In contemporary
philosophy, substantive
moral theories are
typically classified as
either consequentialist or
deontological. Standard
consequentialist theories
insist, roughly, that
agents must always act so
as to produce the best
available outcomes
overall. Standard
deontological theories, by
contrast, maintain that

there are some
circumstances where one
is permitted but not
required to produce the
best overall results, and
still other circumstances
in which one is positively
forbidden to do so.

Classical utilitarianism is
the most familiar
consequentialist view, but
it is widely regarded as an
inadequate account of
morality. Although
Professor Scheffler agrees
with this assessment, he
also believes that
consequentialism seems

initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that

there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

The role of the peasant in society has been fundamental throughout China's history, posing difficult, much-debated questions for Chinese modernity. Today, as China becomes an

economic superpower, the issue continues to loom large. Can the peasantry be integrated into a new Chinese capitalism, or will it form an excluded and marginalized class?

Alexander F. Day's highly original appraisal explores the role of the peasantry throughout Chinese history and its importance within the development of post-socialist-era politics. Examining the various ways in which the peasant is historicized, Day shows how different perceptions of the rural lie at the heart of the divergence of

contemporary political stances and of new forms of social and political activism in China.

Indispensable reading for all those wishing to understand Chinese history and politics, *The Peasant in Postsocialist China* is a new point of departure in the debate as to the nature of tomorrow's China.

The critically acclaimed author of *The Rib King* returns with an eagerly anticipated collection of interlocking short stories including the title story written exclusively for this volume, that explore relationships between friends, family and strangers in a Black neighborhood over fifteen years
The thirteen gripping tales In *The Last Suspicious Holdout*, the new story collection by award-winning author

Ladee Hubbard, deftly chronicle poignant moments in the lives of an African American community located in a "sliver of southern suburbia." Spanning from 1992 to 2007, the stories represent a period during which the Black middle-class expanded while stories of "welfare Queens," "crack babies," and "super predators" abounded in the media. In "False Cognates," a formerly incarcerated attorney struggles with raising the tuition to keep his troubled son in an elite

private school. In “There He Go,” a young girl whose mother moves constantly clings to a picture of the grandfather she doesn’t know but invents stories of his greatness. Characters spotlighted in one story reappear in another, providing a stunning testament to the enduring resilience of Black people as they navigate the “post-racial” period. The Last Suspicious Holdout so vividly portrays. NC/SUC Readme Publishing

Born in 1900 in French West Africa, Malian writer Amadou Hampâté Bâ was one of the towering figures in the literature of twentieth-century Francophone Africa. In Amkoullel, the Fula Boy, Bâ tells in striking detail the story of his youth, which was set against the aftermath of war between the Fula and Toucouleur peoples and the installation of French

colonialism. A master storyteller, Bâ recounts pivotal moments of his life, and the lives of his powerful and large family, from his first encounter with the white commandant through the torturous imprisonment of his stepfather and to his forced attendance at French school. He also charts a larger story of life prior to and at the height of French colonialism: interethnic conflicts, the clash between colonial schools and Islamic education, and the central role indigenous African

intermediaries and interpreters played in the functioning of the colonial administration. Engrossing and novelistic, Amkoullel, the Fula Boy is an unparalleled rendering of an individual and society under transition as they face the upheavals of colonialism.

The nine stories in Mike Alberti's debut collection shine a sharp light on small-town American life —not the Arcadian small towns of yesteryear, but the old mill towns hanging

on after the mill has stopped running, the deserted agricultural communities in the middle of vast industrial farms, places where bad luck has become part of the weather. But even in these blighted, neglected landscapes, the possibility of renewal always presents itself: there is hope for these places and the characters who inhabit them. In these fresh, innovative stories, some people let you down, but some people don't.

