This series provides the most complete collection of current knowledge on addictive behaviors and disorders to date. In short, it is the definitive reference work on addictions. The papers in *Tax Policy and the Economy* Volume 31 are all directly related to important and often long-standing issues, often including how transfer programs affect tax rates and behavior. In the first paper, Alan Auerbach, Laurence Kotlikoff, Darryl Koehler, and Manni Yu take a lifetime perspective on the marginal tax rates facing older individuals and families arising from a comprehensive set of sources. In the second, Gizem Kosar and Robert A. Moffitt provide new estimates of the cumulative marginal tax rates facing low-income families over the period 1997-2007. In the third paper, Emmanuel Saez presents evidence on the elasticity of taxable income with respect to tax rates, drawing on data from the 2013 federal income tax reform. In the fourth, Conor Clarke and Wojciech Kopczuk survey the treatment of business income taxation in the United States since the 1950s, providing new data on how business income and its taxation have evolved over time. In the fifth paper, Louis Kaplow argues that the reduction in statutory tax rates from base-broadening may not reduce effective marginal tax rates on households.

Authoritative and readable, this book is the first historical overview of US federal tax systems published since 1967. Its coverage extends from the ratification of the Constitution to the present day. Brownlee describes the five principal stages of federal taxation in relation to the crises that led to their adoption - the formation of the republic, the Civil War, World War I, the Great Depression, and World War II - and discusses the significant modification during the Reagan presidency of the last stage. Brownlee also addresses the proposals made since the fall of 1994 congressional elections under the 'Contract with America' and competing schemes, and he assesses today's conditions for a tax revolution in the light of the national emergencies that have produced revolutions in the past. While focusing on federal policy, Brownlee also attends to the related history of state and local taxation.
