"I'm there when it gets dark to kill you if I can..." The Bogey Man's sinister chant used to scare the wits out of Gary Scott when he was a five-year-old, growing up in the worst part of Glasgow. But now, nearly twenty years later, he's an experienced and, he likes to think, hard-nosed journalist. He's far too preoccupied with real life in all its seedy variety to worry about imaginary horrors. So why does he keep being drawn back to the dark closes and crumbling tower blocks of Maryhill? As one bizarre and grisly event succeeds another, as the deaths begin to pile up,

Gary realizes that he himself is, somehow, inextricably involved. Then, one night, the Bogey Man arrives under his window. Of Darkness and Light is an elegant story of horror both physical and psychological, a taut and vivid slide into panic.

Making Your Z-Move (Level 2) Praeger Britain makes more money from music than from its car industry. In the United States the core copyright industries achieved foreign sales and exports of \$60.18 billion - a figure which surpasses, for the first time, every other export sector, including automobiles, agriculture and aircraft. Howkins sets out to explore how we can harness creativity and the industry it sustains to our common interests. This book is not about information and the information society. It is about more basic matters, what we humans want and what we are good at.

The Corporate Mystic MICHIE

The dawn of death for planet earth began on a beautiful summer day in the middle of July in the late 21st century. Terrorists, from who knows where, succeeded in exploding a series of 'dirty bombs' in both New York and Washington. The great city was left little more than a pile of radioactive rubble. The nation's capitol, well, Washington just disappeared! Chaos seized the nation. During the widespread panic and confusion North Korea, led by an insane leader, succeeded in striking Northern California with a hydrogen bomb launched from a submarine. Some said it was aimed at Los Angeles, but the North Koreans were never very accurate. No one dreamed they could do it. Nobody devised any plausible reason why they should. But they did. The bomb struck just south of San Francisco. The result was catastrophic. There was no more Bay Area. The retaliation by the United States was swift and deadly. In a matter of days North Korea was completely annihilated, leaving only a vast, lifeless wasteland. But how could a nation, even a powerful one, strike back against this invisible band of

terrorists? They simply melted into the shadows, waiting patiently to strike again. Russia, China, and the United States cobbled together an uneasy treaty. Everyone agreed that further use of nuclear weapons would threaten all life on earth. But the damage had been done, horrible damage. Nuclear Winter was settling upon a slowly dying planet. Within three years the Russians had hastily established a lunar colony. It was the only place mankind could go to escape the horrors of a waning world. It was the only place, until now.

This book brings to life Victorian Britain's conceptions and misconceptions of the Muslim World using a thorough investigation of varied cultural sources of the period. She discovers the prevailing representation of Muslims and Islam in the two major spheres of British influence - India and the Ottoman Empire - was reinforced by reoccurring themes: through literature and entertainment the public saw "the Mahomedan" as the "noble savage", a perception reinforced through travel writing and fiction of the "exotic east" and the "Arabian Nights".

White privilege damages and distorts societies around the world, not just in the United States. This book exposes its pervasive global reach and creates a new space for discourse on worldwide racial equality. As Chandran Nair shows in this uncompromising new book, a belief in the innate superiority of White people and

Western culture, once the driving force behind imperialism, is now woven into the very fabric of globalization. It is so insidious that, as Nair points out, even many non-White people have internalized it, judging themselves by an alien standard. It has no rival in terms of longevity, global reach, harm done, and continuing subversion of other cultures and societies. Nair takes a comprehensive look at the destructive influence of global White privilege. He examines its impact on geopolitics, the reframing of world history, and international business practices. In the soft-power spheres of White privilege—entertainment, the news media, sports, and fashion—he offers example after example of how White cultural products remain the aspirational standard. Even environmentalism has been corrupted, dominated by a White savior mentality whereby technologies and practices built in the West will save the supposedly underdeveloped, poorly governed, and polluted non-Western world. For all these areas, Nair gives specific suggestions for breaking the power of White privilege. It must be

dismantled—not just because it is an injustice but also because we will be creating a post-Western world that has less conflict, is more united, and is better able to respond to the existential challenges facing all of us.
