Biology is where many of science's most exciting and relevant advances are taking place. Yet, many students leave school without having learned basic biology principles, and few are excited enough to continue in the sciences. Why is biology education failing? How can reform be accomplished? This book presents information and expert views from curriculum developers, teachers, and others, offering suggestions about major issues in biology education: what should we teach in biology and how should it be taught? How can we measure results? How should teachers be educated and certified? What obstacles are blocking reform?

This publication reflects the results of the Ethiopian education reform as well as the exceptional efforts that multiethnic Ethiopia undertakes in order to cope with the challenges arising from the population explosion. More than 55 per cent of the 77 million Ethiopians are under the age of 18 years. The great social and political changes started in Ethiopia at the beginning of the 1990s have resulted in the substitution of the educational system based on Amharic and English by one which uses a multilingual approach. According to the Ministry of Education 22 out of the 84 languages spoken in Ethiopia are now used as media of instruction in primary schools. The book presents the lectures delivered at the workshop "On the Results of the Reform in Ethiopia's Language and Education Policy" held at Addis Ababa University in April 2006 by Ethiopian education experts and a German research team. Their contribution has facilitated a subsumption into the historical context and has given insight into the analyses of the use of 8 Ethiopian languages in primary schools in different regions of the country.

Biology Lab Manual Grade 10 4th Edition World Bank Publications Understanding Your Refugee and Immigrant Students is an excellent resource for educators who work with refugees and immigrants. This well-researched volume-including interviews with students from the profiled countries-provides a wealth of information about the specific schooling traditions, practices, circumstances, and expectations that follow these individuals to their new homes in North America and influence their learning experience. The author has focused her

research on 18 countries that contribute a majority of refugees and immigrants to the United States: Afghanistan, Bosnia-Herzegovina, Croatia, the Dominican Republic, Ecuador, El Salvador, Ethiopia, Guatemala, Honduras, India, Iran, Laos, Liberia, Peru, Somalia, Sudan, and the Ukraine. Each country profile features: statistics about the country, a historical synopsis, an overview of the county's official education policy, cultural perspectives, and a problem-solution section containing classroom strategies. The linguistic systems of the languages featured are also included for teacher reference. Also included is information about teacher-student relationships, discipline and class management, and appropriate non-verbal communication. This volume provides invaluable insight into refugee and immigrant students' cultural and educational backgrounds and gives instructors the tools to translate this information into effective classroom strategies.
