery of chemotherapeutics or by direct ablation of tissues using electric fields. In addition, transfer of gene-based products into the cancer cells can be used for genetic vaccination to achieve systemic responses and cancer control. Readers will discover valuable reference texts for practitioner

education, including chapters on electrodes for unique anatomical access and treatment planning for deep-seated tumors, different immunotherapy applications with gene electrotransfer, calcium electroporation, irreversible electroporation applications and combinations with other common treatments such as surgery, radiation therapy and chemotherapy. Therapy

options with electroporation are gaining interest around the world in both human and veterinary oncology, making this book valuable for oncologists, surgeons, primary care veterinarians, residents, interns and students at veterinary schools, where teaching of Electrochemotherapy will become part of the curriculum. Featuring cross-disciplinary authorship,

this work further contributes to advances in comparative medicine and translation research in support of the One Health concept.

*Photodynamic Therapy in Veterinary Medicine: From Basics to Clinical Practice*

Elsevier Health Sciences Biomedical engineering brings together bright minds from diverse disciplines, ranging from engineering, physics, and

computer science to biology and medicine. This book contains the proceedings of the 11th Mediterranean Conference on Medical and Biological Engineering and Computing, MEDICON 2007, held in Ljubljana, Slovenia, June 2007. It features relevant, up-to-date research in the area. [Feline Soft Tissue and General Surgery E-Book](#) Elsevier Health Sciences

Provides a comprehensive, detailed and up-to-date summary of all available information on all aspects of feline general and oncological surgery. Gives detailed practical information on how to operate on cats with medical conditions, internal disease and neoplasia. Gives access to website showing videoclips of key surgical procedures. International author team offers

worldwide expertise and appeal. Lavish full-colour line drawings and photographs throughout. *Cancer Chemotherapy for the Veterinary Health Team* John Wiley & Sons Focusing on cancer in dogs and cats, this extensively updated 4th edition provides comprehensive coverage of the latest advances in clinical oncology, including chemotherapy, surgical oncology, and diagnostic

techniques. Ideal for students, practitioners, and those involved in academic research, this book's full-color images and user-friendly format provide quick and easy access to today's most important information on cancer in the small animal patient. **Fundamentals of Surgical Oncology** Elsevier Health Sciences Considered the definitive reference on canine and feline

oncology, Withrow & MacEwen's Small Animal Clinical Oncology, 6th Edition focuses on the most effective, cutting-edge techniques. This comprehensive textbook gives you a complete understanding of cancer in dogs and cats - what it is, how to diagnose it, and how to treat many of the most common cancers encountered in clinical practice today. The

thoroughly updated sixth edition includes information on the complications of cancer, pain management, and the latest treatment modalities - preparing general practitioners to diagnose and treat pets rather than referring them to a specialist. With important updates on recently approved and in-development drugs, and new co-authors adding their

own unique perspectives, this user-friendly text is a must-have resource for current, evidence-based therapeutic strategies on canine and feline oncology. Cutting-edge information on the complications of cancer, pain management, and the latest treatment modalities prepares you to diagnose and treat pets with cancer rather than refer cases to a specialist. Each

contributor is a recognized expert in his or her specialty, reflecting the most current information by highly respected experts in the field of veterinary oncology. Full-color format provides you with accurate visual depictions of specific diseases and procedures, enhances visual appeal, and is used functionally in tables and boxes to highlight key information. A systems approach to

the diagnosis and management of cancer facilitates access to information about the many malignancies affecting small animal patients. Discussion of compassion and supportive care for the management of pain, nutritional needs, and grief includes methods for handling the pet's pain and nutritional complications as well as the pet owner's grief when treatment is

not successful. Comprehensive references at the end of each chapter and topic ensures you can be confident the information provided is accurate and up to date. Helpful drug formularies provide quick access to information on indications, toxicities, and recommended dosages for chemotherapeutic and analgesic drugs used in cancer treatment. Chemotherapy protocols are included when

case studies prove clinical efficacy. Information on the best interventional techniques is quickly accessible all in one chapter. Nearly 400 color images provide accurate depictions of specific diseases and procedures. Focus on the most effective treatment options saves time by emphasizing proven treatment options that have been vetted by experts in the field. NEW!

Expert co-authors and contributors bring a valuable perspective with research experience. NEW! Thoroughly UPDATED content includes important updates on recently approved and in-development veterinary cancer drugs, and critical advances in radiation delivery. **Clinical Equine Oncology E-Book** Praeger This book offers a state-of-the-art,

evidence-based reference to all aspects of veterinary cytology. Truly multidisciplinary in its approach, chapters are written by experts in fields ranging from clinical pathology to internal medicine, surgery, ophthalmology, and dermatology, drawing the various specialties together to create a comprehensive picture of cytology's role in diagnosis and treatment of animal

disease. Firmly grounded in the primary literature, the book focuses on companion animals, with special chapters for species with fewer publications. Chapters are logically organized by body system, with additional chapters on tumors of particular import and diagnostic decision making. The first two sections of Veterinary Cytology focus on cytology techniques, quality control, and special laboratory techniques. Subsequent sections are organ/tissue-based and reflect what is known about the canine, feline, and equine species. This is followed by chapters on non-traditional species, including exotic companion mammals, rabbits, cattle, camelids, non-human primates, reptiles and birds, amphibians, fish, invertebrates, and sheep and goats. The last section highlights some unique features of the applications of cytology in industry settings. Provides a gold-standard reference to data-driven information about cytologic analysis in companion animal species. Brings together authors from a wide range of specialties to present a thorough survey of cytology's use in veterinary medicine. Offers broader species

coverage and greater depth than any cytology reference currently available. Veterinary Cytology is an essential resource for clinical and anatomic pathologists and any specialist in areas using cytology, including veterinary oncologists, criticalists, surgeons, ophthalmologists, dermatologists, and internists.