Environmental harm is commonly associated with companies that extract, consume, and pollute our shared natural resources. Rarely are the 'unseen polluters,' the financiers that sponsor and profit from eco-damaging corporations, placed at the forefront of the environmental debate. By focusing on these unseen polluters, Benjamin Richardson provides a comprehensive examination of socially responsible investment (SRI), and offers a guide

to possible reform. Richardson proposes that greater regulatory supervision of SRI will help ensure that the financial sector prioritizes ethically-based investments. In Socially Responsible Investment Law, he suggests that new governmental reforms should encourage companies to participate in socially responsible investments by providing a better mix of standards and incentives for SRI through measures that include redefining the fiduciary responsibilities

of institutional investors to incorporate environmental concerns. By doing so, Richardson posits that corporate financiers, including banks, hedge funds, and pension plans, will become more accountable to the goals of ensuring sustainable development.

Madeleine's Children Pmc
Pinnacle Worldwide Chile

In 1759 a baby girl was born to an impoverished family on the Indian subcontinent. Her parents pawned her into bondage as a way to survive famine. A Portuguese slaver sold the girl to a pious French spinster in Bengal, where she was baptized as Madeleine. Eventually she was taken to France by way of Ile de France (Mauritius), and from there to Ile Bourbon (Reunion), where she worked on the plantation of the Routier family and gave birth to three children: Maurice,

Constance, and Furcy. Following the master's death in 1787, Madame Routier registered Madeleine's manumission, making her free on paper and thus exempting the Routiers from paying the annual head tax on slaves. However, according to Madeleine's children, she was never told that she was free. She continued to serve the widow Routier for another nineteen years, through the Revolution, France's general emancipation of 1794 (which the

colonists of the Indian Ocean successfully repelled), the Napoleonic restoration of slavery, and British occupation of France's Indian Ocean colonies. Not until the widow Routier died in 1808 did Madeleine learn of her freedom and that the Routier estate owed her nineteen years of back wages. Madeleine tried to use the Routiers' debt to negotiate for her son Furcy's freedom from Joseph Lory, the Routiers' son-in-law and heir, but Lory tricked the illiterate Madeleine into signing

papers that, in essence, consigned Furcy to Lory as his slave for life. While Lory invested in slave smuggling and helped introduce sugar cultivation to Ile Bourbon, Furcy spent the next quarter century trying to obtain legal recognition of his free status as he moved from French Ile Bourbon to British Mauritius and then to Paris. His legal actions produced hundreds of pages that permit reconstruction of the lives of Furcy and his family in astonishing detail. The

Cour Royale de Paris, France's highest court of appeal, finally ruled Furcy ne libre (freeborn) in 1843. Eight rare extant letters signed by Furcy over two decades tell in his own words how he understood his enslavement and freedom within these multiple legal jurisdictions and societies. France's general emancipation of 1848 erased the distinction between slavery and freedom for all former slaves but the reaction of 1851 excluded them from citizenship. The struggle

for justice, respect, and equality for former slaves and their descendants would not be realized within Furcy's lifetime. The life stories of Madeleine and her three children are especially precious because, unlike scores of slave narratives published in the United States and England in the eighteenth and nineteenth centuries, no autobiographical narrative of a slave held by French- published or unpublished- exists. This will be one of only a handful of modern biographies of enslaved

people within France's empire, in French or in English, and the only one to explore transformations in slavery and freedom in French colonies of the Indian Ocean. This story is also significant because of the legal arguments advanced in Furcy's freedom suits between 1817 and 1843. Furcy's lawyers argued that he was free by race (as the descendent of an Indian rather than an African mother) and also by Free Soil (the legal principle whereby any slave setting foot on French soil

thereby became free, since Madeleine resided in France before Furcy was born). Parallel debates surround the American case of Dred Scott, who began his long and unsuccessful bid for freedom in 1846 in the former French colonial city of St. Louis, Missouri, just three years after the French Cour Royale de Paris upheld Furcy's freedom on the basis of Free Soil. However, the French ruling that Furcy was free by Free Soil and the rejection of the racial argument offer a

historical counterpoint to the infamous Taney opinion of 1857. The gripping story of Madeleine and her children is especially well-suited to exploring the developments of French colonization, plantation slavery, race, sugar cultivation, and abolitionism. A fluid narrative, it should have appeal for readers of the history of slavery, world history, Indian Ocean history, and French colonial history.

