With this volume, Jane Chance concludes her monumental study of the history of mythography in medieval literature. Her focus here is the advent of hybrid mythography, the transformation of mythological commentary by blending the scholarly with the courtly and the personal. No other work examines the mythographic interrelationships among these poets and their unique and personal approaches to mythological commentary. *Comment Percer Les Secrets, Enigmes Et Mysteres de L'Ancienne Egypte Et D'Autres Anciennes Civilisations* JHU Press Throughout history famous researchers had innovative dreams that sometimes won them a Nobel Prize. Quelques mots avant de mourir, Jung fit un rêve : installé à son bureau, il parlait, lui dont l'œuvre ne s'était jamais adressé qu'aux spécialistes, à un vaste public qui le comprenait parfaitement. Ce rêve le décida à écrire le présent Essai d'exploration de l'inconscient qui allait lui permettre de dégager l'importance primordiale de la vie inconsciente dans l'accomplissement de l'inidvidu moderne et de la société. Dernier ouvrage du grand psychanaliste, Essai d'exploration de l'inconscient, dans lequel Jung résume une dernière fois sa doctrine, est aussi son testament.

Christine de Pizan, one of the earliest known women authors, wrote the Livre de paix (Book of Peace) between 1412 and 1414, a period of severe corruption and civil unrest in her native France. The book offered Pizan a platform from which to expound her views on contemporary politics and to put forth a strict moral code to which she believed all governments should aspire. The text’s intended recipient was the dauphin, Louis of Guyenne; Christine felt that Louis had the political and social influence to fill a void left by years of incompetent leadership. Drawing in equal parts from the Bible and from classical ethical theory, the Livre de paix was revolutionary in its timing, viewpoint, and content. This volume, edited by Karen Green,

Constant J. Mews, and Janice Pinder, boasts the first full English translation of Pizan’s work along with the original French text. The editors also place the Livre de paix in historical context, provide a brief biography of Pizan, and offer insight into the translation process.

C'est effectuant des recherches sur Maat, la deesse de la justice de l'ancienne Egypte, que j'ai compris combien il etait difficile aux egyptologues de comprendre les vestiges de l'ancienne Egypte, en utilisant uniquement leur esprit conscient. Leur structure mentale ne leur permet pas d'entrer dans la logique des anciens peuples, parce ces derniers avaient une facon de percevoir le monde qui leur est etrangere. Les anciens peuples pouvaient ressentir beaucoup mieux que nous l'energie vitale qui circule dans la nature, autour d'eux, l'interieur d'eux-memes et dans le cosmos. Ils avaient explore les deux aspects du monde -materiel et immateriel-, et leur lois d'interaction. Ils avaient accumule des connaissances qui sont a notre portee dans leurs vestiges, et tout particulierement dans les vestiges juridiques archaïques. Mais elles sont la plupart du temps exprimees dans un langage et une iconographie symboliques, de type onirique qui ne peuvent informer correctement l'esprit rationnel de l'homme moderne. D'ou la necessite pour les chercheurs de se pencher sur les codes de leurs propres reves. C'est lorsque nous revons que nous devenons, comme eux, sensibles l'energie vitale, et preoccupes par sa preservation, une capacite que nous avons desormais perdue l'etat de veille. Les archeologues trouveront, exposee dans ce livre, une technique unique au monde pour travailler sur leurs reves de facon fructueuse pour leurs recherches. Elle est basee sur plus de 20 ans de recherches personnelles sur les anciens systemes juridiques et sur les connexions entre le reve et la realite. Je suis heureuse de partager ici l'exprience que j'ai acquise dans ces domaines, afin qu'elle puisse etre utile a tous les chercheurs professionnels et autres personnes intelligentes qui desirent faire progresser notre comprehension de l'ancienne Egypte et d'autres anciennes civilisations, et qui n'ont pu assister mes seminaires. Christine de Pizan (ca. 1364-ca. 1430)—whether read as lyric poet, prose polemicist or historian, feminist or universal moralist—has over the past thirty years become more widely read than any other medieval French author. The attraction of her works continues to grow amongst the general public, as well as among critics and historians of literature, ideas, science and the visual arts, political scientists and philologists, and specialists in feminist theory. Christine intrigues readers by her intellectual paradoxes as much as by her prefiguration of modern attitudes by and toward women. This collection of essays honours Angus J. Kennedy, an illustrious scholar who has greatly contributed to fostering this modern growth in interest. The editors here present a significant sampling of varieties of inquiry on Christine: a broad range of contributors, from around the world, represent different approaches and levels of experience. The volume contains two indexes, and a bibliography structured to serve as an integrated and integral reference source to pertinent primary and secondary materials. This volume thus charts the progress of Christine de Pizan studies at the start of the new millennium. True to the spirit of its honoree, it also aims to serve as a gateway to future research.

[The Manifold Object of Language](#) Editions TECHNIP

This comprehensive scientific work embraces, within the generic theme of "educations, territorialities and territories", the vast majority of different facets of the complex relationships between educations and territories that have developed over time. It sheds an original light on the many - and, for some, new - interactions between territories-territories, on the one hand, and educations, on the other hand, which have recently been identified and analyzed. Beyond this main objective, it contributes to improving the fine and differentiated understanding of the concept of territory in the sciences of education and training and, more importantly, it brings innovative developments to the still embryonic theorization of the complex relations between educations. and territories-territorialities. This book shows, in particular, through its surveys, its analyzes and its results, that within all the multiple influences attributed to the different dimensions of the territories, the very discrete territoriality - falling within the symbolic territory - is perhaps finally the the most important territorial vector in terms of education in certain areas (rural Montagnards, for example), particularly as regards educational and vocational guidance, but not only. Lastly, it is not uninteresting to note that the theme it bears is spreading more and more

today beyond scientific circles: the problem of inequalities in education and orientation of territorial origin is fueling - recently - the controversies and the reflections of the French educational policy which is thus sometimes echoed - in declarative terms essentially for the moment! - scientific advances in this area

Revue générale de l'électricité Penn State Press

The book weaves the story of the complex links between education and its territories. The aim here is to examine the education couple - understood in the broadest sense: school, college, high school, universities - and territory, according to three main axes: the history and the characterization of the different ties maintained And which the school and its territory always maintain; That of the categorization and characterization of the territories in which the school is situated, of the educational policies - both explicit and grassroots - connected with it and their effects on the school; That of recent pedagogical, didactic and organizational innovations. The book is based on French specialists in territorial education issues.

"Author of the critically acclaimed Tintin and the World of Hergé and the last person to interview Remi, Benoit Peeters tells the complete story behind Hergé's origins and shows how and why the nom de plume grew into a larger-than-Remi personality as Tintin's popularity exploded. Drawing on interviews and using recently uncovered primary sources for the first time, Peeters reveals Remi as a neurotic man who sought to escape the troubles of his past by allowing Hergé's identity to subsume his own. As Tintin adventured, Hergé lived out a romanticized version of life for Remi."--Jacket.

This book is the third component in the ROAL model; it suggests a relation between language and mathematical models of totality relying on verifiability and observability/objectivity models of the linguistic text. In addition of the biomathematical hypothesis, rules of observability and objectivity have been extended to both objective and non-objective models toward a manifolded dimension of the structure within a field dimension of consciousness in which dwells the paradigm of the text as a meta-observability domain for language and natural/individual languages.