Energy Investing that gets beyond the hype 2001 was perhaps the most tumultuous year in the modern history of the energy industry. As with telecommunications, computer and information technology, and Internet/e-commerce businesses over the last two decades, it is now a truly delicate but potentially lucrative time to invest in electricity. Deregulation means that investors face a breathtaking array of new companies and technologies that have

the potential to grow and accumulate wealth. With a focus on understanding market dynamics and "technology capital," Jason Makansi shows you how to get beyond analyst hype, uncover new opportunities, and invest wisely in An Investor's Guide to the Electricity Economy. Divided into three sections-"The Industry," "The Investor," and "Case Studies"-this book introduces readers to the most current and relevant industry trends, critical insights and research based on the

author's tested methodology, and the companies and technologies that are transforming the industry. The author's "Technology Matrix" assesses the potential of new companies based on technology development cycles, market-entry timing, commercialization progress, and strategic alliances. Understanding the new energy wholesale and retail experience, in which business and consumers will have a variety of providers and service plans to choose

from, is emphasized throughout. Other topics covered include: * Neglected investment opportunities such as in the coal, nuclear, energy storage, and transmission sectors * Energy information services and distributed power * The California electricity crisis of 2000--2001--lessons learned * Corporate profiles of industry innovators Institutional and individual investors, analysts, policy-makers, researchers, and industry executives will find An Investor's Guide to the

Electricity Economy a lively and indispensable read.

Yvain Ten Speed Press Winner of the prestigious André Simon Drink Book Award The first definitive reference book to describe, region-by-region, how the great wines of Europe should taste. This will be the go-to guide for aspiring sommeliers, wine aficionados who want to improve their blind tasting skills, and amateur enthusiasts looking for a straightforward and visceral way to

understand and describe wine. In this seminal addition to the wine canon, noted experts Rajat Parr and Jordan Mackay share everything they've learned in their decades of tasting wine. The result is the most in-depth study of the world's greatest wine regions ever published. There are books that describe the geography of wine regions. And there are books that describe the way basic wines and grapes should taste. But there are no books that describe the intricacies of

the way wines from various subregions, soils, and appellations should taste. Now, for the first time ever, you can learn about the differences between wines from the 7 grand crus and 40 premier crus of Chablis, or the terroirs in Barolo, Champagne, and Bordeaux. Paying attention to styles, winemakers, soils, and the most cutting-edge of trends, this book explains how to understand the wines of the world not in the classical way, but in the modern way--

appellation by appellation, soil by soil, technique by technique--making it an essential reference and instant classic.

This new exploration of the wines of the Rhône Valley is an essential reference guide to one of the great classic wine regions of France. It covers all the appellations of the Rhône from timeless Côte-Rôtie and Châteauneuf-du-Pape to insiders' secrets such as the forgotten Brézème and Seyssuel. One of the largest and most ancient wine regions of France, the Rhône remains remarkably accessible and true to itself despite a growth in size and reputation in recent

years. Wines of the Rhône features interviews with some of the most respected winemakers and personalities of the region and includes fascinating insights and anecdotes from experts based further afield. Dividing the region into two parts, Walls depicts the sights, sounds and smells of the towns and countryside that make each unique. He then brings readers up-to-date with top-line facts and figures and explores the climate, terrain, main soil types, grape varieties and

peculiarities of viticulture and vinification in each part of the region. Although the focus of the book is on the present Walls takes time to look at the main historical events that have shaped each part of the Rhône Valley and its wines. Part 1 covers Châteauneuf-du-Pape, Gigondas, Vacqueyras, Rasteau, Cairanne, Beaumes-de-Venise, Vinsobres, Lirac, Tavel, Brézème and St Julian St. Alban, the Diois and Côtes-du-Rhône Villages and other southern Rhône

appellations. Part 2, the northern Rhône, covers Côte-Rôtie, Seyssuel, Condrieu, Château-Grillet, Saint Joseph, Cornas, Saint-Péray, Hermitage and Crozes-Hermitage. Part 3 contains vintage guides for both parts of the region, giving a brief

description of the quality and typical wine styles in both red and white from 1978 to the present day and detailing main vintage characteristics and any over- or underperforming appellations as well as providing a guide to food

and wine matching. Wines of the Rhône examines the contemporary issues being tackled across the region with clarity and authority, in a readable and entertaining format that makes an invaluable addition to the library of any serious wine lover.
